Cedar Point®

GUEST ACCESSIBILITY GUIDE

Welcome to Cedar Point!

We are glad you are here! At Cedar Point we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment and we want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back, or neck trouble, pregnant Guests, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices, or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services or Frontier Town Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our associates to help accommodate you.

RIDE SAFELY

Under the **Ohio Revised Code Section 993.08**, Riders must obey all warnings and directions regarding amusement park rides and behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is a misdemeanor.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions, known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Frontier Town Guest Services. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **do not ride**.

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all Operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **For your safety, do not enter an unauthorized area for any reason**. You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper rider positioning until the ride comes to a complete stop. Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry, and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-rider. Cedar Point is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone or electronic usage while riding is prohibited.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Cedar Point.

RIDE RATING SYSTEM

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories

CATEGORY	DESCRIPTION
Low Thrill Rides	Rides that are generally calm and gentle in nature.
Mild Thrill Rides	Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction, and/or elevation.
Aggressive Thrill Rides	Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction, and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

 This symbol is used to identify rides where the Guest may remain in wheelchair. Riders may remain in their wheelchair to ride the Cedar Point & Lake Erie Railroad.

 This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

 This symbol is used to identify rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Cedar Point uses the following terms:

Ability to hold on or brace: Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Hand-held Infant: Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Kiddy Kingdom Carousel (in a chariot), Midway Carousel (in a chariot), Cedar Point & Lake Erie Railroad (center of the bench), and Sky Ride.

Supervising Companion: Many of our rides have height requirements that allow a Guest under that requirement to ride with a Supervising Companion. A Supervising Companion is a companion who is at least 54" in height and approximately 14 years of age, who meets all other criteria for riding, and who will assist their companion in complying with safe participation instructions. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment, and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders. An exception to this is at PEANUTS™ Road Rally where the accompanied Rider does not have to be in the same row.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrances.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be officially measured at Guest Services or Frontier Town Guest Services. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height measuring device may be used during the height measuring process. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, a shoe which does not contribute excessively to the Guest's height is required. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Cedar Point reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

Guests with a mobility restriction or cognitive impairment should visit Accessibility Services, Guest Services, or Frontier Town Guest Services upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services associate will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request reasonable accommodations are encouraged to obtain the IBCCES Accessibility Card (IAC) by registering at **accessibilitycard.org** or via the Accessibility Card mobile app. Once a Guest has filled out the online application and uploaded necessary documentation into a secure online portal, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to Accessibility Services, Guest Services, or Frontier Town Guest Services upon their arrival at the park to express their accommodation needs. Some questions are asked to ensure that the Guest has the required physical criteria in order to

safely experience attractions. Following that conversation, the associate will provide the details needed to participate in the program.

Note: Only IBCCES can issue the IBCCES Accessibility Card, and not Cedar Point.

CASTS & BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides. We suggest you delay your visit until the cast is removed.

The following chart displays the cast and brace rules for all rides and attractions.

C Must ride in a chariot
F Cast/brace must fit safely in the ride unit
Y May ride with the condition

CEDAR POINT	Braced Arm Cast	Cervical Collar or Neck Brace	Foot or Lower Leg Cast	Forearm Cast	Full Arm Cast	Full Leg Cast

PROSTHETIC DEVICES

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests must be able to maintain the proper riding positioning. Guests should visit Guest Services or Frontier Town Guest Services prior to waiting in line or riding to ensure a safe riding experience.

Prosthetics are NOT allowed on GateKeeper (leg prosthesis only), maXair (leg prosthesis only), Raptor (leg prosthesis only), Rougarou (leg prosthesis only), Siren's Curse, Slingshot (leg prosthesis only), Steel Vengeance, Valravn (leg prosthesis only), and WindSeeker (a Rider with more than one lower body prosthetic). The manufacturer of Skyhawk also prohibits Guests with any leg prosthetic devices at or above the knee from riding.

The manufacturers of Maverick, Millennium Force, and WindSeeker require that Guests with prosthetic devices provide Cedar Point with documentation from the provider of their prosthetic device to guarantee that the device has been designed to remain securely in place while exceeding a maximum speed of 92 miles per hour with maximum G forces from -1.5 G's to 5 G's with a sufficient safety factor for single point failure items.

RIDE DEVICES

For safety reasons, certain attractions may require the removal of medical devices or prosthetics that are not securely fastened to the rider's body. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Transfer devices, when requested, can be used to assist a Guest out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Blue Streak, Cedar Creek Mine Ride, Corkscrew, GateKeeper, Gemini, Iron Dragon, Magnum XL-200, Top Thrill 2, Valravn, Wilderness Run, and Woodstock Express.

Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: GateKeeper, Raptor, Rougarou, and Valravn.

Hand controls, when requested, can be used to assist a Rider in operating a vehicle if unable to use the gas pedal. Cadillac Cars is equipped with hand controls.

In addition, specific ride vehicles are equipped with removable sides or wider entry points at Giant Wheel, Pipe Scream, Steel Vengeance, Top Thrill 2, and Wild Mouse. These vehicles may further assist Riders in transferring from their wheelchair to the ride unit. Please inform an associate at the ride if you wish to use that vehicle.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride attendant or Guest Services associate.

ADDITIONAL INFORMATION & SERVICES

Our goal is to make Cedar Point as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large Print Guides
Printed and large print versions of the Park Guide and Guest Accessibility Guide are available at Guest Services. A braille version of the Guest Accessibility Guide is also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Campground & Hotel Shuttle Buses
A courtesy shuttle is available for transportation to and from park entrances, hotels, and Cedar Point restaurants. Available to Resort Guests only. Phones to call a Courtesy Shuttle are located at each stop.

Courtesy Shuttle locations:

- **Hotel Breakers**: Front Entrance
- **Lighthouse Point**: Bench adjacent to the Registration Office, Bench near the Pool, restrooms located near east end

- **Marina**: To the right of the Marina Building
- **Bay Harbor**: Request a shuttle at the hostess stand
- **Cedar Point Shores**: To the right of the main entrance
- **Main Gate**: To the right of the main entrance in the Bus Lot

Family Care Center
Family Care Centers for parents to feed young children are located in our First Aid Stations.

First Aid
Our two First Aid Stations located behind PEANUTS™ @ The Point and in Frontier Town are staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. Emergency medical care is available for overnight Guests.

Interpretive Services
If you require American Sign Language (ASL) interpreting services, we can provide them with at least seven days advance notice for live show venues, and/or to accompany you for the day. Additionally, show scripts or score sheets can also be requested at each venue. To arrange ASL services, please email **contact@cedarpoint.com** or you can submit your request online through **cedarpoint.com/accessibility**.

Parking
Accessible parking is available on a first-come, first-served basis within the main parking lots of the park. When you arrive at the parking toll booths, ask an associate for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask an associate for directions to additional parking areas.

Quiet Room
Cedar Point offers a Quiet Room, located at Frontier Town First Aid, for family members or caregivers to take a break and reduce sensory stimulation. Additionally, there are sensory features provided for Guest use.

Restrooms
Private restroom facilities for Guests needing the assistance of a companion are available at Main First Aid, Camp SNOOPY™, Lakeside Pavilion, Frontier Town First Aid, Sky Ride West, and The Barnyard restroom on the Frontier Trail. Wheelchair accessible stalls are located at all restrooms.

Rider Swap program
The Rider Swap program allows one adult to stay with non-riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services, Frontier Town Guest Services, or any Ride Location.

Service Animals
Service animals are welcome at Cedar Point. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be house broken, controlled with a restraining device, and displaying appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or associate will be directed to remove the animal from the park. There is a limit of one service animal per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on the Cedar Point & Lake Erie Railroad, 4x4's, Cadillac Cars, Camp Bus, Giant Wheel, Kiddy Kingdom Carousel, Midway Carousel, PEANUTS™ Road Rally, Sky Ride, SNOOPY'S™ Deep Sea Divers, and SNOOPY'S™ Express Railroad. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and be seated on the floor, not the ride seat. They may also attend the performances at all venues. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services or Frontier Town Guest Services for more information.

A Service Animal Relief Area is located in the grassy area on the main midway near the Sky Ride West restroom and on the Gemini Midway across from Camp SNOOPY™. Owners are responsible for disposing of their animal's waste.

Special Dietary Needs
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles
A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at the Rental Center located on the right just inside the main gate and at CP Corner Store (wheelchairs only) near the Magnum XL-200 Gate. Online reservations are available for wheelchair/ECV rentals in advance of your visit. Reservations can be made by going to **www.cedarpoint.com** and visit the rentals page under the Tickets tab. Rentals are available at the park while supplies last. For those Guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. A wristband must be acquired at the Rental Center to be able to take the wheelchair and/or stroller out of the entrance gates to one of our resorts. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park. Manual wheelchairs are available at ride locations with Wheelchair Lifts if weight exceeds the max capacity of 750 lb.

Guests Using Wheelchairs or ECV's
We require a safe speed be maintained while traveling in the park by Guests who choose to use a wheelchair or ECV. Wheelchairs and ECV's cannot be accommodated on most rides and attractions, with the exception of Cedar Point & Lake Erie Railroad, where wheelchairs can be accommodated. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this brochure for more specific information.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible.

A wheelchair lift is available at Corkscrew, GateKeeper, Gemini, Iron Dragon, Wilderness Run, Magnum XL-200, Mine Ride, Pipe Scream, Raptor, Rougarou, Siren's Curse, and Steel Vengeance to transport a Guest in a wheelchair to our 2nd story ride platform. Please use the phone at base of lift to request service. A standard elevator is available for self service at Maverick and Valravn. Manual wheelchair available at all locations with a wheelchair lift if weight exceeds the maximum posted capacity. If an ECV has attachments to the vehicle which could impede with the operation of a lift or with safe lift ingress and egress, please transfer to manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Frontier Town Guest Services. Cedar Point personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Guest Services.

EVACUATIONS

Evacuations may be required due to mechanical problems, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course due to mechanical reasons. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions.

If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory Riders prior to evacuating those Riders using wheelchairs. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF A LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on: Blue Streak, Corkscrew, GateKeeper, Lake Erie Eagles, Maverick, maXair, Millennium Force, Mine Ride, Pipe Scream, Power Tower,

Raptor, Rougarou, Siren's Curse, Skyhawk, SlingShot, Steel Vengeance, Top Thrill 2, Wave Swinger, Wild Mouse, and Valravn.

Maximum and minimum recommended weight limits can be found under the individual rides in this guide and on the Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance of: GateKeeper, Maverick, maXair, Millennium Force, Raptor, Rougarou, Siren's Curse, Skyhawk, Steel Vengeance, Top Thrill 2, and Valravn.

The manufacturer requires a maximum Guest height on the following rides: GateKeeper, Maverick , Millennium Force, Rougarou, Siren's Curse, SlingShot, and Super Himalaya.

LOOSE ARTICLES

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-Rider. Cedar Point is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snug against the Rider's body.

On GateKeeper, Magnum XL-200, Millennium Force, Raptor, Rougarou, and Valravn: loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line and must be stored in a locker or with a non-Rider.

At Siren's Curse, Steel Vengeance, and Top Thrill 2: metal detectors are in use. All loose items must be stored in a locker or left with a non-Rider prior to riding.

For safety reasons, cell phone usage, taking pictures, and filming on rides are prohibited. Failure to comply may result in ejection from the park.

Glasses must be secured on all rides. On GateKeeper, Maverick, maXair, Power Tower, Siren's Curse, Skyhawk, SlingShot, Steel Vengeance, Top Thrill 2, and Valravn, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see an associate for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST AND FOUND

All items found at Cedar Point are turned in to our Lost and Found Department at our main gate. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible.

Lost articles may be reported via the internet at cedarpoint.com/lost-and-found.

For your safety, do not enter unauthorized areas to retrieve lost articles. You may be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnetics are used at the following attractions: GateKeeper, Maverick, Millennium Force, Rougarou, Siren's Curse, SlingShot, Steel Vengeance, Top Thrill 2, Valravn, and Wild Mouse. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: CP & LE Railroad, Dune Buggies, Giant Wheel, Helicopters, Kiddy Kingdom Carousel, Midway Carousel, Mustangs , Police Cars, Sky Fighters, Sky Ride, SNOOPY'S Express Railroad, and Space Age. The tank must fit safely in the ride unit and not interfere with the ride restraint system.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained.

The equipment must allow the restraint mechanism to be secured snugly against the Rider's body. The equipment must not prevent Guests from properly sitting in the ride unit with their back and shoulders against the seat back. At no time

may the equipment be between the Guest and the seat or the restraint. Guests must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects, including but not limited to: haze and other atmospheric effects, scents, areas of low lighting, loud music, sound effects, strobe lighting, and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions.

Attractions utilizing these effects include; Cedar Point & Lake Erie Railroad, GateKeeper, Giant Wheel, Magnum XL-200, Maverick, maXair, Millennium Force, Raptor, Rougarou, Siren's Curse, Steel Vengeance, Top Thrill 2, Valravn, WindSeeker, Woodstock Express, and Wilderness Run.

PROPER ATTIRE

Most rides require proper riding attire including shirts, shorts, and shoes. Shirts and shoes are required in queues and all park pathways at all times. Swimwear is only permitted on Thunder Canyon. For your safety, loose clothing (including scarves and other free-flowing clothing), must be significantly secured or removed to prevent any interference with the ride restraint system. On Maverick, Millennium Force, Power Tower, Siren's Curse, Steel Vengeance, Top Thrill 2, and Wild Mouse, scarves will be required to be removed in their entirety.

Loose fitting shoes must be removed before riding Charlie Brown's Wind Up, GateKeeper, Kite Eating Tree, maXair, Power Tower, Raptor, Rougarou, Skyhawk, SlingShot, Top Thrill 2, Woodstock's Airmail, Valravn, Wave Swinger, and WindSeeker.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Independent seated postural control.
The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride,

including the dynamic motion of the ride. Certain ride units such as Carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.
The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.
Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to hold on with two functioning arms.
Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis

Ability to brace self with one functioning leg.
Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to brace self with two functioning legs.
Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Minimum of two functioning extremities.
Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.
Guests must have a minimum of three functioning extremities (two legs and an arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.
Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit the attraction within specified parameters without endangering self or others.
Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the alternate access entrance or having someone aid in boarding. For the safety of our associates and Guests, associates are instructed not to perform any lifting of Guests.

Appropriate Observed Behavior:
Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Guests have a duty to:
- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, Guests must have **seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

4 x 4's 2 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Guests over 54" tall must be accompanied by a child. Hand-held infants are not permitted.

This ride only accommodates one Rider over 54" per car. Adults must sit in the back seat.

This ride is a miniature truck ride that follows an electric track.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Atomic Scrambler 3

*Guests must be 48" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 510 lb. per car

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The larger Rider must sit on the outside of seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Balloon Race 2 *in Camp SNOOPY™*

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 300 lb. per car; this ride only accommodates one adult per balloon.

PEANUTS™ themed hot air balloon ride that spins and raises Riders in the air.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Blue Streak 4

Guests must be 48" tall to ride.

A high-speed wooden roller coaster with a combination of banked turns and airtime humps.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Calypso 3

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

A circular ride where ride units move in the opposite direction of the ride table, spinning Riders in two opposing directions. Riders will experience rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The larger Rider must sit on the outside of seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Cadillac Cars 2

*Guests must be 48" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

This is an antique styled gas-powered car that is driven by the Rider on a designated track for up to four Riders per car.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests with a broken collar bone, cervical collar or neck brace are not permitted to ride.

Driver Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Passenger Rider Criteria: Guest must have sufficient lower extremities to ensure the ride's restraint system adequately restrains them. Guests who do not have an appropriate center of gravity or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a visual impairment or who are not able to steer and press the accelerator must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Note: Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

Camp Bus 2 *in Camp SNOOPY™*

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per row; this ride only accommodates three adults per row.

PEANUTS™ themed bus with six rows that seats four Guests per row. The bus rotates in a clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar or neck brace not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they

will shift. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Cedar Creek Mine Ride 4

Guests must be 48" tall to ride.

A wood and steel roller coaster. Riders will experience rapid changes in direction.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. A wheelchair lift is available to transport Guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Cedar Downs Racing Derby 3

Guests must be 48" tall to ride. Only two Riders per horse.

A high-speed circular ride somewhat resembling a Carousel. It generates a high level of centrifugal force due to the speed and size of the ride table.

Restraint System: Guests must have the ability to straddle the ride unit, hold onto the horse, and grip the horse with both legs.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or any leg cast (foot, lower, full, etc) are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up onto a horse.

Cedar Point & Lake Erie Railroad 1

*Guests must be a minimum of 46" tall to ride alone **or** be accompanied by a Supervising Companion. Guests less than 46" tall must sit in the center of the bench, not on the outside edge.*

Authentic coal-fired steam engine that transports passengers along a circle track in the back section of the park. There are two stations, Main Station located near Iron Dragon, and Frontier Station located near Maverick.

Rider Criteria: Guests must be able to demonstrate appropriate observed behavior or ride with a Supervising Companion. Guest unable to exhibit independent seated postural control under the dynamic conditions of the ride must be seated with a Supervising Companion in the center of the bench.

Rider Access: Alternate Access is to the right of the turnstile at Main Station and in center of station at Frontier Station. Guests must be capable of stepping up onto the train. Wheelchairs can be folded and loaded on the train. A special car and ramp are available for those unable to board without leaving their wheelchair. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Charlie Brown's Wind Up 2 *in Camp SNOOPY™*

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 275 lb. per swing; this ride only accommodates one adult per swing.

PEANUTS™ themed chair swing children's ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A shared lap bar and a between-the-leg safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

Corkscrew 5

Guests must be 48" tall to ride.

A high-speed, looping roller coaster which turns Riders upside down three times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the entrance to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Dodgem 4

*Guests must be 48" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 340 lb. per car.

A bumper car ride where Guests drive cars designed for bumping into each other. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: A shared lap bar secures all Riders across the thighs and pelvis.

Rider Criteria: Guests who do not have an appropriate center of gravity or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Driver Rider Criteria: Guests must have a minimum of three functioning extremities.

Passenger Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a visual impairment or who are not able to steer and press the accelerator must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the gate to the left of the entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Dune Buggies 1 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A kiddie circular ride with Dune Buggy ride units.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Flying Ace Balloon Race 2 *in Planet SNOOPY™*

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 300 lb. per car; this ride only accommodates one adult per balloon.

PEANUTS™ themed hot air balloon ride that spins and raises Riders in the air.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

GateKeeper 5

*Guests must be between 52" tall **and** 78" tall to ride.*

A high-speed, wing looping roller coaster which turns Riders upside down six times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: At minimum, Guests must have at least one functioning arm including a hand and two legs, or two functioning arms including a hand and two leg amputations below the knee. Guests with a cervical collar, neck brace, or broken collar bone not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to

determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. A transfer device is available upon request, which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the exit area to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride utilizes magnetic systems.

WARNING: This ride contains strobe lighting.

Gemini 5

Guests must be 48" tall to ride.

A high-speed wood and steel double racing coaster with a combination of high-speed banked turns, airtime humps, and rapid directional changes.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the Entrance to the ride platform. Manual wheelchair available if weight

exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Giant Wheel 2

*Guests must be 48" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants and single Riders are not permitted.*

A 145-foot-tall ferris wheel. Riders ride in 1 of 36 gondolas suspended from the outer rim of the wheel.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests must be able to demonstrate seated postural control and appropriate observed behavior or ride with a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A specific cabin at this attraction is equipped with a larger door which may assist a Rider in transferring from their wheelchair to the ride unit. Please inform an associate if you wish to use that vehicle. Please use caution, as the ride unit may shift when entering and exiting. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Helicopters 2 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

Maximum Weight – 220 lb. per ride unit

A kiddie helicopter ride where Riders control the elevation of each unit.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping

up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Iron Dragon 4

Guests must be 42" tall to ride.

A suspended roller coaster with cars that hang down from the track and swing out to the sides as the ride drops and turns.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the entrance to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Joe Cool's Dodgem School 2 *in Planet SNOOPY™*

*Guests must be between 35" tall **and** 53" tall to ride.*

A bumper car ride for children where Guests drive cars around a small track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual shoulder strap is positioned across the chest and under the arms of each Rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available through a gate near the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Kiddy Kingdom Carousel 1 *in Kiddy Kingdom*

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.*

A carousel ride which features animals — both stationary and moving up and down — and chariot seating mounted on a circular platform that rotates.

Restraint System: Guests under 46" must be seated in a chariot or ride on the middle row of animals and be held by a Supervising Companion who is standing on the platform between the animals. Only one Rider per animal.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests who do not have independent seated postural control, appropriate center of gravity or appropriate observed behavior, must ride in a chariot with a Supervising Companion. Riders with a full leg cast must be seated in a chariot.

Rider Access: Alternate access is mainstreamed at the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals are permitted to ride in the chariots. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Kite Eating Tree 2 *in Planet SNOOPY™*

*Guests must be between 36" tall **and** 54" tall to ride.*

Maximum Weight – 660 lb. per ride

PEANUTS™ themed children's ride that hoists Riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Lake Erie Eagles 3

*Guests must be 44" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 340 lb. per car

Riders ride in suspended cars that rotate in a circle. Once the ride's speed increases, Riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Linus' Beetle Bugs 3 *in Camp SNOOPY™*

*Guests must be 46" tall to ride alone **or** be accompanied by a Supervising Companion. Guests younger than 6 years old must be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 800 lb. per car

This is a circular ride where cars pivot by centrifugal force created by the ride's rotating table.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Magnum XL-200 5

Guests must be 48" tall to ride

An out-and-back hyper steel roller coaster with banked curves and airtime hills. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride contains strobe lighting.

Matterhorn 3

*Guests must be 46" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 510 lb. per car

Flying bobsled ride where cars are pivoted toward a horizontal position by the centrifugal force created by the ride's rotating table.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The larger Rider must sit on the outside of seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Maverick®

*Guests must be between 52" tall **and** 78" tall to ride.*

A full circuit launch roller coaster featuring banked turns, a tunnel, and two launch points. Riders will experience weightlessness, high speeds, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have three functioning extremities. Guests may ride with one leg amputation; amputation must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services or Frontier Town Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is via a gate at the ride entrance. Guests will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. An elevator is available to transport Guests to the ride platform.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

maXair

Guests must be 52" tall to ride.

A thrill ride that swings Riders to a height of 140 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience weightlessness and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace or broken collar bone are not permitted on this ride. Casts are not permitted on this ride. Guests with any prosthesis must consult with Guest Services or Frontier Town Guest Services prior to waiting in line or riding. Leg prosthetics are not permitted on this ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: This ride contains strobe lighting.

Midway Carousel 1

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.*

A carousel ride which features animals — both stationary and moving up and down — and chariot seating mounted on a circular platform that rotates.

Restraint System: Guests under 46" must be seated in a chariot or ride on the middle row of animals and be held by a Supervising Companion who is standing on the platform between the animals. Only one Rider per animal.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests who do not have independent seated postural control, an appropriate center of gravity or appropriate observed behavior must ride in a chariot with a Supervising Companion. Guests with a full leg cast must be seated in a chariot.

Rider Access: Alternate access is mainstreamed at the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals are permitted to

ride in the chariots. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Millennium Force® 5

*Guests must be between 48" tall **and** 78" tall to ride.*

A high-speed giga roller coaster. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. The lap bar must be in firm contact with the pelvis and muscular parts of the thighs. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests may ride with one leg amputation; amputation must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services or Frontier Town Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride utilizes magnetic systems.

WARNING: This ride contains strobe lighting.

Monster 3

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 400 lb. per car

This is a circular ride with six sweeps of gondolas moving clockwise versus the up-and-down counter-clockwise rotation of the arms. Riders will experience changes in speed, direction and elevation, and rapid movements from side-to-side.

Restraint System: A bucket style ride unit with a safety pin encapsulates the Riders to secure them. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, braced arm cast, or broken collar bone are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Motorcycles 1 *in Kiddy Kingdom*

*Guests must be between 39" tall **and** 54" tall to ride. Both feet must simultaneously touch the floor.*

A kiddie circular ride with motorcycle ride units.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Full leg casts are not permitted on this ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Mustangs 1 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A kiddie circular ride with Mustang car ride units.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Ocean Motion 3

*Guests must be 48" tall to ride alone **or** 39" tall **and** accompanied by a Supervising Companion.*

A swinging ship that produces a feeling of weightlessness as it swings back and forth.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. Riders between 39" and 48" tall must be seated in the center two rows of the ship and sit towards the middle of the row with their Supervising Companion.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please use caution, as the ride unit may shift when entering and exiting.

PEANUTS™ 500 2 *in Camp SNOOPY™*

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 275 lb. per car; this ride only accommodates one adult per car.

PEANUTS™ themed children's ride that allows Guests to ride in their own race car that whips around an oblong track.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a companion.

PEANUTS™ Road Rally 2 *in Planet SNOOPY™*

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per truck; this ride only accommodates one adult per truck.

This ride is a miniature truck ride that follows an electric track in a train-like fashion.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit in the front row. Adults must sit in the back seat.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Pipe Scream 4

*Guests must be 48" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

A family thrill ride where a 36-passenger gondola spins as it travels on a track. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces and directions.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Arm casts must not be positioned next to another Rider.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an Associate if you wish to use that row. A wheelchair lift is available to transport Guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Police Cars 1 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A kiddie circular ride with Police Car ride units.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Power Tower 5

Guests must be 48" tall to ride.

A tower ride with a chair lift-type seat where Riders are propelled up or shot down at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating

themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

Raptor® 5

Guests must be 54" tall to ride.

A high-speed, inverted looping roller coaster which turns Riders upside down six times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: At minimum, Guests must have at least one functioning arm including a hand and two legs, or two functioning arms including a hand and two leg amputations below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride contains strobe lighting.

Red Baron 2 *in Camp SNOOPY™*

*Guests must be between 36" tall **and** 54" tall to ride.*

Maximum Weight – 220 lb. per ride unit

PEANUTS™ themed children's plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or any leg cast (foot, lower, full, etc) are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Rock, Spin & Turn 2 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A kiddie tea cup spinning ride.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or 2 lower arm casts are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Roto-Whip 2 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A kiddie ride that allows Riders to ride in their own car that whips around a track.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Rougarou® 5

*Guests must be between 54" tall **and** 78" tall to ride.*

A high-speed, floorless looping roller coaster which turns Riders upside down four times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: At minimum, Guests must have at least one functioning arm including a hand and two legs, or two functioning arms including a hand and two leg amputations below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, Guests with certain amputations may be able to

ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

Siren's Curse™ 5

*Guests must be between 48" **and** 80" tall to ride.*

A high-speed tilt roller coaster featuring a tunnel. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. The shoulder harness must be in firm contact with the body. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand(excluding prosthesis) with gripping force and two functioning legs that include feet. Prostheses are not permitted on this ride. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast are not permitted to ride. Guests with a visual or hearing impairment must ride with a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride

restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or placed in lockers for storage.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

WARNING: This ride requires Guests to pass through metal detection prior to being allowed on the loading platform.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

Sky Fighters 2 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Hand-held infants are not permitted. Maximum Weight – 100 lb per jet

A kiddie ride with jets that rise in the air.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Skyhawk 5

Guests must be 48" tall to ride.

A high-speed ride featuring two giant swinging arms with 20 seats on each arm. Riders will be pushed towards the sky and experience weightlessness as they reverse direction.

Restraint System: An individual lap bar with safety belt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a

normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests with any leg prosthesis must consult with Guest Services or Frontier Town Guest Services prior to waiting in line or riding. Guests with any leg prosthesis devices at or above the knee are prohibited from riding.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

Note: The manufacturer prohibits Guests with a fear of heights from riding Skyhawk.

Sky Ride 3

*Guests must be 48" tall to ride alone **or** be accompanied by a Supervising Companion.*

Maximum Weight – 660 lb. per cabin

A cable car ride with gondolas suspended from an overhead moving cable.

Restraint System: A door with a safety lock secures the ride unit to secure the Riders.

Rider Criteria: Guests must have at least one functioning arm with a minimum of two functioning extremities. Hand-held infants and Guests who do not have appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Guests will have to walk up the stairs to a second story platform, take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Wheelchairs cannot be accommodated in the gondolas, and must be left at the bottom of the exit stairs. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

SlingShot 5

*Guests must be between 44" tall **and** 79" tall to ride.*

Minimum Weight – 110 lb. per launch; single Riders are not permitted.

A two-person capsule that is attached to steel cables and propels Riders in the air. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces/directions.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below knee. Leg prostheses are not permitted on this ride. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Note: This is an extra-charge attraction.

SNOOPY'S™ Deep Sea Divers 2

in Planet SNOOPY™

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per row; this ride only accommodates three adults per row.

PEANUTS™ themed submarine with six rows that seats four Riders per row. The submarine rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg. Guests who

do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

SNOOPY'S™ Express Railroad 1

in Planet SNOOPY™

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 880 lb. per car; only accommodates two adults per uncovered car.

PEANUTS™ themed kiddie train ride featuring five rail cars on a figure eight railroad track.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. Adults may only ride in the uncovered cars.

Rider Criteria: Guests must have sufficient lower extremities to maintain the proper riding position. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Service animals are permitted to ride. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

SNOOPY'S™ Space Race 2 *in Planet SNOOPY™*

*Guests must be between 36" tall **and** 54" tall to ride.*

Maximum Weight – 220 lb. per ride unit

PEANUTS™ themed children's space ship ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or any leg cast (foot, lower, full, etc) are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Space Age 1 *in Kiddy Kingdom*

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A kiddie circular ride with spaceship ride units.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Steel Vengeance® 5

Guests must be 52" tall to ride.

A thrilling hybrid coaster that has a wood frame and steel track turning Riders upside down four times. Riders will experience high speeds, weightlessness, and rapid movement from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs that include feet. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full, etc) are not permitted on this ride. Prosthesis are not permitted on this ride. Guests with any prosthesis must consult with Guest Services or Frontier Town Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an associate if you wish to use that row. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb.Please use the phone at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or placed in lockers for storage.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: This ride utilizes magnetic systems.

WARNING: This ride requires Guests to pass through metal detection prior to being allowed on the loading platform.

WARNING: This ride contains strobe lighting.

Super Himalaya 3

*Guests must be 52" tall to ride alone **or** accompanied by a Supervising Companion. Guests over 78" tall not permitted. Hand-held infants are not permitted.*

Maximum Weight – 495 lb. per car

This is a circular ride where cars move up and down on a rotating table. Riders will experience acceleration and side-to-side movement.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The larger Rider must sit on the outside of seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping into

and out of a steeply inclined ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Thunder Canyon 4

Guests must be 46" tall to ride.

A water ride where Riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available to the right of the ride's exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

Note: Loose articles, including footwear, may not be left on the platform. All loose articles must be brought onboard the raft with Riders. These items will get wet. Please consider leaving loose articles with a non-Rider.

Note: Rafts may bump into the side of channel and other rafts.

WARNING: You will get wet on this ride.

Top Thrill 2™ 5

Guests must be 52" tall to ride.

A high-speed, triple-launch strata roller coaster. Riders will experience weightlessness, strong positive and negative forces, and rapid movements from side-to-side.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis. The lap bar must be in firm contact with the pelvis and muscular parts of the thighs. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guest must have three functioning extremities that includes one functioning arm with a hand. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guest must be seated in ADA vehicle. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests with a visual or hearing impairment must ride with a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own and be capable of stepping up and over the ride unit. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Loose articles are not permitted past entrance. They may either be left with a non-rider or be placed in lockers for storage.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

Note: Loose fitting shoes without a strap or back are not permitted past entrance.

WARNING: This ride requires Guests to pass through metal detection prior to being allowed to enter the line.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

Troika 3

*Guests must be 54" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 330 lb. per car

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride's main clockwise rotation.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The larger Rider must sit on the outside of seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of

one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Valravn® 5

Guests must be 52" tall to ride.

A high-speed, floorless looping dive roller coaster which turns Riders upside down three times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: At minimum, Guests must have at least one functioning arm including a hand and two legs, or two functioning arms including a hand and two leg amputations below the knee. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. A transfer device is available upon request, which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride

restraints for support while entering and exiting, as they will shift. An elevator is available to transport Guests from the exit to the ride platform.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: This ride utilizes magnetic systems.

WARNING: This ride contains strobe lighting.

Wave Swinger 3

Guests must be 48" tall to ride.

Maximum Weight – 230 lb. per Rider

A chair swing ride with free-hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted on this ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Wilderness Run 2 *in Camp SNOOPY™*

Guests must be 36" tall to ride alone. Guests over 54" tall must be accompanied by a child. This ride only accommodates one Rider over 54" tall per car.

A junior steel rollercoaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Please signal the Attendant at the exit to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

WARNING: This ride contains strobe lighting.

Wild Mouse 4

*Guests must be 48" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 1200 lb. per car

A steel roller coaster with cars that traverse a steel track while rotating freely 360 degrees. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guest must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with a visual or hearing impairment must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row

with a larger opening is available upon request. Please inform an associate if you wish to use that row. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems.

WindSeeker 4

Guests must be 52" tall to ride.

Maximum Weight – 304 lb. per Rider

A chair swing ride that, while spreading its arms, swings Riders in a circular motion at a 45 degree angle at speeds up to 30 miles per hour as the swings climb the tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: At minimum, Guests must have at least one functioning arm and two leg amputations below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services or Frontier Town Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock's Airmail 2 *in Camp SNOOPY™*

*Guests must be between 36" tall **and** 54" tall to ride.*

Maximum Weight – 400 lb. per ride

PEANUTS™ themed children's ride that hoists Riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs. Guests with any prosthesis must consult with Guest Services or Frontier Town Guest Services prior to waiting in line or riding.

Guests may ride with one leg amputation, amputation must be below the knee. Guests with the leg amputation must be at least 42" tall to ride. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Woodstock Express 4 *in Camp SNOOPY™*

*Guests must be 48" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 300 lb. per car

A PEANUTS™ themed junior steel rollercoaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. The smaller Rider should sit on the inside of the car. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock's Whirlybirds 2 *in Planet SNOOPY™*

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per car; this ride only accommodates one adult per car.

This is a PEANUTS™ themed family tea cup spinning ride that travels a circular path where the Riders can spin their own cars.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

ENTERTAINMENT

Due to the popularity of our shows, we suggest that you arrive early, as seating may be limited. Show schedules are available on the Cedar Point mobile app.

All entertainment venues are accessible to Guests who are mobility impaired. Large print scripts may also be available. Ask any associate at the venue for assistance.

HALLOWEEKENDS DAYTIME EVENT

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions or services offered visit Guest Services.

HALLOWEEKENDS®

HalloWeekends at Cedar Point has extreme attractions that are designed to scare and startle. During this event, the park and certain attractions will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, a history of seizures or epilepsy, sensitivities to latex, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Characters in our HalloWeekends attractions will not touch you; please do not touch them in any manner. Guests who do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access may be available. Please visit Guest Services for more information. Service animals are welcome to attend HalloWeekends events. They are permitted to walk through the park areas, including scare zones. Please adhere to all posted and verbal warnings and directions.

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept these risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations; Cedar Point does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, **do not ride**.

All restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened, and tightened properly to allow Guests to ride.

Information in this guide is subject to change.
