Kings Island®

GUEST ACCESSIBILITY GUIDE

Welcome to Kings Island!

We are glad you are here! At Kings Island, we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment and we want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back, or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices, or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Ride Operators to help accommodate you.

PLEASE RIDE SAFELY

Under the Ohio Revised Code Section 993.08

Riders must obey all warnings and directions regarding amusement park rides and behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is a misdemeanor.

This includes people who are behaving in an unruly fashion or giving the indication of being under the influence of alcohol or chemical intoxicants.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Kings Island. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **do not ride.**

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **For your safety, do not enter an unauthorized area for any reason.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper rider positioning until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry, and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Kings Island is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone, or electronic usage while riding is prohibited.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Kings Island.

RIDE RATING SYSTEM

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	Rides that are generally calm and gentle in nature.
Mild Thrill Rides	2	Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	3	Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	4	Rides that generally have medium to high-speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction, and/or elevation.
Aggressive Thrill Rides	5	Rides that generally have one or more of the following: high-speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below:

 This symbol is used to identify rides where the Riders may remain in their wheelchair. These rides include: Eiffel Tower and Kings Island and Miami Valley Railroad.

 This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

 This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Kings Island uses the following terms:

 **Ability to hold on or Brace:** Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

 **Hand-held Infants:** Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Boo Blasters on Boo Hill, Eiffel Tower, Grand Carousel (seated on a bench), Kings Island and Miami Valley Railroad, Character Carousel (seated on a bench), Splash River, Coconut Cove, Bluegill Lagoon, and Tadpool. Participation or water depth may be restricted at Breakers Bay and Tidal Wave Bay. Hand-held infants and their Supervising Companion may also enjoy Splash Landing, but may not participate on the elevated sections of the attractions.

 **Supervising Companion:** Many of our rides have height requirements that allow a Guest under that requirement to ride with a Supervising Companion. A Supervising Companion is a companion who is at least 54" in height and at least 14 years of age, who meets all other criteria for riding, and who will assist their companion in complying with safe participation instructions. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines, and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride Kings Island and Miami Valley Railroad, Eiffel Tower, Grand Carousel, Character Carousel, Boo Blasters on Boo Hill, and Franklin's Flyers, and participate in the Riverbank Slide Out Pool, Breakers Bay, Tadpool, Coconut Cove, Bluegill Lagoon, Splash Landing – Play Structure, Splash River, and Tidal Wave Bay in Soak City.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be officially measured at one of the height measurement stations located at Information Center (just inside the front gate) and in PLANET SNOOPY™ near SNOOPY™ vs. Red Baron. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height-measuring device may be used during the height-measuring process. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, a shoe which does not contribute excessively to the Guest's height is required. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Kings Island reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

In Soak City, height measurements are taken in bare feet. (There is a separate height wristband system for Soak City).

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Guest Services upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services Associate will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request reasonable accommodations are encouraged to obtain the IBCCES Accessibility Card (IAC) by registering at **accessibilitycard.org** or via the Accessibility Card mobile app. Once a Guest has filled out the online application and uploaded necessary documentation into a secure online portal, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to Guest Services upon their arrival at the park to express their accommodation needs. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services associate will provide the details needed to participate in the program.

Note: Only IBCCES can issue the IBCCES Accessibility Card, and not Kings Island.

CASTS AND BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on most slides in Soak City.

The following chart displays the cast and brace rules for all rides and attractions.

- **C** Must ride in chariot
- **F** Cast/brace must fit safely inside ride unit
- **O** Not permitted to participate on elevated activity area
- **Y** May ride with the condition
- **Z** Participation or water depth may be restricted if necessary

PROSTHETICS

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit designated park locations for assistance before riding to ensure a safe experience.

Guests with prosthetics are advised to consult with the Kings Island Supervisory Team for guidance during their visit.

The manufacturer of Drop Tower requires that Guests with prosthetic devices provide Kings Island with documentation from the provider of the prosthetic devices to guarantee that the device has been designed to remain securely in place when exceeding a maximum speed of 120 miles per hour with maximum G forces from -1.5 G's to 5 G's, with sufficient safety factor for a single point failure item.

Additional lists are available for:

- Rides where prosthetics are not permitted or have specific limitations: Guest with any type of leg prosthesis are not permitted to ride Banshee, Delirium, Diamondback, Invertigo, or Orion. Guests with any type of prosthesis are not permitted to ride Flight of Fear.
- Rides requiring additional documentation: Drop Tower.

RIDE DEVICES

Guests with disabilities may be eligible to ride select attractions using a body harness provided by the park. Guests should visit designated park locations for assistance and to determine eligibility.

For safety reasons, certain attractions may require the removal of medical devices or prosthetics that are not securely fastened to the rider's body. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

On rides equipped with removable seats, Guests using wheelchairs may transfer directly to the ride vehicle. Ride attendants and Guest service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Additional lists are available for:

- Transfer devices, when requested, can be used to assist a Guest out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Banshee, Beast, Racer, Mystic Timbers, The Bat, and Woodstock Express.
- Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Banshee, Diamondback, and Orion.
- Specific ride vehicles are equipped with removable sides at Queen City Stunt Coaster and SNOOPY'S™ Soap Box Racers. These vehicles may further assist Riders in transferring from their wheelchair to the ride unit. Please inform an Associate at the ride if you wish to use that vehicle.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride Attendant or Guest Relations Team Member/Associate.

ADDITIONAL INFORMATION

Our goal is to make Kings Island as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Family Services
Family Care Center for Guests to feed young children is located across from the International Showplace. Baby changing areas and a companion restroom can be found in most restrooms. Please feel free to ask an Associate for directions to these locations or review a park map.

First Aid
Our First Aid Building located in PLANET SNOOPY™(adjacent to Charlie Brown's Wind Up) is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. In addition, a First Aid Building is located in Soak City near the Train Station. This location is open during Soak City operating hours. Emergency medical care is available for overnight Guests.

Hearing Needs
If you require American Sign Language (ASL) interpreting services, we can provide them with at least one week advance notice for live show venues, and/or to accompany you for the day. Additionally, show scripts or score sheets can also be requested at each venue. To arrange ASL services, please submit a request at **visitkingsisland.com/accessibility/sign-language-interpretation**.

Parking

Accessible parking is available on a first-come, first-served basis within the main parking lots of the park. When you arrive at the parking toll booths, ask an Associate for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask an Associate for directions to additional parking areas.

Large Print Guides

Print versions of the Park Guide and Guest Assistance Guide are available at Guest Services. Large print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Restrooms

Private restroom facilities for Guest needing the assistance of another Guest are available at all restroom locations throughout the park, including First Aid. Wheelchair accessible stalls are located at all restrooms. Adult changing tables are located at the Family Care Center, near the Coconut Cove restroom, and the following family restrooms: inside Front Gate, Queen City Stunt Coaster, Invertigo, and Banshee.

Rider Swap

The Rider Swap program allows one adult to stay with non-Riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services.

Service Animals

Service animals are welcome at Kings Island. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be housebroken, controlled with a restraining device, display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or Associate will be directed to remove the animal from the park. There is a limit of one service animal per Guest.

Due to the nature of most rides, service animals must remain with a non-Riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on Boo Blasters on Boo Hill, Eiffel Tower, Kings Island and Miami Valley Railroad, Grand Carousel, Kings Mills Antique Autos, Sally's Sea Plane, and SNOOPY'S™ Junction. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. They may also attend the performances at The Festhaus, The Kings Island Theater, PEANUTS™ Showplace, The Bandstand, and The International Showplace. Service animals are not permitted in water attractions, wet decks, wading pools, or lazy rivers. They are permitted to walk through the park areas, including scare zones. Visit Guest Services for more information. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information

A Service Animal Relief Area is located in the grassy area next to Queen City Stunt Coaster and in Soak City by the restrooms near Tropical Plunge. Owners are responsible for disposing of their animal's waste. Please look for this designated sign:

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles
A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at the Rental Center on the left, just inside the front gate. Online reservations are available for wheelchair/ECV rentals in advance of your visit. Reservations can be made by going to **visitkingsisland.com** and visit the rentals page under the Tickets tab. Rentals are also available at the park while supplies last.

Wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park Associate will be happy to provide any assistance you may need at that time. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park. Manual Wheelchairs are available at ride locations with Wheelchair Lifts if weight exceeds the max capacity of 750 lb.

GUESTS USING WHEELCHAIRS AND ECV'S

Guests who choose to use a wheelchair or ECV, we require a safe speed be maintained while traveling in the park. Wheelchairs and ECV's cannot be accommodated on most rides and attractions, with the exception of Kings Island and Miami Valley Railroad and the Eiffel Tower. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information. For information on water wheelchairs in the waterpark, please see the Water Wheelchair and Pool Lifts section.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A wheelchair lift is available at Banshee, Mystic Timbers, and Orion to transport a Guest in a wheelchair to our 2nd story ride platform. Please use the call button at base of lift to request service. Manual wheelchairs are available at all locations with a wheelchair lift if weight exceeds the max posted capacity. If an ECV has attachments to the vehicle which could impede with the operation of a lift or with safe lift ingress and egress, please transfer to manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask an Associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Kings Island personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. In Soak City, Guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF A LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on: Banshee, Diamondback, Drop Tower, Flight of Fear, Racer, Beast, and Orion.

Maximum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrances of: Banshee, Diamondback, Delirium, and Orion.

The manufacturer requires a maximum Guest height on the following rides: 76" (Delirium, Woodstock's Air Rail), 78" (Banshee, Invertigo) and 80" (Drop Tower).

LOOSE ARTICLES

Most rides cannot accommodate loose articles including jewelry, cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Kings Island is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body.

On Banshee, Flight of Fear, Mystic Timbers, and Orion, loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line and must be stored in a locker or with a non-Rider.

For safety reasons, cell phone usage, taking pictures, and filming on rides are prohibited.

Glasses must be secured on all rides. On Congo Falls, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see an Associate for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Kings Island are turned in to our Lost & Found located at the Main Gate near the ticket windows. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported at **visitkingsisland.com/lost-and-found**.

For your safety, do not enter unauthorized areas to retrieve lost articles. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnetics are used at the following attractions: Queen City Stunt Coaster, Banshee, The Beast, Diamondback, Drop Tower, Flight of Fear, Mystic Timbers, Orion, and SNOOPY'S™ Soap Box Racers. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: Boo Blasters on Boo Hill, Grand Carousel, Character Carousel, Eiffel Tower, Kings Island and Miami Valley Railroad, Woodstock Whirlybirds, and SNOOPY'S™ Junction. The tank must fit safely in the ride unit and not interfere with the ride restraint system.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the restraint mechanism to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects, including but not limited to: haze and other atmospheric effects; scents; areas of low lighting; loud music; sound effects; strobe lighting; and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions. Attractions utilizing these effects include: Banshee; The Beast; Boo Blasters on Boo Hill; Charlie Brown's Rushing River Log Ride; Diamondback; Flight of Fear; The Great Pumpkin Coaster; Mystic Timbers; Orion; SNOOPY'S™ Soap Box Racers; Woodstock's Air Rail; and Woodstock Express. Strobe lighting is also used during night operation at Eiffel Tower, Franklin's Flyers, Scrambler, Shake Rattle & Roll, and WindSeeker.

PROPER ATTIRE

For the safety and enjoyment of our guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride with shirts, shorts/pants, and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. On Queen City Stunt Coaster, Diamondback, Flight of Fear, and Orion, scarves must be completely removed. Loose fitting shoes may only be removed before riding Invertigo, Drop Tower, Delirium, Banshee, Zephyr, WindSeeker, and Woodstock's Air Rail.

Swimwear is not permitted on rides outside of Soak City with the exception of Charlie Brown's Rushing River Log Ride, Congo Falls, and White Water Canyon. Swimwear is required to be appropriate. Thongs or transparent clothing are not permitted.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary. The evaluation of each attraction considered the following criteria:

Independent seated postural.
The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck, and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.
The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.
Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to hold on with two functioning arms.
Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to brace self with one functioning leg.
Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to brace self with two functioning legs.
Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Minimum of two functioning extremities.
Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.
Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.
Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.
Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our Associates and Guests, Associates are instructed not to perform any lifting of Guests.

Appropriate observed behavior:
Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest requirements. Appropriate observed behavior may include, but not be limited to, maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment, and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Adventure Express 5

Guests must be 48" tall to ride.

A high-speed wood and steel roller coaster with a combination of banked turns and tunnels.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Banshee 5

*Guests must be between 52" tall **and** 78" tall to ride.*

The world's longest inverted roller coaster is a high-speed ride that will take Riders through seven inversions at speeds up to 68 miles per hour.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guest must have the ability to hold on with one functioning arm that includes a hand. Two functioning arms including hands are sufficient if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Must have sufficient lower extremities to ensure the ride restraint system adequately restraints them. Both legs must include the knee. Legs may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted on the ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restraints them. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport Guests from the exit to the ride platform. Please use the button at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

WARNING: This ride contains strobe lighting. This ride utilizes magnetic systems during the ride.

The Bat 4

Guests must be 42" tall to ride.

A suspended steel roller coaster with a combination of high-speed banked turns. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Please do not use the ride restraints for support while entering and exiting, as they will shift.

The Beast 5

Guests must be 48" tall to ride.

A high-speed wooden roller coaster with a combination of banked turns and tunnels.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities. Guest must be able to hold on with one functioning arm. Guest must be able to brace self with one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting. This ride utilizes magnetic systems during the ride.

Boo Blasters on Boo Hill 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Service animals are welcome.*

A family themed interactive dark ride. Riders will enter a moving car that can seat up to five total Riders (no more than 3 adults per car). They will use a special weapon called a Boo Blaster to zap Boocifer and several other skeletons and ghosts to accumulate points.

Restraint System: A door closes on the ride unit to secure all Riders.

Rider Criteria: Guests who do not have seated postural control, the ability to enter or exit the ride safely, or cannot demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps along a moving turntable, on their own or with the assistance of a companion. Please do not use the door of the unit for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting. Attraction is designed to scare or startle.

Cargo Loco 3

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Manually rotated barrels mounted on multiple rotating sections, which produce strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A door closes on the ride unit to secure all Riders.

Rider Criteria: Guests must have a minimum of two functioning extremity. Guests must be able to hold on with one functioning arm that includes a hand (excluding prosthesis). Guests must be able to brace self with one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, broken collar bone, or braced arm casts are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform.

Character Carousel 1

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants must ride in a chariot. Guest over 60" tall are not permitted to ride on a jumper horse.*

Maximum Weight – 300 lb. per animal; 670 lb. per chariot

A classic carousel with both stationary and jumper horses, as well as two chariots.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit or do not have the ability to hold on with one functioning arm must be seated in a chariot unit. Guests who do not have independent seated postural control, an appropriate center of gravity, or appropriate observed behavior must ride in a chariot with a Supervising Companion. Guests with a full leg cast must be seated in a chariot.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, are permitted to ride on the ride platform or chariots.

Charlie Brown's Rushing River Log Ride 4

*Guests must be 46" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

This is a water flume ride; Riders may get wet. Riders will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Riders must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Rider is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

WARNING: Boats may bump into the side of channel and other boats. This ride contains strobe lighting.

Charlie Brown's Wind Up 1

*Guests must be between 36" tall **and** 54" tall to ride.*

A child-size chair swing with free-hanging seats suspended from a gently rotating tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

Congo Falls 4

Guests must be 46" tall to ride.

This is a water flume ride with boats that rock side-to-side and plunge down a chute into a splash of water. You will get wet.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Watch your step, as the ride unit may be slippery and wet.

WARNING: Boats may bump into the side of channel and other boats.

Delirium 5

*Guests must be between 52" tall **and** 76" tall to ride.*

A thrill ride that swings in a pendulum motion while spinning in a clockwise rotation. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Leg prosthetics are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Diamondback 5

Guests must be 54" tall to ride.

A high-speed steel roller coaster with a combination of banked turns and airtime hills.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guest must be able to hold on with one functioning arm that includes a hand. Guest must have two legs that include a foot. Required lower extremities may be paralyzed. Two functioning arms including hands are sufficient instead of two legs with feet as long as amputations are below the ankle. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics at or above the ankle are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting. This ride utilizes magnetic systems during the ride.

Dodgem 4

Guests must be 48" tall to ride.

A bumper car ride where Riders drive cars around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual shoulder strap is positioned across the chest and under the arm of each Rider.

Rider Criteria: Guests must have a minimum of three functioning extremities to drive. Passengers must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Drop Tower 4

*Guests must be between 48" tall **and** 80" tall to ride.*

A free-fall ride that lifts Riders to the top of a structure and drops them. Riders will experience weightlessness and rapidly changing forces.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restraints him/her and a minimum of two functioning extremities with one functioning arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Guests will have to go up several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.

Eiffel Tower 2

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Service animals are welcome.*

One-third scale replica of the Eiffel Tower located in Paris. Standing 314 feet, this observation tower provides stunning views of the park and surrounding area.

Rider Criteria: Guests who are unable to enter and exit safely or demonstrate appropriate observed behavior, must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the attraction exit. This attraction is wheelchair accessible.

WARNING: During night operation this ride contains strobe lighting.

Flight of Fear 5

Guests must be 54" tall to ride.

An indoor steel roller coaster that launches Riders to 54 miles per hour and turns Riders upside down four times. Riders will experience high-speeds, weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the ankles. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride. Guests with any type of prosthesis or leg amputation are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests should go straight into the station and wait for assistance there. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Loose articles may not be left on the platform. They may either be left with a non-Guest or be placed in lockers for storage.

WARNING: This ride contains strobe lighting. This ride utilizes magnetic systems during the ride.

Franklin's Flyers 3

*Guests must be 44" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 340 lb. per car

Riders ride in suspended cars that rotate in a circle. Once the ride's speed increases, Riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: During night operation this ride contains strobe lighting.

Grand Carousel 1

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.*

A classic carousel with both stationary and jumper horses, as well as two chariots.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit or do not have the ability to hold on with one functioning arm must be seated in a chariot unit. Guests who do not have independent seated postural control, an appropriate center of gravity, or appropriate observed behavior must ride in a chariot with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, are permitted to ride on the ride platform or chariots.

Invertigo 3

*Guests must be between 54" tall **and** 78" tall to ride.*

An inverted looping roller coaster that turns Riders upside down 3 times both forward and backward. Riders will experience high-speeds, weightlessness, and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities. Guest must be able to hold on with one functioning arm. Guests must have 2 legs, of which only the feet may be missing or a minimum of 1 natural leg including (partial) foot and one upper leg which extends to the end of the seat is required. The required lower extremities may be paralyzed. Leg Prosthesis must be removed to ride. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can insure the device is properly secured and will remain in place during the ride. Leg and/or foot prosthetics are not permitted on this ride. Guests with any prosthesis must consult with Guest Services or speak with a Ride Operations supervisor prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Joe Cool's Dodgem School 2

Guests must be less than 54" tall to ride. Hand-held infants are not permitted.

A children's bumper car ride where Riders maneuver their own car. Riders will experience strong side-to- side movement and rapidly changing forces and direction.

Restraint System: An individual shoulder strap is positioned across the chest and under the arm of each Rider.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Kings Island and Miami Valley Railroad 1

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Guests less than 46" tall must sit in the center of the bench.*

Authentic steam-powered engine takes passengers around a track that makes stops in Rivertown and Soak City. Riders are seated on a bench.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a Supervising Companion.

Rider Access: Alternate Access is available at the attraction exit. This attraction is wheelchair accessible. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Kings Mills Antique Autos 2

*Guests must be 48" tall to drive **or** accompanied by a Supervising Companion to ride. Hand-held infants are not permitted.*

This is an antique styled gas-powered car that is driven by the Rider on a designated track.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests who are not able to steer and depress the accelerator must have a Supervising Companion accompany them to drive. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the back seat. Guests with a cervical collar or neck brace are not permitted to ride. Guests with a visual impairment must ride with a Supervising Companion who meets the requirements to drive.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Note: Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

Kite Eating Tree 3

*Guests must be 42" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 990 lb. per side. This ride only accommodates two adults per side.

This is a family tower ride where Riders are propelled to the top and bounce down to the platform. Riders will experience weightlessness and rapidly changing forces and directions.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Linus' Beetle Bugs 2

*Guests must be between 36" tall **and** 54" tall to ride*

This children's ride allows Riders to ride in their own car that whips around an oblong track.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Linus Launcher 3

*Guests must be 42" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 275 lb. per unit. This ride only accommodates one adult per vehicle.

A circular ride where Riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A cage secures Riders across the back, shoulders and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Monster 3

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. No hand-held infants.*

Maximum Weight – 400 lb. per car

A circular ride with pods that spin on arms that move in a clockwise motion while also moving up and down.

Restraint Type: An enclosed ride unit encapsulates the ride unit to secure the Riders. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Mystic Timbers 5

Guests must be 48" tall to ride.

A high-speed wooden roller coaster with high-speed airtime humps, quick turns, and enclosed tunnels.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities. Guest must be able to hold on with one functioning arm. Guest must be able to brace self with one functioning leg excluding prostheses; the other leg must be amputated below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. A wheelchair lift is available to transport guests from the exit to the ride platform. Please use the intercom at the base of the lift to request assistance. Limit one Guest in wheelchair and one companion in lift at a time.

WARNING: This ride contains strobe lighting. This ride utilizes magnetic systems during the ride.

Orion 5

Guests must be 54" tall to ride.

A high-speed steel giga coaster that drops Riders to a maximum depth of 300 feet, reaching speeds up to 91 miles per hour. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guest must be able to hold on with one functioning arm that includes a hand. Guest must have two legs that include a foot. Required lower extremities may be paralyzed. Two functioning arms including hands are sufficient instead of two legs with feet as long as amputations are below the ankle. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics at or above the ankle are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. A wheelchair lift is available to transport Guests to the ride platform. Please use the button at the exit to receive operator assistance.

Note: Loose articles may not be left on the platform. They may either be left with a non-Guest or be placed in lockers for storage.

WARNING: This ride contains strobe lighting. This ride utilizes magnetic systems during the ride.

PEANUTS™ 500 1

Guests must be less than 54" tall to ride. Hand-held infants are not permitted.

This is a slow-moving children's car ride.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

PEANUTS™ Off-Road Rally 1

Guests must be less than 54" tall to ride. Hand-held infants are not permitted.

This is a slow-moving circular children's ride.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains him/her and a minimum of two functioning extremities with one functioning arm. Two functioning legs are sufficient instead of one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride ride unit.

Queen City Stunt Coaster 5

Guests must be 48" tall to ride.

Maximum Weight – 300 lb. per Rider

A steel LIM roller coaster that launches Riders up to 40 miles per hour in 4 seconds. Riders will experience high-speeds, weightlessness, rapid movements from side-to-side, and a tunnel.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis, and additional padding constrains both legs across the ankles. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an Associate if you wish to use that row. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.

The Racer 4

Guests must be 48" tall to ride.

A wooden roller coaster with large drops, banked turns, and airtime hills.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities. Guest must be able to hold on with one functioning arm. Guest must be able to brace self with one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Sally's Sea Plane 2

*Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per row

PEANUTS™ themed sea plane with six rows.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Scrambler 3

*Guests must be 48" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 510 lb. per car

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities. Guest must be able to hold on with one functioning arm. Guest must be able to brace self with one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: During night operation this ride contains strobe lighting.

Shake, Rattle and Roll 3

*Guests must be 54" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

Maximum weight – 330 lb. per car

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride's main clockwise rotation. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

Restraint System: A shared lap bar is positioned above the laps of all Riders int he row. An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: During night operation this ride contains strobe lighting.

SNOOPY™ vs. Red Baron 2

*Guests must be between 36" tall **and** 54" tall to ride*

A slow-moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

SNOOPY'S™ Junction 1

*Guests must be 40" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

This is a slow-moving miniature train ride.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

SNOOPY'S™ Soap Box Racers

*Guest must be 48" tall **or** 38" tall **and** accompanied by a Supervising Companion to ride.*

A family boomerang roller coaster that sends riders both forward and backward. Riders will experience high speeds and rapid movements from side to side.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guest must be able to hold on with one functioning arm (excluding prosthesis). Guest must have at least one leg that may be paralyzed (excluding prosthesis). Two natural legs with amputations extending to the end of the seats is sufficient instead of one leg. The required lower extremities may be paralyzed Guests with a cervical collar, neck brace, full leg cast are not permitted to ride. Braced arm cast must fit safely in ride unit. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A specific ride vehicle at this attraction is equipped with a removable side which may assist a Guest in transferring from their wheelchair to the ride unit. Please inform an associate if you wish to use that vehicle. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems during the ride.

SNOOPY'S™ Space Buggies 2

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 382 lb. per car; this ride only accommodates one adult per car.

Space vehicles that jump up and down while rotating around a circular track.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities. Guest must be able to hold on with one functioning arm with a hand (excluding prosthesis). Guest must be able to brace self with one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Sol Spin 4

Guests must be 48" all to ride.

Maximum Weight – 300 lb. per seat

A spinning thrill ride where gondolas quickly increase in speed from a horizontal position to a vertical position, thereby turning Riders upside down. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest.

Rider Criteria: Guest must be able to hold on with one functioning arm. Guest may have two leg amputations. One leg amputation must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Prosthetics are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves into the seat.

WARNING: Please use caution when entering and exiting as the ride unit may shift.

Surf Dog 4

*Guests must be 48" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

A family thrill ride where a 36-passenger gondola spins as it travels on a track. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces and directions.

Restraint System: A shared lap bar secures all Riders in the row. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Arm casts must not be positioned next to another Guest.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

The Great Pumpkin Coaster 2

Guest must be 36" tall to ride.

A junior steel rollercoaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar and individual seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Viking Fury 3

*Guests must be 48" tall to ride alone **or** 40" tall **and** accompanied by a Supervising Companion.*

A ship ride that swings in a pendulum motion. Riders will experience weightlessness and rapidly changing forces and direction.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis. Riders under 48" tall must sit on the inside of the row.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

White Water Canyon 4

Guests must be 46" tall to ride.

A family water ride where Riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

CAUTION: Boats may bump into the side of channel and other boats.

Note: Guests will get wet.

WindSeeker 4

Guests must be 52" tall to ride.

Maximum Weight – 304 lb. per car

A chair swing that spins while ascending a giant 301 foot tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guest must be able to hold on with one functioning arm. Leg amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock's Air Rail 4

*Guests must be between 44" tall **and** 76" tall to ride.*

A family suspended steel roller coaster. Riders will experience rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guest must be able to hold on with one functioning arm (excluding prosthesis). Guest must have at least one leg that may be paralyzed (excluding prosthesis). Two natural legs with amputations extending to the end of the seats is sufficient instead of one leg. The required lower extremities may be paralyzed. Leg Prosthetics not allowed. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. Guests between 44" tall and 54" tall may need to be assisted on and off the ride.

Woodstock Express 4

*Guests must be 46" tall to ride alone **or** 40" tall **and** accompanied by a Supervising Companion.*

A junior wooden rollercoaster with banked curves and airtime hills.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock Whirlybirds 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per car

This is an elevated slow-moving helicopter ride.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have at least one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behavior. Guests who do not meet these requirements must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion.

Zephyr 3

Guests must be 48" tall to ride.

Maximum Weight – 230 lb. per Rider

A chair swing family ride with free-hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

SOAK CITY WATERPARK

Each attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	This is a low speed, and or shallow water attraction.
Mild Thrill Rides	2	This is a low to medium speed attraction, and/or water depth to 48 inches. Some Rider control, maneuvering, and/or swimming skills required.
Moderate Thrill Rides	3	This is a medium speed attraction. Height and water depth may vary. Moderate or unexpected forces can be generated during the ride. This attraction may require Rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Rides	4	This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires Rider body control and strong swimming skills.
Aggressive Thrill Rides	5	This is a high-speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation, and/or deep water, which may be unexpected. This attraction requires Rider body control and swimming skills.

Appropriate Attire

Appropriate swimwear is required. Thongs and transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. Guests wearing bathing attire with metal buttons, rivets, zippers, or snaps will not be permitted to ride Paradise Plunge, Pineapple Pipeline, Riverbank Slide Out (body slides only), RiverRacers, Salamander Sliders, Splash Landing (slides only), Tropical

Plunge, and Tropical Twister. Jewelry including but not limited to, necklaces, bracelets, dangling earrings, and rings other than wedding bands are prohibited on Tropical Plunge Body Slides. Contact lenses are not recommended. Guests requiring special accommodation should speak to a member of the Aquatics Supervisory Team.

Life Jackets
Life jackets are available for all Guests. Only U.S. Coast Guard (or Canada) approved life jackets are allowed as floatation devices. Life jackets are provided free of charge for Guests who require one.

In wave pools, life jackets are required for Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Breaker's Bay and Tidal Wave Bay.

In other attractions requiring life jackets, children who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers must wear a life jacket. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Splash River.

Ongoing Lifeguard Training
In an ongoing effort to provide a safe and enjoyable waterpark experience for our Guests, Soak City routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water manikins, the use of video surveillance equipment, internal and external audits, and active/inactive water rescues and/or first aid scenarios.

Swim Diapers
Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

Water Wheelchairs and Pool Lifts
A water wheelchair is available for Guests requiring additional assistance when gaining access into Coconut Cove, Splash River (Entry Area), Tidal Wave Bay, and Breakers Bay. The water wheelchair may be used by multiple Guests on the same day. While in a/the wave pool, the water level may not exceed the height of the seat on the chair. Guests participating in a wave pool are permitted to use a personal wheelchair. Personal wheelchairs are permitted up to the seat's water depth. Guests utilizing wheelchairs will not be required to utilize a lifejacket while in the wave pool only if their height exceeds 52". Guests may choose to use a water wheelchair instead of a personal wheelchair. While using either a personal wheelchair or a water wheelchair, Guests must not utilize the wheelchair's seatbelts while in the wave pool.

Walkers, canes, or other assistive devices are permitted only at ankle depth in the following attractions Breakers Bay and Tidal Wave Bay.

During your visit, please speak to a member of our Aquatics Supervisory team to obtain access to the water wheelchair or pool lift and for further accessibility information.

WATER PARK ATTRACTIONS

The following descriptions are designed to give you information on the types of actions caused by various attractions. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriated observed behavior, and the ability to enter and exit the attraction safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each attraction. Please use caution when entering and exiting waterpark attractions as the surrounding areas may be slippery. Conveying devices such as tubes and rafts may be slippery and can shift during loading and unloading.

Bluegill Lagoon 1

Hand-held infants must be accompanied by a Supervising Companion.

Wading pool with water depths ranging from 0" – 18".

Rider Criteria: Participants must have the ability to exhibit seated postural control or be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion. Participants must demonstrate appropriate observed behavior or be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair.

Breakers Bay 4

Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers are required to wear a life jacket. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. A Supervising Companion may accompany up to two Guests.

A large wave pool with depths ranging from 0' – 6' (0 cm – 183 cm). Waves are generated for five minutes on, and then five minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water

Rider Criteria: Participants must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Participants must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held infants participation or water depth may be restricted if necessary and must be accompanied by a Supervising Companion. Participants with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for participants requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Note: Strenuous activity is required during wave action cycles which may require the ability to swim and which may result in fatigue. Exercise caution.

Note: Participants with a history of seizures – or heart or other serious medical conditions – should be supervised by someone who knows how to swim and how to provide emergency assistance.

Coconut Cove 1

Hand-held infants must be accompanied by a Supervising Companion.

Wading pool up to 36" deep with seating area and waterfall.

Rider Criteria: Participants must demonstrate appropriate observed behavior; exhibit seated postural control or be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for participants requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Mondo Monsoon 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight — 700 lb. per tube

Cloverleaf tubes take Riders twisting and turning into complete darkness before dropping 60 feet into an open funnel. The tube will slide back and forth in the funnel before landing in an 18" catch pool.

Rider Criteria: Guests must be seated in the tube with feet in the middle, facing forward, sitting up straight, and holding onto both handles. Guests must hold handles throughout the entire ride. Minimum two Riders; maximum four Riders. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, or lower leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Note: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

Paradise Plunge 4

Guests must be 48" tall in bare feet to ride.

Maximum one Rider per slide

Slide tower contains four single-rider, serpentine body slides. Slides end in a 42" deep catch pool.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Note: T-shirts and other loose fitting clothing are not permitted. Appropriate swimwear required.

Pineapple Pipeline 3

Guests must be 48" tall in bare feet to ride.

Maximum one Rider per slide

Three fully enclosed translucent body slides. Two slides turn 360 degrees; the middle slide features a vertical drop. Slides end in a 12" deep run out.

Rider Criteria: Guests are required to maintain the proper riding position throughout the entire ride – slide on your back, feet first, arms crossed over your chest, legs straight, and ankles crossed. Guests must have four functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering on their own or with the assistance of a companion.

Note: T-shirts and other loose-fitting clothing are not permitted

Rendezvous Run 4

Guests must be 40" tall in bare feet to ride.

Maximum on Rider per mat per slide

Riders slide head first on a mat down four partially enclosed mat racing flumes. Slides turn 360 degrees before descending into a 12" deep runout.

Rider Criteria: Guests are required to maintain the proper riding position throughout the entire ride – lie down head first, on stomach and hold handles. Guests must have the ability to exhibit seated postural control and have appropriate center of gravity. Guests must have the ability to hold on with two functioning arms and brace self with one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests must demonstrate appropriate observed behavior.

Rider Access: Access to the attraction requires climbing several flights of stairs with a mat. Guests will have to ascend the slide tower and be capable of safely entering the mat, on their own or with the assistance of a companion.

Riverbank Slideout – Body Slides 2

Guests must be less than 52" tall in bare feet to ride.

Two child body slides and a gang slide that empties into 24" of water.

Rider Criteria: Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Riders must have the ability to enter/exit ride within specified parameters without endangering self or others or be accompanied by a Supervising Companion.

Riverbank Slideout – Pool 2

Hand-held infants must be accompanied by a Supervising Companion.

Wading pool with water depths ranging from 0" – 24".

Rider Criteria: Guests must have the ability to exhibit seated postural control or be accompanied by a Supervising Companion. Guests must demonstrate appropriate observed behavior or be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair.

Riverbank Slideout – 2 Person Tube Slide 2

*Guests must be 36"tall in bare feet to ride **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted. Guests over 52" tall in bare feet must be accompanied by a child. At this attraction, a Supervising Companion may accompany up to one child.*

Two person tube slide that empties into 24" of water.

Rider Criteria: Guests must be seated in a tube, facing forward, and holding onto the tube handles with legs extended forward throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing a few steps. Guests will have to be capable of safely entering on their own or with the assistance of a companion.

RiverRacers 4

Guests must be 42" tall in bare feet to ride

Weight – Minimum 110lb.

Maximum Single Rider – 300lb.

Maximum Combined – 400lb.

Water coaster which propels rider's uphill using water jets. Riders participate in two person tubes. Slides end in a 12" deep runout.

Rider Criteria: Guest must sit back against the raft with feet forward, holding onto handles at all times. Smaller guest must sit in front. Guest must have a minimum of one functioning arm. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering on their own or with the assistance of a companion

Note: Loose articles are not permitted.

Salamander Sliders 2

Guests must be 36" tall in bare feet to ride.

Maximum weight – 200lb. per person

Seven child body slides that end in a 12" deep runout.

Rider Criteria: Guest must have a minimum of one functioning arm. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering on their own or with the assistance of a companion

Note: Loose articles are not permitted.

Splash Landing – Play Structure 2

Hand-held infants must be accompanied by a Supervising Companion.

Interactive water play structure with various play elements including a giant tipping bucket.

Rider Criteria: Guests who cannot maintain seated postural control must be accompanied by a Supervising Companion.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the play structure and be capable of safely entering on their own or with the assistance of a companion.

Splash Landing – Slides 2

Guests must be 36" tall in bare feet to ride.

Interactive water play structure with various play elements including a giant tipping bucket and three slides.

Rider Criteria: Guests must have the ability to exhibit seated postural control and have appropriate center of gravity. Guests must have one sufficient upper extremity to maintain the proper riding position, the ability to brace self with two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride. Hand-held infants are not permitted to ride. Guests are required to maintain the proper riding position throughout the entire ride – slide on your back, feet first, arms crossed over your chest, legs straight, and ankles crossed. Guests must demonstrate appropriate observed behavior.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the play structure and be capable of safely entering on their own or with the assistance of a companion.

Splash River 2

*Children must be 42" tall in bare feet to ride alone **or** be accompanied by a Supervising Companion. Children under 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. A Supervising Companion may accompany up to two children.*

A slow-moving, winding river tube ride at a depth of 30" with various interactive elements.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access is available via the zero depth entry. Guests will have to transfer to a tube, on their own or with the assistance of a companion.

Tadpool – Pool 1

Hand-held infants must be accompanied by a Supervising Companion.

Shallow pool with water depths ranging from 0" – 18".

Rider Criteria: Participants must have the ability to exhibit seated postural control or be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion. Participants must demonstrate appropriate observed behavior or be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair.

Tadpool – Slide 1

Children must be less than 52" tall in bare feet to ride.

A small children's slide that empties into 18" of water.

Rider Criteria: Guests must lay feet first with their arms across their chest, legs crossed at the ankles, and back flat against the slide. Guests must have a minimum of two functioning extremities. Hand-held infants are not permitted to ride. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing a few steps. Guests will have to be capable of safely entering on their own or with the assistance of a companion.

Thunder Falls 3

Guests must be 40" tall in bare feet. Guests less than 48" tall must wear a life jacket.

Individual tube ride with banked turns and drops; ends in a 42" deep catch pool.

Rider Criteria: Guests are required to maintain the proper riding position throughout the entire ride – sit facing forward and hold handle(s) in front of you. Guests must have the ability to exhibit seated postural control and have appropriate center of gravity. Guests must have the ability to hold on with one functioning arm, brace self with one functioning leg and have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Tidal Wave Bay 4

Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers are required to wear a life jacket. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. A Supervising Companion may accompany up to two Guests.

A large wave pool with depths ranging from 0' – 6' (0 cm – 183 cm). Waves are generated for five minutes on, and then five minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water

Rider Criteria: Participants must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Participants must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held Infants participation or water depth may be restricted if necessary and must be accompanied by a Supervising Companion. Participants with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for Participants requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Note: Strenuous activity is required during wave action cycles which may require the ability to swim and which may result in fatigue. Exercise caution.

Note: Participants with a history of seizures—or heart or other serious medical conditions--should be supervised by someone who knows how to swim and how to provide emergency assistance.

Tropical Plunge – Body Slides 4

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per person

Riders step into one of three chambers. The floor will drop underneath their feet, sending them on a high-speed, almost vertical free fall through a series of s-curves. Slides end in a 10" deep runout. Maximum water depth is 10".

Rider Criteria: Guests are required to maintain the proper riding position – arms crossed over their chest, legs crossed at the ankles, and head and back flat against the slide. Guests must have four functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering on their own or with the assistance of a companion.

Note: Loose articles are not permitted, including, but not limited to: piercings, necklaces, rings, and t-shirts.

Tropical Plunge – Tube Slides 1 & 2 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per person

A pair of 337-feet-long inner tube water slides at the Tropical Plunge tower that sends Riders through a variety of twists, turns, and drops going in and out of darkness before a high-speed drop ending in a 42" deep pool.

Rider Criteria: Guests are required to maintain the proper riding position – seated in the tube, facing forward, and holding onto the handles. Guests must have the ability to exhibit seated postural control and have appropriate center of gravity. Guests must have the ability to hold on with one functioning arm, brace self with one functioning leg and have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests must demonstrate appropriate observed behavior.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Tropical Plunge – Tube Slide 3 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per person

An enclosed inner tube water slide at the Tropical Plunge tower that sends Riders through a series of twists, turns, and four 360-degree spirals across a 449 foot slide ending in a 42" deep pool.

Rider Criteria: Guests are required to maintain the proper riding position – seated in the tube, facing forward, and holding onto the handles. Guests must have the ability to exhibit seated postural control and have appropriate center of gravity. Guests must have the ability to hold on with one functioning arm, brace self with one functioning leg and have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Tropical Twister ◆4

Guests must be 48" tall in bare feet to ride.

Two fully enclosed translucent body slides. Slides intertwine and end in a 12" deep runout.

Rider Criteria: Guests are required to maintain the proper riding position throughout the entire ride – slide on your back, feet first, hand behind your head and legs straight. Guests must have four functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering on their own or with the assistance of a companion.

Note: T-shirts and other loose-fitting clothing are not permitted.

Zoom Flume ◆4

Guests must be 40" tall in bare feet to ride. Children less than 42" tall in bare feet must wear a life jacket. Children less than 48" tall in bare feet must be accompanied by a Supervising Companion.

Maximum Weight – 1,200 lb. per tube

Two to four person family raft ride with banked turns and drops. Slide ends in 24" deep catch pool.

Rider Criteria: Guests are required to maintain the proper riding position throughout the entire ride – seated with back against the raft and hold onto handles. Guests must have the ability to exhibit seated postural control and have appropriate center of gravity. Guests must have the ability to hold on with one functioning arm, brace self with one functioning leg and have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, or lower leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

ENTERTAINMENT VENUES

Due to the popularity of our shows, we suggest you arrive early as seating may be limited. Show schedules are available at Guest Services, on the Kings Island mobile app, and at any theater entrance. All Entertainment venues are accessible to Guests who may have a mobility impairment. Assisted listening devices are available for Guests at each theater, who are hearing impaired. Large print scripts may also be available. Ask any Associate at the venue for assistance.

Indoor Theaters

The Festhaus

The Festhaus is a large indoor theater equipped with air conditioning. Viewing areas that can accommodate Guests in wheelchairs are available. Assisted Listening Devices are available at the Festhaus. Strollers are allowed inside this facility. Please see Theater Attendants for additional assistance.

The Kings Island Theater

The Kings Island Theater is a large indoor theater equipped with air conditioning. Viewing areas that can accommodate Guests in wheelchairs are available. Assisted Listening Devices are available at Kings Island Theater. Stroller parking is located outside the theater. Please see Theater Attendants for additional assistance.

PEANUTS™ Showplace

PEANUTS™ Showplace is a large indoor theater equipped with air conditioning. Viewing areas that can accommodate Guests in wheelchairs are available. The International Showplace

The International Showplace is an outdoor stage with bench seating. Stoller parking is located outside of the theater only. Please see a Theater/Venue Host for additional assistance. Assisted Listening Devices are available

HALLOWEEN HAUNT®

Halloween Haunt® at Kings Island has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, sensitivities to latex, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Characters in our Halloween Haunt® attractions will not touch you; please do not touch them in any manner. Guests that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access may be available. Please visit Guest Services for more information. Service animals are welcome to attend Halloween Haunt® events. They are permitted to walk through the park areas, including scare zones. Please adhere to all posted and verbal warnings and directions.

TRICKS AND TREATS

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions, or services offered, visit Guest Services.

WINTERFEST

Kings Island's Winterfest is filled with delightful holiday cheer for Guests of all ages. Many areas of the park will have low lighting, fog, snow machines, and strobe-styled lighting. Guests with a history of seizures or epilepsy should be aware of flashing and strobe styled lighting that will be present throughout the park. Please see a Guest Services representative for any additional questions.

Holly Jolly Trolley 1

*Guests must be 46" tall to ride alone **or** accompanied by a supervising companion. Guests less than 46" tall must sit in the center of the bench*

A trolley ride through Coney Mall with festive holiday music.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts/brace must fit safely inside the ride unit.

Rider Access: Alternate Access is available to the right of the ride entrance. Riders will have to take several steps, on their own or with the assistance of a Supervising Companion. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Snowflake Lake

Guests 10 years of age or younger must be accompanied by a Supervising Companion on the ice at all times.

This traditiona-styled ice skating rink allows participants to skate in a counter-clockwise direction around the ice rink. Ice skates are required for all participants to be on the ice. Speed skating, roughness, excessive speeding, or weaving through other skaters is prohibited.

Rider Criteria: Participants with cervical collar or neck braces, full arm cast, braced arm cast, or full leg cast are not permitted to participate in this attraction. Participants must have appropriate observed behavior to participate.

Rider Access: Alternate Access via the Entrance to the attraction. Participants must be able to take several steps and step on to the ice on their own or with the assistance of a companion. Participants in wheelchairs can transfer and participate with the use of a chair designed to be on the ice. Please see ice rink Associates for details. Wheelchair parking is located around the ice.

Snow Works 2

Guests must be 42" tall to ride.

This is an 18' high tubing hill.

Rider Criteria: Riders must have a minimum of three functioning extremities, including two arms. Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access via the pathway to the left of the hill. Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to be capable of safely entering the tube, on their own or with the assistance of a companion.

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept these risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations, Kings Island does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, do not ride!

All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened properly to allow Guests to ride.

Information in this guide is subject to change.
