

GUEST ACCESSIBILITY GUIDE

Welcome to Six Flags Fiesta Texas!

We are glad you are here! At Six Flags Fiesta Texas, we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment, and we want our Guests to have a safe and enjoyable day. We continuously strive to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of a larger or smaller size, Guests who have a history of heart, back, or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices, or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually Associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other Riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Associates to help accommodate you.

PLEASE RIDE SAFELY

Texas Rider Responsibility Requirements
(Occupations Code §2151.102) Riders must:

- **Obey Posted Rules:** Riders must comply with all posted rules and warnings, and follow instructions provided by ride operators.
- **Avoid Reckless Behavior:** Riders must not behave in a manner that may cause injury to themselves or others, including horseplay, standing up improperly, or intentionally rocking cars or seats.
- **Be Honest About Health Conditions:** Riders must not ride if they know of a health condition or are under the influence of drugs or alcohol that could affect their ability to safely participate.
- **Use Provided Safety Equipment:** Riders must use safety restraints and devices properly as instructed.
- **Report Injuries:** If injured on a ride, the Rider must report the injury to the operator before leaving the premises, if possible.

Texas Occupations Code § 2151.103 – Rider Responsibility:
This section states a person may not:

- (1) board or attempt to board an amusement ride when the person's behavior or physical condition would impair the person's ability to use the ride safely or obey instructions;
- (2) board or attempt to board an amusement ride except at the designated time and area;
- (3) board or dismount from an amusement ride except at the designated time and area, if any; or
- (4) engage in any reckless act or activity that may injure the person or others.

While all amusement attractions have Associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and follow all instructions provided.

In general, all Guests should be in good health and free from any conditions, known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE.**

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants, will be removed from the park without refund. **For your safety, do not enter an unauthorized area for any reason.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper Rider positioning until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry, and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Six Flags Fiesta Texas is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, taking pictures, as well as using cell phones or other electronics while riding, is prohibited.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Six Flags Fiesta Texas.

RIDE RATING SYSTEM

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	Rides that are generally calm and gentle in nature.
Mild Thrill Rides	2	Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	3	Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	4	Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction, and/or elevation.
Aggressive Thrill Rides	5	Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction, and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where Riders may remain in their wheelchair to ride. The Fiesta Texas Railroad allows Riders to remain in their wheelchair.

This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Six Flags Fiesta Texas uses the following terms:

Ability to hold on or brace: Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Hand-held Infant: Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Fiesta Texas Railroad; Grand Carousel; and METROPOLIS Transit Authority. Also, along with where water depth may be restricted: Coral Cove; Lonestar Lagoon; Paradise Cove; Splash Water Springs; and White Water Canyon.

Supervising Companion: Many of our rides have height requirements that allow a Guest under that requirement to ride with a Supervising Companion. A Supervising Companion is at least 54" in height and approximately 14 years of age, who meets all other criteria for riding, and who will assist their Companion in complying with safe participation instructions. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide, or review the safety guides and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines, and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a Rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride: Crow's Nest; Grand Carousel; Fiesta Texas Railroad; METROPOLIS Transit Authority; THE PENGUIN™ Gotham City Getaway; and participate in Coral Cove; Lonestar Lagoon; Paradise Cove; Splash Water Springs; and White Water Canyon.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction.

To accurately measure Guests, a height measuring device may be used. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, a shoe that does not contribute excessively to the Guest's height is required. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Six Flags Fiesta Texas reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

In Hurricane Harbor San Antonio, height measurements are taken in bare feet.

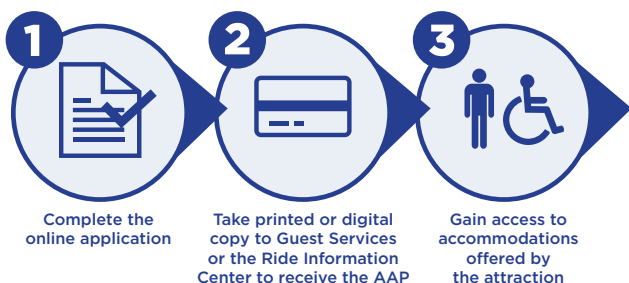

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Guest Services upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services Associate will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request reasonable accommodations are encouraged to obtain the IBCCES Accessibility Card (IAC) by registering at **accessibilitycard.org** or via the Accessibility Card mobile App. Once a Guest has filled out the online application and uploaded necessary documentation into a secure online portal, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to Guest Services upon their arrival at the park to express their accommodation needs. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Associate will provide the details needed to participate in the program.

Note: Only IBCCES can issue the IBCCES Accessibility Card, and not Six Flags Fiesta Texas.

CASTS & BRACES

Guests with casts and braces will be restricted from rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full-arm (elbow restricted) and full-leg (knee restricted) casts or braces are restricted from most rides and waterslides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on most slides in Hurricane Harbor San Antonio.

The following chart displays the cast and brace rules for all rides and attractions.

C Must ride in a chariot

F Cast/brace must fit safely in the ride unit

O Not permitted to participate on elevated activity area

Y May ride with the condition

Z Participation or water depth may be restricted if necessary

PROSTHESIS

Guests with any type of prosthesis should not ride Chupacabra, Dr. Diabolical's Cliffhanger, or SUPERMAN™ KRYPTON Coaster unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit designated park locations for assistance before riding to ensure a safe experience.

Guests with prosthetics are advised to consult with the Six Flags Fiesta Texas Supervisory Team for guidance during their visit.

Additional lists are available for:

- Rides where prosthetics are not permitted or have specific limitations: BATMAN™ The Ride; Boomerang Coast to Coast; Dare Devil Dive Flying Machines; Dr. Diabolical's Cliffhanger; Fireball; Chupacabra; Hurricane Force 5; Iron Rattler; Poltergeist; Scream!; DC™ Super-Villains Swing; SUPERGIRL™ Sky Flight; SUPERMAN™ KRYPTON Coaster; Taz's Tornado; JOKER™ Carnival of Chaos™; and WONDER WOMAN™ Golden Lasso Coaster.

RIDE DEVICES

Guests with disabilities may be eligible to ride select attractions using a body harness provided by the park. Guests should visit designated park locations for assistance and to determine eligibility.

For safety reasons, certain attractions may require the removal of medical devices or prosthetics that are not securely fastened to the Rider's body. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

On rides equipped with removable seats, Guests using wheelchairs may transfer directly to the ride vehicle. Ride attendants and Guest service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific Rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Additional lists are available for:

- Transfer devices, when requested, can be used to assist a Guest out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: BATMAN™: The Ride; CYBORG: Cyber Revolution; Dare Devil Dive Flying Machines; Dr. Diabolical's Cliffhanger; Fireball; JOKER™: Carnival of Chaos (Only a ramp, not a transfer device); METROPOLIS Transit Authority; Pirates of the Deep Sea; SHAZAM!™: Tower of Eternity; Spinsanity; and WONDER WOMAN™ Golden Lasso Coaster.
- Stabilizing devices, when requested, can be used at designated rides to prevent the ride unit from swaying during loading and unloading. These devices may further assist Riders in transferring from their wheelchair to the ride unit. The following rides are equipped with a stabilizing device: BATMAN™: The Ride; CYBORG: Cyber Revolution; Dare Devil Dive Flying Machines; Dr. Diabolical's Cliffhanger; Fireball; METROPOLIS Transit Authority; Pirates of the Deep Sea; Spinsanity; and WONDER WOMAN™ Golden Lasso Coaster.
- Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. All rides are equipped with a body harness, except for: *Bugs' White Water Rapids*; *Circuit Breaker Grand Prix – Electric Go-Karts*; *Crow's Nest*; *Fiesta Texas Railroad*; *Foghorn Leghorn's Barnyard Railway*; METROPOLIS Transit Authority; *The Gully Washer*; and *Yosemite Sam Wacky Wagons*.
- In addition, specific ride vehicles are equipped with removable sides at Fireball, METROPOLIS Transit Authority, Pirates of the Deep Sea, and Spinsanity. These vehicles may further assist Riders in transferring from their wheelchair to the ride unit. Please inform an Associate at the ride if you wish to use that vehicle.
- The rides listed below are equipped with vehicles that may further assist Riders in transferring from their wheelchair to the ride unit: BATMAN™ The Ride; CYBORG Cyber Revolution; Dare Devil Dive Flying Machines; Dr. Diabolical's Cliffhanger; METROPOLIS Transit Authority; SHAZAM!™ Tower of Eternity; and WONDER WOMAN™ Golden Lasso Coaster. These vehicles may further assist Riders in transferring from their wheelchair to the ride unit. Please inform an Associate at the ride if you wish to use that vehicle.

For additional guidance, Guests are encouraged to consult the Park Guide or speak with a Ride Attendant or Guest Relations Associate.

ADDITIONAL INFORMATION

Our goal is to make Six Flags Fiesta Texas as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large-Print Guest Accessibility Guides

Print versions of the Park Guide and Guest Accessibility Guide are available at Guest Services. Braille and large print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Family Services

A space for nursing mothers is available at Six Flags Fiesta Texas. Baby changing areas and a Companion restroom can be found in most restrooms. Please feel free to ask an Associate for directions to these locations or review a park map.

First Aid

Our First Aid Station is located in our Spassburg area behind the Grand Carousel and is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. In addition, a First Aid Station is located in Hurricane Harbor San Antonio next to our Tidal Waves Café. This location is open during Hurricane Harbor San Antonio operating hours.

Hearing Needs

If you require American Sign Language (ASL) interpreting services, we can provide them with at least two days' advance notice for live show venues, and/or to accompany you for the day. To arrange ASL services, please email sfft.disabilityservices@sixflags.com at least 48 hours prior to visit. Alternatively, you can submit your request online through sixflags.com/fiestatexas/help/contact-us.

Parking

Accessible parking is available on a first-come, first-served basis within the main parking lots of the park. When you arrive at the parking toll booths, ask an Associate for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask an Associate for directions to additional parking areas.

Printed Guides

Print versions of the Park Guide and Guest Assistance Guide are available at Guest Services. Large print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Quiet Room

Six Flags Fiesta Texas offers a Quiet Room located in our First Aid Location near the Grand Carousel and near Tidal Waves Café in Hurricane Harbor San Antonio for family members or caregivers to take a break and reduce sensory stimulation.

Restrooms

Private restroom facilities for Guests needing the assistance of a Companion are located in DC™ Universe. Wheelchair accessible stalls are located in all restrooms. For your convenience, we also have a family restroom available in DC™ Universe and First Aid.

Rider Swap

The Rider Swap program allows one adult to stay with non-Riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services, near the front of the park.

Service Animals

Service animals are welcome at Six Flags Fiesta Texas. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include: guiding people who are blind; alerting people who are deaf; pulling a wheelchair; alerting and protecting a person who is having a seizure; reminding a person with a mental illness to take prescribed medications; calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack; or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be house broken, controlled with a restraining device and display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or Associate will be directed to remove the animal from the park. There is a limit of one service animal per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on: Crow's Nest; *Daffy's* Bus Stop; Grand Carousel; Fiesta Texas Railroad; METROPOLIS Transit Authority; Pirates of the Deep Sea; POISON IVY™ Toxic Spin; and THE PENGUIN™ Gotham City Getaway. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. They may also attend the performances at all entertainment venues. Service animals are not permitted in water attractions, wet decks, wading pools, or lazy rivers. They are permitted to walk through the park areas, including scare zones. Visit Guest Services for more information. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information.

A Service Animal Relief Area is located in the grassy area next to our Picnic Grove entrance. Owners are responsible for disposing of their animal's waste. Please look for this designated sign:

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please check in at our security checkpoint if you choose to do so.

Wheelchairs & Electric Convenience Vehicles

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at our Rentals location near the front entrance of the park. However, since wheelchairs, ECVs, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own. Rentals are also available at the park while supplies last.

Wheelchairs, ECVs, and strollers may not be taken out of the park gates or to the parking lot. However, a park Associate will be happy to provide any assistance you may need at that time. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park.

GUESTS USING WHEELCHAIRS AND ECVS

A safe speed must be maintained while traveling in the park by guests who choose to use a wheelchair or ECV. Wheelchairs and ECV's cannot be accommodated on most rides and attractions, with the exception of The Fiesta Texas Railroad where one wheelchair can be accommodated. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information. For information on water wheelchairs in the waterpark, please see the Water Wheelchair and Pool Lifts section.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. An Elevator is available at METROPOLIS Transit Authority to transport a Guest in a wheelchair to our second story ride platform. Please speak to the Flash Pass Attendant on the first floor to request service. Manual wheelchairs are available at all locations with a wheelchair lift if weight exceeds the maximum posted capacity. If an ECV has attachments to the vehicle which could impede the operation of a lift or with safe lift ingress and egress, please transfer to a manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask an Associate at each location for assistance. Guests using an ECV will be required to transfer to a manual wheel chair to traverse the Funhouse portion of the queue at JOKER™: Carnival of Chaos. This section of queue may be bypassed upon request. Please speak to the ride attendant for additional details.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Six Flags Fiesta Texas personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests who may need to re-charge their wheelchair battery, please visit Guest Services for more information.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. In Hurricane Harbor San Antonio, Guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on: BATMAN™ The Ride; Boomerang; Chupacabra; CYBORG Cyber Revolution; Dare Devil Dive Flying Machines; Dr. Diabolical's Cliffhanger; Fireball; Iron Rattler; JOKER™ Carnival of Chaos; Pandemonium; Poltergeist; SHAZAM!™ Tower of Eternity; SUPERMAN™ KRYPTON Coaster; and WONDER WOMAN™ Golden Lasso Coaster.

Maximum weight limits can be found under the individual rides in this Guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance(s) of: BATMAN™ The Ride; Chupacabra; Dare Devil Dive Flying Machines; Dr. Diabolical's Cliffhanger; Iron Rattler; SUPERMAN™ KRYPTON Coaster; JOKER™ Carnival of Chaos; and WONDER WOMAN™ Golden Lasso Coaster.

The manufacturer requires a maximum Guest height on the following rides: BATMAN™ The Ride – 77", Boomerang – 80", Bucking Broncos – 54", Dr. Diabolical's Cliffhanger – 78", and JOKER™ Carnival of Chaos – 84".

.

LOOSE ARTICLES

Most rides cannot accommodate loose articles, including: jewelry; cell phones; hats; cameras; purses; backpacks; basketballs; umbrellas; beverage containers; electronic devices; etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Six Flags Fiesta Texas is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body.

On Dr. Diabolical's Cliffhanger, loose items that are not able to be stored in waist packs or cargo pockets are not permitted to be brought up to the station and must be stored in a free locker located in the queue or with a non-Rider.

For safety reasons, cell phone usage, taking pictures, and filming on rides are prohibited.

Glasses must be secured on all rides. On BATMAN™ The Ride, CYBORG Cyber Revolution, Dare Devil Dive Flying Machines, Fireball, and WONDER WOMAN™ Golden Lasso Coaster, glasses must be secured by an athletic strap, or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see an Associate for more details.

Any non-compliance that results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Six Flags Fiesta Texas are turned in to Lost and Found. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported online at **sixflags.com/fiestatexas/help/lost-found-services**.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You may be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnetics are used at the following attractions: BATMAN™ The Ride; Boomerang Coast to Coaster; Dr. Diabolical's Cliffhanger; Iron Rattler; Pandemonium; Poltergeist; Scream!; Spinsanity; and WONDER WOMAN™ Golden Lasso Coaster. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: Crow's Nest; Grand Carousel; Fiesta Texas Railroad; METROPOLIS Transit Authority; and Pirates of the Deep Sea. The tank must fit safely in the ride unit and not interfere with the ride restraint system. For your convenience, the park's First Aid station will be able to appropriately store your additional oxygen tanks during your visit.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the restraint mechanism to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects including, but not limited to: haze and other atmospheric effects; scents; areas of low lighting; loud music; sound effects; strobe lighting; and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate. Attractions utilizing these effects include Dare Devil Dive Flying Machines, Pirates of the Deep Sea, and Poltergeist. Strobe lighting and special effects are present exclusively within the ride queue of Dr. Diabolical's Cliffhanger and JOKER™ Carnival of Chao's Funhouse. To bypass this section, please request assistance from the ride Associate.

PROPER ATTIRE

For the safety and enjoyment of our Guests, everyone is to adhere to proper dress attire as most rides require each Guest ride with shirts, shorts/pants, and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. On all roller coasters and Circuit Breaker Grand Prix, CYBORG Cyber Revolution, Dare Devil Dive Flying Machines, Scream!, SHAZAM!™ Tower of Eternity, and SUPERGIRL™ Sky Flight, scarves will be required to be removed. Loose-fitting shoes may only be removed before riding: BATMAN™ The Ride; Bucking Broncos; Chupacabra; CYBORG Cyber Revolution; DC™ Super-Villains Swing; Dr. Diabolical's Cliffhanger; JOKER™ Carnival of Chaos, Scream!; SHAZAM!™ Tower of Eternity; SUPERGIRL™ Sky Flight; SUPERMAN™ KRYPTON Coaster; and Taz's Tornado.

Swimwear is not permitted on rides outside of Hurricane Harbor San Antonio.

Additionally, jewelry, such as necklaces, bracelets, dangling earrings, and rings (except wedding bands) are prohibited on Bahama Blaster, Bonzai Pipelines, and Texas Treehouse.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary. The evaluation of each attraction considered the following criteria:

Independent seated postural.

The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck, and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.

The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.

Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to hold on with two functioning arms.

Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with one functioning leg.

Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with two functioning legs.

Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Minimum of two functioning extremities.

Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.

Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.

Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our Associates and Guests, Associates are instructed not to perform any lifting of Guests.

Appropriate observed behavior.

Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Riders have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

BATGIRL™ Coaster Chase 2

Guests must be at least 36" tall.

A junior steel roller coaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. A shared seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Riders must possess one fully functioning arm or two arms that include the wrist (can be missing the hand) and either one fully formed natural leg (can be non-functioning) or two natural legs to the knee. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a Companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

BATMAN™ The Ride 5

Guests must be between 48" tall and 77" tall to ride.

A 4D free spin roller coaster that flips Riders upside down multiple times. Riders will experience weightlessness and rapid movements creating a unique experience.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes at least three fingers, the ability to grip, and two naturally formed leg extremities. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or leg casts are not permitted to ride. Guests with any type of prosthesis are not permitted to ride.

Rider Access: Alternate access is available at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of elevating themselves up into the seat.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: Magnetic systems are used during this ride.

5

Guests must be between 48" and 80 " tall to ride.

A high-speed, looping roller coaster which turns Riders upside down multiple times forward, and then again while traveling backward. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of upper body control and two natural formed legs to the ankle (can be non-functioning) OR upper body control and one fully formed natural leg (can be non-functioning) with another leg to the knee. Guests with a cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or full-leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Bucking Broncos 2

Guests must be between 36" tall and 54" tall to ride.

This children's ride hoists Riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two functioning legs. Guests may ride with one leg amputation; amputation must be at the knee or below. Guests with a cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of elevating themselves up into the seat.

Bugs' White Water Rapids

Guests must be 42" tall to ride alone **or** 36" tall and accompanied by a Supervising Companion.

This is a water flume ride; Riders may get wet. Riders will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to sit in an upright position with two naturally formed leg extremities. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride's Flash Pass Entrance. Riders will have to take several steps, on their own or with the assistance of a Companion and **be capable of stepping down into the ride unit.** Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

WARNING: Boats may bump into the side of channel and other boats.

Chupacabra

Guests must be at least 54" tall to ride.

A high-speed, inverted looping roller coaster which turns Riders upside down five times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line. Additionally, each unit has two more accommodating restraints. These seats are in rows 4 and 6 and are indicated with double seatbelts.

Rider Criteria: Guests must have a minimum of three extremities; one functioning arm that includes a hand and two legs. Two functioning arms including hands are sufficient if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Both legs must include the knee. Legs may be paralyzed. Guests with a cervical collar, neck brace, or broken collarbone are not permitted on the ride.

Casts are not permitted on this ride. Guests who do not have an appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Circuit Breaker Grand Prix

Electric Go-Karts

The minimum height requirement to drive alone is 56". Guests between 36" and 56" must ride as a passenger with an adult who is taller than 60" and 18 years or older or the passenger's parent/legal guardian.

Maximum weight per Single Kart is 300 lbs.

Maximum weight per Double Kart is 550 lbs.

This is a "drive yourself" go-kart ride where Drivers drive their own go-kart around a designated track.

Restraint System: A seatbelt secures each Rider across the upper body, pelvis, and thighs. Helmets are not provided. Double carts have seatbelts that are like a regular car.

Rider Criteria: Drivers must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, or any cast are not permitted to ride. Drivers must exhibit sufficient visual acuity to operate the car safely. Long hair must be tied up and above the shoulder. Passengers must have upper body control with the ability to brace self.

Rider Access: Alternate access is mainstreamed via the entrance. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit.

NOTE: This is an extra charge attraction. Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: Please remember that inattentive Drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

Crow's Nest 2

Guests walking age to 42" require a Supervising Companion over 54". Guests above 42" do not require a Supervising Companion to ride. Hand-held infants **or** single Riders are not permitted.

A Ferris wheel ride where Guests sit in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: No seatbelts are utilized on this ride.
A door is used to further enclose each side of the ride gondola.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

CYBORG Cyber Revolution 4

Guests must be at least 42" tall to ride.

A family thrill ride where gondolas rotate on arms around a horizontal axis in circular motion while rotating clockwise around the center hub. Riders will experience weightlessness, as well as rapidly changing forces and directions.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have a minimum of one functioning arm (excluding prosthesis) and two legs that include the knee. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or full-leg cast are not permitted to ride. Prostheses are permitted provided they are secured against the forces of the ride.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a Companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Daffy's Bus Stop 2

Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight – 440 lbs. per Rider

This ride only accommodates one adult per row.

Bus with six rows that seats four guests per row. The bus rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride entrance. Guests will have to take several steps, on their own or with the assistance of a Companion and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Dare Devil Dive Flying Machines 5

Guests must be at least 48" tall to ride.

An inverting thrill ride giving Riders the sensations of a aerobatic airplane flight where units rotate on a 360 axis while spinning to a height of 48 feet around the clockwise rotating center hub.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Riders must possess one naturally fully functioning arm and one arm to the elbow. They must also possess one fully functioning leg and one leg to the knee. Guests with a cervical collar, neck brace, broken collarbone, Leg or Arm cast are not permitted to ride. Prostheses are not permitted.

Rider Access: Alternate Access is available at the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit.

DC™ Super-Villains Swing 2

Guests must be at least 48" tall to ride.

This ride only accommodates one adult per row.

Chair swing ride with free-hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider.

Rider Criteria: Riders must possess one fully functioning arm, another arm to at least the elbow, and two functioning legs including the knee. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts and prostheses are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of stepping up into the ride unit.

Dr. Diabolical's Cliffhanger 5

Guests must be between 48" tall and 78" tall to ride.

A high-speed, floorless looping dive roller coaster which turns Riders upside down multiple times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line. Additionally, each unit has two accommodating restraints. These seats are in rows two and three, seat 4 and are indicated with red seatbelts.

Rider Criteria: Guests must have a minimum of three extremities; one functioning arm that includes a hand and two legs. Two functioning arms including hands are sufficient if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Both legs must include the knee. Legs may be paralyzed. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses are not permitted.

Rider Access: Alternate Access is available at the ride entrance. Guests will have to take several steps, on their own or with the assistance of a Companion and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. Transfer device option: Alternate Access is available at the ride exit. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride contains strobe lighting during the themed pre-show and utilizes magnetic systems during the ride.

Fiesta Texas Railroad 1

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Guests less than 42" tall must sit in the center of the bench.*

Restraint System: Riders board an antique train ride that offers a round trip through the park.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a Supervising Companion.

Rider Access: Alternate Access is available through the designated ramp at the front of each station. This attraction is wheelchair accessible. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Fireball 4

Guests must be at least 48" tall to ride.

This ride is a compact roller coaster-type ride on a circular track that is positioned vertically. The ride moves in a pendulum style resulting in up to 10 upside down loops.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Riders must possess two natural, fully functioning arms and two natural, fully formed leg extremities that include the knees or one naturally fully functioning arm and two naturally fully functioning leg extremities. Amputations must be at the knee or below. Casts are not permitted on this ride. Prostheses are not permitted on the ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Specific ride vehicles at this attraction are equipped with removable sides which may assist a Guest in transferring from their wheelchair to the ride unit. Please inform an Associate if you wish to use that vehicle. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Foghorn Leghorn's Barnyard Railway 1

*Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

This ride only accommodates two guests, more than 54" in each uncovered coach.

Riders board a miniature train ride in the Crackaxle Canyon section of the park.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of stepping up into the ride unit. Service animals are not permitted on this ride.

Grand Carousel 1

Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.

Maximum Weight per Animal is 170 lbs.

Maximum Weight per Chariot is 680 lbs.

A carousel ride which features animals — both stationary and moving up and down — and chariot seating mounted on a circular platform that rotates.

Restraint Criteria Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests must have at least one functioning arm and must have the ability to straddle the ride unit. Guests unable to straddle the ride unit or that do not have at least one functioning arm must be seated in a chariot unit. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the chariot. Riders with a full-leg cast must be seated in a chariot.

Rider Access: Alternate Access is available at the ride entrance. Guests will have to take several steps, on their own or with the assistance of a Companion and be capable of stepping up onto a platform. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, and are permitted to ride on the ride platform or chariots.

GREEN LANTERN™ Emerald Flight 2

Guests must be 48" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum weight per Plane is 552 lbs.

This ride only accommodates one adult per row.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Leg cast/brace must fit safely inside ride unit.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of elevating themselves up into the seat.

Hurricane Force 5

Guests must be at least 48" tall to ride.

Riders sit in a circle facing outward secured in motorcycle-style seats on a circular platform that rotates clockwise and rocks back in forth across a wave-like track multiple times.

Restraint System: Each seat is equipped with an adjustable padded back restraint.

Rider Criteria: Guests must have a minimum of one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or arm and leg casts are not permitted to ride. Prostheses are not permitted.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to take several steps on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit.

Hustler

Guests must be at least 36" tall to ride.

Manually rotated pool balls mounted on multiple rotating sections, which produce strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A door closes on the ride unit to secure all Riders.

Rider Criteria: Guests must have a minimum of two functioning extremity. Guests must be able to hold on with one functioning arm that includes a hand (excluding prosthesis). Guests must be able to brace self with one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, broken Collarbone, or braced arm casts are not permitted to ride. Prostheses are permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion to access the ride unit. This includes an elevated step onto the platform.

Iron Rattler

Guests must be at least 48" tall to ride.

A thrilling hybrid roller coaster that has a wood frame and steel track turning Rider's upside down one time. Riders will experience high speeds, weightlessness, and rapid movement from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a forearm cast are permitted to ride. Guests with a cervical collar, neck brace, broken collarbone, or any leg cast (foot, lower, full) are not permitted on this ride. Prostheses are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: Magnetic systems are used during this ride.

JOKER™ Carnival of Chaos

Guests must be at least 52" and less than 84" tall to ride.

A disc-type ride that swings up and down until it reaches 172 feet high and rotates on itself. Guest will experience a feeling of weightlessness.

Restraint System: A shoulder harness with safety belt secures each Rider over the head and across the chest. May not be suitable for guests of larger size.

Rider Criteria: Riders must possess one natural, fully functioning arm, one natural, formed extremity to the elbow and two naturally fully formed leg extremities to the knee. Guests with a cervical collar, neck brace, broken collarbone, and any arm cast or leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: The queue contains strobe lightning. Please contact an Associate in order to bypass this experience.

Kinderstein 2

Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight per teacup is 440 lbs.

This ride only accommodates one adult per teacup.

This is a family ride that travels a circular path while individual teacups rotate on an axis.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone or braced arm cast are not permitted to ride. Full-arm and leg casts are permitted provided they can safely fit inside of the ride unit. Prosthetic devices are permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

METROPOLIS Transit Authority 2

Guests must be 42" to ride. Guest below 42" must ride with a Supervising Companion. The Supervising Companion must ride in the same car as the child under 42".

A slow-moving family ride that takes Guests along an elevated track 18 feet off the ground around DC™ Universe.

Restraint System: Each vehicle is secured with a door through which Guests may board and exit.

Rider Criteria: Guests must possess upper body control and have the ability to sit in an upright position and maintain an upright posture. If a Rider cannot maintain upper body postural position, then the Guest must ride with a responsible Supervising Companion.

Rider Access: Alternate access is available at the ride entrance via the elevator. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Specific ride vehicles at this attraction are equipped with removable sides that may assist a Guest in transferring from their wheelchair to the ride unit. Please inform an Associate if you wish to use that vehicle. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Pandemonium 4

*Guests must be at least 47" tall to ride alone **or** 42" tall accompanied by a Supervising Companion.*

Four-seat roller coaster cars that traverse a steel track while freely rotating 360 degrees.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis, additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full-arm cast and braced arm cast are not permitted to ride. Full-leg casts are permitted provided they can safely fit within the rider unit.

Rider Access: Alternate Access is available through the ride's Flash Pass lane. Riders will have to transfer into the seat, on their own or with the assistance of a Companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: Magnetic systems are used during this ride.

Pirates of the Deep Sea 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Guest under 42" must seat on the inside of the seat. Hand-held infants are not permitted.*

A family-themed interactive dark ride.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row.

Rider Criteria: Riders must possess one functioning arm extremity and two functioning leg extremities to the knee. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behavior. Guests who do not meet these requirements must be accompanied by a Supervising Companion. Guests who do not have seated postural control, the ability to enter or exit the ride safely, or cannot demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available through the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Specific ride vehicles at this attraction are equipped with removable sides that may assist a Guest in transferring from their wheelchair to the ride unit. Please inform an Associate if you wish to use that vehicle. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

WARNING: This ride contains strobe lighting and is designed to scare or startle you.

POISON IVY™ Toxic Spin 2

*Guests must be at least 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight per Gondola is 550 lbs.

This ride only accommodates two adults per gondola.

A tower with free hanging enclosed gondolas suspended from an elevated, rotating pylon that rotates clockwise as it climbs the tower for a great aerial view of the area.

Restraint System: A door further encloses the ride unit. Due to the nature of this ride, this ride may not accommodate guests of a larger size.

Rider Criteria: Riders must possess one fully functioning arm, one fully functioning leg. Guests must be able to support themselves in an upright sitting position. Guests with cervical collar, neck brace or broken collarbone are not permitted to ride. Casts and prosthetic devices are permitted on this attraction.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Poltergeist 5

Guests must be at least 54" tall to ride.

A steel roller coaster that launches Riders to 54 miles per hour and turns Riders upside down four times. Riders will experience high speeds, weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the ankles. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of four functioning extremities; two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, any arm cast or any leg cast (foot, lower, full) are not permitted on this ride. Guests with any type of prosthesis or leg amputation are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping down into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: Magnetic systems are used during this ride. This ride contains strobe lighting.

Road Runner Express 4

Guests must be at least 48" tall to ride.

A steel roller coaster. Riders will experience rapid changes in direction.

Restraint System: An individual lap restraint secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have one functioning arm and two functioning legs. Two functioning arms and one functioning leg is sufficient instead of one functioning arm and two functioning legs if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full-leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Scream! 4

Guests must be at least 52" tall to ride.

A tower ride with a chair lift-type seat where Riders are propelled up or shot down at high speeds. Guests will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. It also contains a secondary restraint seatbelt across the waist. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have at least one functioning arm and one functioning leg to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collarbone and braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

WARNING: Magnetic systems are used during this ride.

SHAZAM!™ Tower of Eternity 2

*Guests must be at least 42" tall to ride, **or** 42" to 48" must be accompanied by a Supervising Companion.*

A tower ride where guests are propelled up and down at mild speeds. Guests will experience the feeling of mild up and down motions.

Restraint System: Each seat is equipped with an over the shoulder harness and seatbelts that buckle at the bottom of the restraint. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guest must be able to sit upright in the seat, unsupported. Guests must have at least one fully functioning arm and two natural legs to the knee. Prostheses are permitted. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, full-arm and full-leg are not permitted to ride.

Rider Access: Alternate access is available through the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit.

Spinsanity 3

Guests must be 46" tall to ride alone. Guests 36" must be accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight – 800 lbs. per Car

Restraint System: This is a circular ride where cars pivot by centrifugal force created by the ride's rotating table. A shared, non-locking, lap bar rests across rider's thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast, are not permitted to ride. Leg casts must be able to safely fit within the ride unit.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit. Specific ride vehicles at this attraction are equipped with removable sides which may assist a Guest in transferring from their wheelchair to the ride unit. Please inform an Associate if you wish to use that vehicle. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: Magnetic systems are used during this ride.

SUPERGIRL™ Sky Flight 4

Guests must be at least 44" tall to ride.

A chair swing thrill ride with free-hanging seats suspended from an elevated and rotating gondola. Riders will rotate in a circular motion as the gondola ascends and descends the tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. An additional individual seatbelt is positioned across the chest and under the arms of each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have one fully functioning arm and another arm to at least the elbow and two functioning legs including the knee. Guests with a cervical collar, neck brace, and braced arm cast are not permitted to ride. Amputations must be below the knee. Prostheses are not permitted on the ride.

Rider Access: Alternate Access is available through the ride entrance. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

SUPERMAN™: KRYPTON Coaster 5

Guests must be at least 54" tall to ride.

A high-speed, floorless, looping roller coaster that turns Riders upside down multiple times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line. Additionally, each unit has two more accommodating restraints. These seats are in rows four and six and are indicated with double seatbelts.

Rider Criteria: Guests must have a minimum of one functioning arm that includes a hand and two functioning legs. Two functioning arms including hands are sufficient if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Both legs must include the knee. Guests with paralyzed legs may ride. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Taz's Tornado 2

*Guests must be at least 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted. Guests under 36" must be walking age.*

Chair swing children's ride with free-hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row with an individual between-the-legs safety belt for each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have one fully functioning arm and another arm to at least the elbow and two functioning legs including the knee. Amputations must be at the knee or below. Guests with a cervical collar or neck brace are not permitted to ride. Prostheses are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

The Gully Washer 3

*Guests must be at least 42" tall to ride alone **or** 36" tall and accompanied by a Supervising Companion.*

A family water ride where Riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Riders must possess one naturally fully formed and functioning arm extremity and one naturally fully formed and functioning leg extremity. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride. Guests with a full-leg cast are only permitted to ride if it can safely fit inside the ride unit.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they can shift.

WONDER WOMAN™ Golden Lasso Coaster

Guests must be at least 48" tall to ride.

A high-speed single rail steel roller coaster turning Riders upside down three times. Riders will experience high accelerations and changes in the longitudinal, lateral, and vertical directions.

Restraint System: An individual lap bar with a safety belt harness secures each Rider over the head, across the chest, thighs, and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand (excluding prosthesis) and two functioning legs with feet (excluding prosthesis). Guests with a cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or full-leg cast are not permitted to ride. Prostheses are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a Companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

WARNING: Magnetic systems are used during this ride.

2

Guests must be at least 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.

A miniature Ferris wheel where Guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

HURRICANE HARBOR SAN ANTONIO

Each attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides		This is a low speed, and/or shallow water attraction.
Mild Thrill Rides		This is a low to medium speed attraction, and/or water depth to 48 inches. Some Rider control, maneuvering and/or swimming skills required.
Moderate Thrill Rides		This is a medium speed attraction. Height and water depth may vary. Moderate or unexpected forces can be generated during the ride. This attraction may require Rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Rides		This is a fast-paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires Rider body control and strong swimming skills.
Aggressive Thrill Rides		This is a high speed and/or deep water attraction with turbulent turns, drops, and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires Rider body control and swimming skills.

Appropriate Attire

Appropriate swimwear is required. Thongs and transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. Guests wearing bathing attire with metal buttons, rivets, zippers, or snaps will not be permitted to ride: Bahama Blaster; Bamboo Chutes; Bermuda Triangle and Riptide Runner; Bonzai Pipelines; Big Bender and Whirlpool; Cowabunga; Ripcurl Racer; Stingray and Vortex; Texas Tumble; Thunder Rapids; or Tornado Wipeout. Jewelry including, but not limited to, necklaces, bracelets, dangling earrings, and rings other than wedding bands are prohibited on Bahama Blaster, Bonzai Pipelines, and Texas Treehouse. Contact lenses are not recommended. Guests requiring special accommodation should speak to a member of the Aquatics Supervisory Team.

Life Jackets

Life jackets are available for all Guests. Only U.S. Coast Guard (or Canada) approved life jackets are allowed as floatation devices. Life jackets are provided free of charge for Guests who require one.

In wave pools, life jackets are required for Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Lonestar Lagoon.

In other attractions requiring life jackets, children who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers must wear a life jacket. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at White Water Canyon.

Ongoing Lifeguard Training

In an ongoing effort to provide a safe and enjoyable waterpark experience for our Guests, Hurricane Harbor San Antonio routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water mannequin; the use of video surveillance equipment; internal and external audits; and active/inactive water rescues and/or first aid scenarios.

Scales

Red light/green light scale systems are used at weight sensitive attractions. Guests who do not meet the weight requirement will not be permitted to ride. Scales are used at Bermuda Triangle and Riptide Runner, Big Bender and Whirlpool, Stingray and Vortex, Texas Tumble, Thunder Rapids, and Tornado.

Swim Diapers

Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

Personal Wheelchairs and Pool Lifts

Guests participating in a wave pool are permitted to use a personal wheelchair. Personal wheelchairs are permitted up to the seat's water depth. Guests utilizing wheelchairs will not be required to utilize a lifejacket while in the wave pool only if their height exceeds 42" tall. While using a personal wheelchair, Guests must not utilize the wheelchair's seatbelts while in the wave pool.

Motorized or electric personal wheelchairs will be permitted at the lower level of the Texas Tresshouse. Walkers, canes, or other assistive devices are permitted only at ankle depth in the following attractions: Coral Cove; Lonestar Lagoon; Paradise Cove; Splash Water Springs; and White Water Canyon.

During your visit, please speak to a member of our Aquatics Supervisory team for further accessibility information.

WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the type of actions caused by various attractions. Each of the following attractions will identify the restrictions according to the criteria. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride. Please use caution when entering and exiting water park attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

Bahama Blaster 4

Guests must be at least 48" tall in bare feet to ride

Maximum Weight – 300 lbs.

Riders will be dropped from an enclosed capsule into a serpentine or straight flume at high speeds and will encounter steep drops, banked turns and strong acceleration and deceleration forces from all sides and directions during the course of their ride. Riders will decelerate into a run-out. Physical and cognitive ability is required to maintain riding position.

Rider Criteria: Guests must stand with their head and back against the slide, legs crossed at the ankle and arms folded across their chest. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride. Guests with cervical collar, neck brace, broken collarbone, full-arm cast, forearm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: Access to this attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and safely enter the capsule. Riders must be able to exit the slide run-out at the conclusion of their ride. The run-out in which the slide ends is accessible from the main walkway. Please take caution when entering and exiting the attraction, as the area may be slippery.

Bamboo Chutes 2

Guests must be less than 48" tall in bare feet to ride.

Riders will descend an open serpentine slide, designed for young children, offering an exhilarating experience of speed and downward movement. The slides will end at a splash pad that transitions into a pool with a maximum depth of three feet.

Rider Criteria: Guests must slide feet first, lying down with their arms crossed over their chest. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride.

Rider Access: Access to this attraction requires climbing up a flight of stairs and assuming proper riding position while in the start tub. The zero depth and adjacent 3-foot pool are accessible from the main walkway.

Bermuda Triangle & Riptide Runner 4

Guests must be at least 48" tall in bare feet to ride

*Maximum Weight – Single Riders may not exceed 300 lbs.
Combined weight of two Riders may not exceed 400 lbs.*

Riders sit in an inflatable tube and travel down the path of a straight or serpentine flume experiencing variable and high speeds, multi-directional forces, and steep drops, that may include free-falling sensations. Riders will decelerate in a landing pool up to 4-feet deep. Physical and cognitive ability is required to maintain riding position.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride. Guests with cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: Access to this attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and safely enter the tube. Riders must be able to exit the catch pool stairs at the conclusion of their ride. The catch pool in which the attraction ends, is accessible from the main walkway. Please use caution when entering and exiting the attraction, as the area may be slippery.

Big Bender & Whirlpool 4

Is this still at the park? It is not listed on the website.

Guests must be at least 48" tall in bare feet to ride

*Maximum Weight – Single Riders may not exceed 250 lbs.
Combined weight of two Riders may not exceed 400 lbs.*

Riders will travel through thrilling straight and serpentine flumes, experiencing high speeds, multi-directional forces, steep drops — including free-fall sensations — and circular motions within enclosed and/or dark spaces. The ride concludes with deceleration in a catch pool less than 3-feet deep. Physical and cognitive ability is required to maintain riding position.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride. Guests with cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: Access to this attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and safely enter the tube. Riders must be able to exit the catch pool stairs at the conclusion of their ride. The catch pool in which the attraction ends, is accessible from the main walkway. Please use caution when entering and exiting the attraction, as the area may be slippery.

Coral Cove Pool 2

A family pool for swimming and wading with water elements and features. Pool depth ranges from zero-depth entry up to 2-feet deep.

Rider Criteria: Guests unable to maintain seated postural control, have the ability to safely enter and exit the attraction, or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion.

Rider Access: Access is available via zero-depth entry through the main walkway. Personal wheelchairs are permitted in Coral Cove up to the water depth of the seat.

Lonestar Lagoon (Pool) 4

Life jackets are required for Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests.

A Texas-shaped, ocean-like swimming pool with simulated waves and currents that can be strong. The pool depth ranges from zero depth to 6-feet deep.

Rider Criteria: Life jackets are required for Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests. Guests with a full-arm cast or full-leg cast may participate, but water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast cannot participate.

Rider Access: Access to this attraction is through a zero-depth beach entry. Personal wheelchairs are permitted in the wave pool up to the water depth of the seat.

Paradise Cove (Pool) 2

A family pool for swimming and wading with water elements and features. Pool depth ranges from zero-depth entry up to 3-feet deep.

Rider Criteria: Guests unable to maintain seated postural control, have the ability to safely enter and exit the attraction, or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero-depth entry through the main walkway, located closest to Bamboo Chutes. Personal wheelchairs are permitted in Paradise Cove up to the water depth of the seat.

Ripcurl Racer, Bonzai Pipelines, Cowabunga & Wipeout 2

Guests must be at least 42" tall to ride alone on Ripcurl Racer, Cowabunga & Wipeout. Riders below 42" must ride with a Supervising Companion. Riders on Bonzai Pipelines must be between 42" and 54" tall to ride.

A children's activity play area with a variety of small serpentine and straight slides intended for small children where Riders will experience the thrill of speed and downward movement. Riders will encounter strong acceleration and deceleration forces from all sides during the ride course. The slides will end in a shallow splash pool that is less than 2-feet deep.

Rider Criteria: Rider position for Ripcurl Racer and Cowabunga & Wipeout is to remain in an upright, feet first, seated position. Rider position for Bonzai Pipelines is to lie feet first, face up with legs crossed and the ankles and arms crossed at the chest. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride. Guests with cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: Access to these attractions requires stepping into the start tub and assuming proper riding position. Riders on the slides must be able to exit the pool at the conclusion of their ride. The pool in which the slides end is accessible from the main walkway. Please use caution when entering and exiting the attraction, as the area may be slippery.

Splash Water Springs (Pool) 3

A family pool for swimming and wading with water elements and features. Pool depth ranges from zero-depth entry up to 3-feet deep.

Rider Criteria: Guests unable to maintain seated postural control, have the ability to safely enter and exit the attraction, or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion.

Rider Access: Access is available via zero-depth entry through the main walkway, located closest to Coca-Cola Ah. Personal wheelchairs are permitted in Splash Water Springs up to the water depth of the seat.

Stingray & Vortex 2

Guests must be walking age to 42" tall to ride accompanied by a Supervising Companion. Guests over 42" tall may ride alone.

Maximum Weight – Single Riders may not exceed 250 lbs.

Combined weight of double Riders may not exceed 400 lbs.

Riders may not exceed 250 lbs.

Two slides where Riders travel down the path of a straight or serpentine flume experiencing side to side forces during their ride. Riders will decelerate in a catch pool that is 2-feet deep.

Rider Criteria: Riders must be seated in the tube, facing forward, and holding onto the handles. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride. Guests with cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: Access to this attraction requires maneuvering throughout the entrance ramp with a tube. Riders must safely enter the start tub and tube. Riders must be able to exit the catch pool stairs at the conclusion of their ride. The catch pool, is accessible from the main walkway. Please use caution when entering and exiting the attraction, as the area may be slippery.

Texas Treehouse 2

Guests must be at least 42" tall in bare feet to ride the slides.

A children's interactive water play structure with various play elements including tipping buckets, water blasters, net climbs, and rope bridges. Houses four serpentine body slides where Riders will experience downward movement and strong acceleration and deceleration forces from all sides during the ride course. The slides will end in a catch pool that ranges from 3-feet deep to a zero-depth exit.

Rider Criteria: Riders on the slides must slide feet first, lying down with arms crossed over their chest. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride. Guests with cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: This attraction is zero depth with play elements spread throughout, including ground level. The slides and upper elements are accessed by climbing multiple flights of stairs and rope climbs. Riders of the slides will have to ascend the playscape and safely enter the start tub. Riders on the slides must be able to exit the catch pool at the conclusion of their ride. The catch pool is accessible from the main walkway. Please use caution when entering and exiting the attraction, as the area may be slippery.

Texas Tumble 3

Guests must be 42" tall in bare feet to ride.

Maximum Weight – Combined weight of Riders may not exceed 800 lbs. Minimum of two Riders; Maximum of four Riders per raft.

Riders sit in an inflatable raft and travel down a large serpentine river-rapids-like flume. Riders will experience high speeds, turns, and side-to-side motions. Riders will decelerate in a catch pool up to 3 ½-feet.

Rider Criteria: Guests are required to remain in an upright-seated position with their back against the raft, facing forward, and holding onto the handles. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride. Guests with cervical collar, neck brace, broken Collarbone, full-arm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: Access to this attraction requires climbing multiple flights of stairs. Guests will have to ascend the slide tower and safely enter the raft. Riders must be able to exit the catch pool at the conclusion of their ride. The catch pool is accessible from the main walkway. Please use caution when entering and exiting the attraction as the area may be slippery.

Thunder Rapids 4

Guests must be at least 48" tall in bare feet to ride.

Maximum Weight – Combined weight of Riders must be between 300 – 550lbs. Minimum of two Riders; Maximum of four Riders per raft.

Riders will travel through a serpentine and straight flume composed of uphill blasts, enclosed dive turns and flying saucer turns. Riders will experience high speeds and strong acceleration and deceleration forces from the front, rear, and all sides during their ride. Riders will decelerate into a catch pool that is approximately 2-feet deep.

Rider Criteria: Guests are required to remain in an upright-seated position, facing forward and firmly holding onto the handles at all times. Riders must have one fully functional arm with the ability to grasp the handle and two legs to the knee. Riders must possess the physical and cognitive ability to maintain this position throughout the course of the ride. Guests with cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: Access to this attraction is accessible through the main queue line. Guests must safely enter their raft on the loading platform and exit their raft in the catch pool at the conclusion of the ride. The catch pool is accessible from the main walkway. Please use caution when entering and exiting the attraction, as the area may be slippery.

Tornado 4

Guests must be at least 48" tall in bare feet to ride.

Maximum Weight – Combined weight of Riders may not exceed 700 lbs. Minimum of two Riders; Maximum of four Riders per tube.

Riders slide on a half-pipe type water flume where they travel down a steep wall and ride up the opposite wall oscillating back and forth until they lose momentum and slide into a catch pool. Guests experience steep drops, variable and high speeds, free-falling sensations, and experience strong acceleration and deceleration forces from the front, rear, and all sides. Riders will decelerate into a catch pool that is 3-feet deep.

Rider Criteria: Riders are required to remain in an upright-seated position, facing forward and firmly holding onto the handles at all times. Riders must possess the physical and cognitive ability to maintain this position throughout the course of their ride. Guests with cervical collar, neck brace, broken collarbone, full-arm cast, braced arm cast, or lower body casts are not permitted on this slide.

Rider Access: Access to this attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and safely enter the tube. Riders must be able to exit the catch pool stairs at the conclusion of their ride. The catch pool is accessible from the main walkway. Please use caution when entering and exiting the attraction, as the area may be slippery.

White Water Canyon

Life jackets are required for Guests who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests.

A simulated flowing river where Riders float in tubes, swim, or wade along its course. Riders will experience currents and may encounter waves and splashing. Pool depth ranges from zero depth to 3-feet deep.

Rider Criteria: Life jackets are required for Guests who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests.

Rider Access: Access to this attraction includes three staircases and an accessibility ramp located near the lockers in the middle river area. Personal wheelchairs are permitted in the river up to the water-depth of the seat.

ENTERTAINMENT VENUES

HALLOWEEN NIGHT TIME EVENT

Fright Fest

Fright Fest at Six Flags Fiesta Texas has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, sensitivities to latex, or sensitivities to loud music and sound effects, are advised not to participate in these attractions.

Characters in our Fright Fest attractions will not touch you; please do not touch them in any manner. Guests that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access may be available. Please visit Guest Services for more information. Service animals are welcome to attend Fright Fest events. They are permitted to walk through the park areas, including scare zones. Please adhere to all posted and verbal warnings and directions.

HALLOWEEN DAYTIME/FAMILY

Kids Boo Fest

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions, or services offered, visit Guest Services.

HOLIDAY EVENT

Holiday in the Park

Six Flags Fiesta Texas Holiday in the Park Event is filled with delightful holiday cheer for Guests of all ages. Many areas of the park will have low lighting, fog, snow machines, and strobe-styled lighting. Guests with a history of seizures or epilepsy should be aware of flashing and strobe-styled lighting that will be present throughout the park. Please see a Guest Services representative for any additional questions.

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept these risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations, Six Flags Fiesta Texas does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, **do not ride!**

All restraint systems including lap bars, shoulder harnesses, and seatbelts must be positioned, fastened, and tightened properly to allow Guests to ride.

Information in this guide is subject to changes.
