

A large, solid red graphic element with a wavy, undulating top edge that spans the width of the page, serving as a background for the title text.

GUEST ACCESSIBILITY GUIDE

Welcome to Canada's Wonderland!

We are glad you are here! At Canada's Wonderland we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment and we want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride, and our policies incorporate the manufacturers' guidelines as well as the requirements of the Accessibility for Ontarians with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Associate to help accommodate you.

RIDE SAFELY

The Ontario Technical Standards and Safety Authority Act, 2000, Amusement Devices Regulation (O. Reg. #221/01) requires that Riders obey all warnings and directions regarding any ride and behave in a manner that will not cause or contribute to injury to themselves or others. You can be charged under the Act if you fail to follow the rules for riding safely.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Ride Accommodations. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **do not ride**.

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper rider positioning until the ride comes to a complete stop. Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Canada’s Wonderland is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone or electronic usage while riding is prohibited on most rides.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Canada’s Wonderland

RIDE RATING SYSTEM

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to help park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	Rides that are generally calm and gentle in nature.
Mild Thrill Rides	2	Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	3	Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	4	Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.
Aggressive Thrill Rides	5	Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery
	Prohibited for Guests with diabetes

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

-  This symbol is used to identify attractions where Riders may remain in their wheelchair. These attractions include Maple Park Treehouse (ground level), Lakeside Lagoon Pool, Pumphouse (ground level), Sprayground, Splash Station (ground level), and White Water Bay.
-  This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.
-  This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Canada's Wonderland uses the following terms:

-  **Ability to Hold On or Brace:** Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.
-  **Hand-Held Infants:** Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Antique Carrousel (in a chariot), Character Carrousel (in a chariot), Lakeside Lagoon Pool, Lazy River, Sprayground, and White Water Bay (water depth may be restricted). Hand-held infants and their Supervising Companion may also enjoy Maple Park Treehouse, Pumphouse, and Splash Station, but may not participate on the elevated sections of these attractions.

 **Supervising Companion:** Many of our rides have height requirements that allow a Guest under that requirement to ride with a Supervising Companion. A Supervising Companion is someone who meets all the requirements to ride the ride themselves, who is at least 54" in height, approximately 14 years of age, and demonstrates appropriate observed behavior. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment

and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery
- Diabetes

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines, and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a Rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride: Antique Carrousel, Character Carrousel, Flying Eagles, Jokey’s Jalopies, KidZville Station, and Swan Lake, and participate in Lazy River and White Water Bay.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be “officially” measured at International Street Height Check Stations. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height measuring device may be used during the height measuring process. This device may come into contact with the Guest’s head for a brief period.

For the safety of Guests, shoes that contribute excessively to a Guest’s height are prohibited during measuring. For example, a Guest is not permitted to wear platform shoes to help meet a

height requirement. Canada’s Wonderland reserves the right to ask that shoes be removed to ensure that a Guest’s height is not being artificially enhanced or manipulated.

In Splash Works, height measurements are taken in bare feet. There is a separate height wristband system for Splash Works.

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction’s Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guests with a mobility restriction or cognitive impairment should visit Guest Services upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services Associate will provide the details needed to participate in the program.

CASTS & BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with a cast or brace may be required to sit in a specific seat. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on select slides in Splash Works.

The following chart displays the cast and brace rules for all rides and attractions.

C

Must ride in a chariot

F

Cast/brace must fit safely inside the ride unit

O

Not permitted to participate on elevated activity area

Y

May ride with the condition

Z

Participation or water depth may be restricted if necessary

PROSTHETIC DEVICES

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit Guest Services or Ride Accommodations for assistance before riding to ensure a safe experience.

Guests with prostheses are advised to consult with the Canada's Wonderland Supervisory Team for guidance during their visit.

For certain rides, manufacturers may require documentation from the prosthetic device's manufacturer confirming it is designed to withstand high-speed roller coaster forces of up to 68 mph and G-forces between 1 to 5 Gs, with sufficient safety measures in place. This applies at: Drop Tower, Psychone, Riptide, Shockwave, Soaring Timbers, Tundra Twister, and WindSeeker.

Arm prostheses are NOT allowed on The Bat. Leg prostheses are NOT allowed on Behemoth, Leviathan, SlingShot, Silver Streak, Skyhawk, SlingShot and Yukon Striker. No prostheses are allowed on Alpen Fury, The DareDeviler, Lumberjack, and Muskoka Plunge. A Rider with more than one upper body prosthesis is not allowed on Beagle Brigade Airfield, Jumpin' Jet, PEANUTS™ 500, and Sugar Shack.

RIDE DEVICES

For safety reasons, certain attractions may require the removal of medical devices or prosthetics. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

On rides equipped with removable seats, Guests using wheelchairs may transfer directly to the ride vehicle. Ride Operators and Guest service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Stabilizing devices, when requested, can be used at designated rides to prevent the ride unit from swaying during loading and unloading. These devices may further assist Riders in transferring from their wheelchair to the ride unit. Flying Eagles is equipped with a stabilizing device.

Body harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Alpen Fury, Behemoth, Leviathan, and Yukon Striker.

In addition, specific ride vehicles are equipped with removable sides at Backlot Stunt Coaster, Boo Blasters on Boo Hill, and Flying Eagles. These vehicles may further assist Riders in transferring from their wheelchair to the ride unit. Please inform an Associate if you wish to use that vehicle.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride Operator or Guest Services Associate.

ADDITIONAL INFORMATION & SERVICES

Our goal is to make Canada's Wonderland as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large Print Versions

Print versions of the Guest Accessibility Guide are available at Guest Services. Braille and large print versions of the Park Guide and Guest Accessibility Guide are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Family Services

A space for nursing mothers is available in KidZville inside of the Parent Rest Zone. Baby changing areas and a companion restroom can be found in most restrooms. Please feel free to ask a Team Member for directions to these locations or review a park map.

First Aid

Our First Aid Centre located in Medieval Faire near Spinovator is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. In addition, a First Aid Station is located in Splash Works beside the waterpark entrance. This location is open during Splash Works operating hours.

Hearing Needs

If you require American Sign Language (ASL) interpreting services, we can provide them with at least 7 days advance notice for live show venues. Additionally, show scripts or score sheets can also be requested at each venue. To arrange ASL services, please submit your request online through canadaswonderland.com/accessibility/sign-language-interpretation

Parking For Guests With Disabilities

Accessible parking is available on a first-come, first-serve basis within the main parking lots of the park. When you arrive at the parking toll booths, ask an Associate for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask an Associate for directions to additional parking areas.

Quiet Room

Canada's Wonderland offers a Quiet Room located at Guest Services for family members or caregivers to take a break and reduce sensory stimulation.

Washrooms

Private washroom facilities for Guests needing the assistance of a Companion are available at all family washroom locations. Wheelchair accessible stalls are located at all washrooms

Rider Swap Program

The Rider Swap program allows one adult to stay with non-Riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services.

Service Animals

Service animals are welcome at Canada's Wonderland. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. A service animal must be readily identified with a visual indicator such as a vest or harness worn by the animal or the Guest will be asked to provide documentation from a health professional identifying it as a service animal.

Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per Guest. A service animal Relief Area is located in the grassy area across from Yukon Striker. Owners are responsible for disposing of their animal's waste.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on Antique Carrousel, Boo Blasters on Boo Hill, Character Carrousel, Jokey's Jalopies, Jumpin' Jet, KidZville Station, SNOOPY'S™ Revolution, The Pumpkin Patch, Treetop Adventure, and Maple Park Treehouse. Service animals must be leashed, under the owner's control, and fit appropriately on the floor of the ride vehicle, not the ride seat. They may also attend performances at Canterbury Theatre, Playhouse Theatre, and International Showplace. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. They are permitted to walk through the park areas, including scare zones, and may visit the interior of Haunt mazes. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information.

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent online or at Stroller Rental, located near the park entrance behind the Wonderland Store. However, since wheelchairs, ECV's, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own.

Wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park Associate will be happy to provide any assistance you may need at that time. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park. Manual Wheelchairs are available at ride locations with Wheelchair Lifts if weight exceeds the max capacity

GUESTS USING WHEELCHAIRS OR ECV'S

We require a safe speed be maintained while traveling in the park by Guests who choose to use a wheelchair or ECV. Wheelchairs and ECV's cannot be accommodated on rides and attractions. For information on water wheelchairs in the waterpark, please see the Water Wheelchair section.

On rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A wheelchair lift is available at Alpen Fury, Behemoth, Leviathan, Thunder Run, Tundra Twister, and Wonder Mountain's Guardian to transport a Guest in a wheelchair to our second story ride platform. Please use the call button at base of lift to request service. Manual wheelchairs are available at all locations with a wheelchair lift if weight exceeds the max posted capacity. If an ECV has attachments to the vehicle which could impede with the operation of a lift or with safe lift ingress and egress, please transfer to a manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask an Associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Ride Accommodations. Canada's Wonderland personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may recharge their wheelchair battery at the Rental Centre at the front gate.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. In Splash Works, Guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF A LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on: Alpen Fury, Backlot Stunt Coaster, Behemoth, Dragon Fyre, Drop Tower, The DareDeviler, The Fly, Ghoster Coaster, Leviathan, Lumberjack, Mighty Canadian Minebuster, Psyclone, Riptide, Shockwave, Skyhawk, Sledge Hammer, SlingShot, SNOOPY'S™ Racing Railway, Soaring Timbers, Swing of the Century, The Bat, The Fly, Thunder Run, Tundra Twister, Vortex, Wilde Beast, WindSeeker, and Yukon Striker.

Maximum and minimum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrances of: Alpen Fury, Behemoth, Leviathan, Lumberjack, Skyhawk, Soaring Timbers, Tundra Twister, and Yukon Striker.

The manufacturer requires a maximum Guest height on the following rides: Behemoth (80"), Frequent Flyers (60"), Joe Cool's Dodgem School (54"), Leviathan (80"), Silver Streak (76"), SlingShot (79"), SNOOPY™ vs. Red Baron (54"), SNOOPY'S™ Racing Railway (77"), SNOOPY'S™ Space Race (60"), Soaring Timbers (77"), Splash Station Slides (48"), Swing Time (54"), The DareDeviler (78"), White Water Canyon (76"), and Yukon Striker (77").

LOOSE ARTICLES

Most rides cannot accommodate loose articles. This includes cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Canada's Wonderland is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body.

On Alpen Fury and Yukon Striker, loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line and must be stored in a locker or with a non-Rider.

For safety reasons, cell phone usage, taking pictures and filming on most rides are prohibited.

Glasses must be secured on all rides. On AlpenFury, Riptide, Shockwave, Skyhawk, SlingShot, Soaring Timbers, Timberwolf Falls, Tundra Twister, and Yukon Striker, glasses must be secured by an athletic strap, or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

Sensory headphones or helmets may be accommodated on select rides. Please see an Associate for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Canada's Wonderland are turned in to Lost and Found at the front gate. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Please complete a Lost and Found form at the ride or log on to sixflags.com/lost-and-found to ensure the item is returned to you if it is found.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnetics are used at the following attractions: Alpen Fury, Backlot Stunt Coaster, Behemoth, Drop Tower, Leviathan, Skyhawk, SNOOPY'S™ Racing Railway, Wonder Mountain's Guardian, and Yukon Striker. Guests with

medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.) should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on Antique Carrousel and Character Carrousel. The tank must fit safely in the chariot. For your convenience, the park's First Aid station will be able to appropriately store your additional oxygen tanks during your visit.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the restraint mechanism to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact Guests with certain medical conditions. Attractions utilizing these effects include: Alpen Fury, Behemoth, Boo Blasters on Boo Hill, The Fly, Ghoster Coaster, Leviathan, Soaring Timbers, Taxi Jam, Thunder Run, WindSeeker, Wonder Mountain's Guardian, and Yukon Striker.

PROPER ATTIRE

For the safety and enjoyment of our Guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride fully clothed and with shoes. Proper attire is required to be worn in queues and all park pathways. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. On all roller coasters, Riptide, Skyhawk, SlingShot, Soaring Timbers and Spinovator, scarves will be required to be tucked in or removed. Loose fitting shoes may be removed before riding: Blast Off!, Drop Tower, Lumberjack, Psyclone, Riptide, Shockwave, Silver Streak, Skyhawk, Sledge Hammer, SlingShot, Swing of the Century, Swing Time, The DareDeviler, Tundra Twister, WindSeeker, and Yukon Striker.

Swimwear is not permitted on rides outside of Splash Works with the exception of Timberwolf Falls, and White Water Canyon. Thongs or transparent clothing are not permitted.

Additionally, jewelry, such as necklaces, bracelets, dangling earrings, and rings are prohibited on Muskoka Plunge.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Ability to exhibit independent seated postural control under the dynamic conditions of the ride.

The Guest must have body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck, and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.

The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.

Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to hold on with two functioning arms.

Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to brace self with one functioning leg.

Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg, or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to brace self with two functioning legs.

Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg, or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Minimum of two functioning extremities.

Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.

Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit the attraction within specified parameters without endangering self or others.

Guests must be able to enter and exit the ride without jeopardizing themselves or others, and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our Associates and Guests, Associates are instructed not to perform any lifting of Guests.

Appropriate observed behaviour.

Guest demonstrates appropriate observed behaviour indicating a willingness and ability to participate and/or follow Rider requirements. Appropriate observed behaviour may include, but not be limited to, maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment, and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate centre of gravity, appropriate observed behaviour, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

AlpenFury ⚡

Guests must be between 54" and 81" tall to ride.

A dual-launch roller coaster that propels Riders vertically out of Wonder Mountain before hurtling through twists and turns of nine inversions. Riders will experience high speeds, weightlessness, and rapid movements from side-to-side

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis, and additional padding constrains both legs across the shins. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of four functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride. Prostheses are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit. A wheelchair lift is available to transport Guests to the ride platform. Please use the button at the exit to receive Operator assistance. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems during the ride.

Antique Carrousel 1

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are permitted in chariot seating

A classic carrousel with both stationary and jumper horses, as well as two chariots.

Restraint System: Due to the inherent nature of this ride, Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must ride in a chariot.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests who do not have the ability to hold on with one functioning arm, or do not have independent seated postural control, an appropriate centre of gravity, or appropriate observed behavior must ride in a chariot with a Supervising Companion. Guests with a full leg cast must ride in a chariot.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, and are permitted to ride on the ride platform or chariots.

Backlot Stunt Coaster ⚡

Guests must be 48" tall to ride.

Maximum Weight – 300 lb. per Rider.

A steel LIM roller coaster that launches Riders up to 65 kilometres per hour in 4 seconds. Riders will experience high speeds, weightlessness, rapid movements from side-to-side, and a tunnel.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis, and additional padding constrains both legs across the shins. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities: one functioning arm and two functioning legs. Guests with a cervical collar, neck brace,

broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an associate if you wish to use that row. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems.

Beagle Brigade Airfield 2

Guests must be 36" tall to ride alone OR accompanied by a Supervising Companion to ride. Hand-held infants are not permitted. There is a maximum of 1 Guest over 60" per unit.

Maximum Weight – 386 lb. per unit

A set of WWII style suspended aircraft that whip around an oblong course.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Behemoth 5

Guests must be between 54" and 80" tall to ride.

A high-speed steel roller coaster with a combination of banked turns and airtime hills.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three extremities; one functioning arm that includes a hand and two legs that include a foot. Due to manufacturer requirements, a prosthetic leg is not a substitute for a leg amputation. Two functioning arms including hands are sufficient instead of two legs with feet as long as the amputation is below the ankle. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses at or above the ankle are not permitted.

Rider Access: Alternate access is available at the ride exit. A wheelchair lift is available to transport Guests to the ride platform. Please use the button at the exit to receive operator assistance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

Blast Off! 2

Guests must be 36" tall to ride. There is a maximum of 1 Guest over 60" per cycle.

Maximum Weight – 700 lb. per cycle

This children's ride hoists Riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities: one functioning arm that includes a hand and two functioning legs. Guests may ride with one leg amputation: amputation must be at the knee or below. Guests with the leg amputation must be at least 42" tall to ride or be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower

body casts (foot, lower leg, etc.) are not permitted on this ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Boo Blasters on Boo Hill 2

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight – 970 lb. per car

An interactive dark ride where Riders compete with other Riders for the high score. Cars slowly travel through scenes themed to a haunted mansion. Some of these scenes may frighten or startle younger children.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

WARNING: This ride contains strobe lighting.

Character Carrousel 1

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are permitted in chariot seating. Guests over 60" tall are not permitted to ride on a jumper horse.

Maximum Weight – 170 lb. per horse: 680 lb. per chariot

A children's carrousel with jumper horses and two chariots.

Restraint System: Due to the inherent nature of this ride, Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must ride in a chariot.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests who do not have the ability to hold on with one functioning arm, or do not have independent seated postural control, an appropriate centre of gravity, or appropriate observed behavior must ride in a chariot with a Supervising Companion. Guests with a full leg cast must ride in a chariot.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, and are permitted to ride on the ride platform or chariots.

Dragon Fyre 5

Guests must be 48" tall to ride.

A high-speed steel looping roller coaster which turns Riders upside down four times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Drop Tower 4

Guests must be 54" tall to ride.

Maximum Weight – 800 lb. per car

A free-fall ride that lifts Riders to the top of a structure and drops them. Riders will experience weightlessness and rapidly changing forces.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one of which must be an arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Guests without an appropriate centre of gravity with only one functioning leg may ride as long as they have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems.

Flying Canoes 2

Guests must be between 36" and 79" tall to ride. Guests must be 48" tall to ride alone OR 36" tall and accompanied by a Supervising Companion.

A family ride themed to the tale "The Flying Canoe." Riders control the height and movement of their canoe, while the ride gently rotates.

Restraint System: A shared lap bar and individual seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar or neck brace

are not permitted to ride. Guests who do not demonstrate appropriate observed behaviour must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Flying Eagles 3

Guests must be 44" tall to ride alone OR 36" tall and accompanied by a Supervising Companion.

Maximum Weight – 340 lb. per car

Riders ride in suspended cars that rotate in a circle. Once the ride's speed increases, Riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behaviour must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting. A stabilizing device, when requested, can be used to assist a Rider into the ride unit. Please inform an associate at the ride if you wish to use that device.

Frequent Flyers 2

Guests must be less than 60" tall to ride. Hand-held infants are not permitted.

A themed hot air balloon ride that spins and raises Riders in the air.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: with at least one functioning arm. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Ghoster Coaster 4

Guests must be 46" tall to ride alone OR 40" tall and accompanied by a Supervising Companion.

A junior wooden roller coaster with banked curves and airtime hills.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Joe Cool's Dodgem School 2

Guests must be between 36" and 54" tall to ride.

A children's bumper car ride where Riders maneuver their own car. Riders will experience strong side-to-side movement and rapidly changing forces and direction.

Restraint System: Individual shoulder straps are worn diagonally across the chest and under the arm of each Rider.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Jokey's Jalopies 2

Guests must be 46" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

An antique-styled car ride that slowly travels through a scenic journey on a designated track.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning arm or one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must be accompanied by a Supervising Companion. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals must be leashed and under the owner's control, are permitted to ride in the back row of the car, fit on the floor of the ride vehicle and seated on the floor, not the ride seat.

Jumpin' Jet 2

Guests must be 36" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted. There is a maximum of 1 Guest over 60" per row.

Maximum Weight - 440 lb. per row

A family ride themed to an airplane that rotates both in a clockwise and counter-clockwise direction, reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behaviour must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

KidZville Station 1

Guests must be 40" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

This is a slow moving miniature train ride.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Service animals must be leashed and under the owner's control, are permitted to ride in the back row of the car, fit on the floor of the ride vehicle and seated on the floor, not the ride seat.

Klockwerks 3

Guests must be 48" tall to ride alone OR 44" tall and accompanied by a Supervising Companion.

A circular family ride that carries Riders up and down to a height of 19 feet while rotating and oscillating in quick movements. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Krachenwagen 4

Guests must be 54" tall to drive OR 48" tall to ride as a passenger.

A bumper car ride where Riders drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing forces and direction.

Restraint System: An individual shoulder strap is worn diagonally across the chest and under the arm of each Rider.

Rider Criteria: Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Driver: Guests must have a minimum of three functioning extremities.

Passenger: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests with a visual impairment or who are not able to steer and press the accelerator must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Avoid head-on collisions.

Leviathan 5

Guests must be between 54" and 80" tall to ride.

A high-speed steel coaster, where Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three extremities; one functioning arm that includes a hand and two legs that include a foot. Due to manufacturer requirements, a prosthetic leg is not a substitute for a leg amputation. Two functioning arms including hands are sufficient instead of two legs with feet as long as the amputation is below the ankle. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses at or above the ankle are not permitted.

Rider Access: Alternate access is available at the ride exit. A wheelchair lift is available to transport Guests to the ride platform. Please use the button at the exit to receive operator assistance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

Lucy's Tugboat 2

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted. There is a maximum of 1 Guest over 60" per row.

This spinning tugboat ride travels back and forth over an upward, curved track.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Lumberjack 5

Guests must be 48" tall to ride.

A thrill ride that swings Riders upside down both forward and backward. Riders will experience weightlessness and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (excluding prosthesis). Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Prostheses are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

A large play structure with bridges, slides, and other interactive elements.

Rider Access: This attraction is wheelchair accessible on the ground level. Access to the elevated levels requires Guests to walk up several flights of stairs. Service animals may accompany Guests on the first level of this attraction.

A high-speed wooden roller coaster with a combination of banked turns and airtime bumps.

Rider Criteria: Guests must have a minimum of two functioning extremities; one arm and one leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Maximum Weight – 275 lb. per car

This children's ride allows Riders to ride in their own car that whips around an oblong track.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have at least one functioning arm (excluding prosthesis) and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Guests must be 54" tall to ride.

A thrill ride that swings Riders to a height of 115 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience weightlessness and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Riptide 5

Guests must be 54" tall to ride.

A thrill ride that takes Riders to a height of 48 feet in gondolas that lock in order to hold Riders upside down, and unlock to send Riders into 360 degree loops. Riders will experience weightlessness and rapidly changing forces and direction. On warmer days, water effects spray the gondolas, and Riders will get wet.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding..

Sally's Love Buggies 2

Guests must be 44" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

A circular children's ride where Riders use a handle to pump their car upwards to a height of 12 feet. Each cycle, Riders compete to see who gets there first.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Shockwave 5

Guests must be 54" tall to ride.

An inverting thrill ride where units rotate on a 360-degree axis while spinning to a maximum height of 64 feet around the centre hub. Riders will experience weightlessness, strong side-to-side movement, and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: two functioning arms. Leg amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

Silver Streak 4

Guests must be between 44" and 76" tall to ride.

A family suspended steel roller coaster. Riders will experience rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities that includes one functioning arm with a hand. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of arm prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Leg and/or foot prosthesis are not permitted on this ride. Guests with any leg prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Skyhawk

Guests must be 48" tall to ride.

A thrill ride where Guests ascend a 135-foot tower and maneuver the two wings of their unit to either fly gently from side-to-side, or wildly into 360-degree barrel rolls and inverted stalls. Riders will experience weightlessness, strong side-to-side movement, and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of one functioning arm. Leg amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of arm prosthesis should not ride unless they can ensure the device is properly secured and will remain

in place during the ride. Leg and/or foot prosthesis are not permitted on this ride. Guests with any leg prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints or wings for support as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

Sledge Hammer

Guests must be 54" tall to ride.

A thrill ride where spinning units are quickly propelled up to a height of 79 feet, only to free-fall downward and have the pattern repeated. Riders will experience weightlessness, strong side-to-side movement, and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

SlingShot 5

Guests must be 44" tall to ride.

Minimum Weight – 110 lb. per launch

A two-person capsule that is attached to steel cables and propels Riders into the air to a height of 301 feet. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses are not permitted.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

Note: This is an extra charge attraction.

SNOOPY'S™ Racing Railway 4

Guests must be 48" tall to ride alone OR 36" tall and accompanied by a Supervising Companion. Maximum height of 77".

A family launch coaster that accelerates from zero to 50 kilometres per hour in a matter of seconds before zipping through dips and turns.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

SNOOPY'S™ Revolution 2

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight – 830 lb. per unit

A miniature ferris wheel ride where Riders ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift. Service animals must be leashed and under the owner's control, are permitted to ride in the gondola, fit on the floor of the ride vehicle but must be seated on the floor, not the ride seat.

SNOOPY'S™ Space Race 2

Guests must be less than 60" tall to ride. Hand-held infants are not permitted.

A children's ride themed to rocket ships that gently spins and raises Riders in the air.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: with at least one functioning arm. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

SNOOPY™ vs. Red Baron 2

Guests must be between 36" and 54" tall to ride.

A slow moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Soaring Timbers 5

Guests must be between 54" and 77" tall to ride.

A thrill ride where two gondolas maneuver sweeping arcs and flip independently of each other while rotating and spinning to a maximum height of 66 feet around the centre hub. Riders will experience weightlessness, strong side-to-side movement, and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of one functioning arm (excluding prostheses). Leg amputations must be below the knee. Guests with a cervical collar, neck brace,

or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: This ride contains strobe lighting.

Spinovator 3

Guests must be 52" tall to ride alone OR 48" tall and accompanied by a Supervising Companion.

A circular ride where ride units move in the opposite direction of the ride table, spinning Riders in two opposing directions. Riders will experience rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Sugar Shack 2

Guests must be 36" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted. There is a maximum of 1 Guest over 60" per unit.

A children's ride that travels a circular path while Riders control the spin of their bucket.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm with a hand (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Swan Lake 1

Guests must be 48" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted. Guests over 60" tall must be accompanied by a Guest under 60". There is a maximum of 1 Guest above 60" per unit.

A scenic ride where Riders gently float in a swan boat along a track in a pond.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. In the back row, an individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Swing of the Century 3

Guests must be 48" tall to ride.

Maximum Weight – 230 lb. per Rider

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Swing Time 1

Guests must be between 36" and 54" tall to ride.

A child-size chair swing with free hanging seats suspended from a gently rotating tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any

type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Taxi Jam 2

Guests must be 36" tall to ride.

A junior steel roller coaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

The Bat 5

Guests must be 48" tall to ride.

A high-speed steel looping roller coaster which turns Riders upside down three times forward, and then again while traveling backward. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of one functioning arm that includes a hand. Two legs of which only the feet may be missing, or a minimum of one natural leg including (partial) foot and one upper leg which extends to the end of the seat is required. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Arm prostheses are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

The DareDeviler 5

Guests must be between 52" and 78" tall to ride.

A high-speed suspended steel roller coaster which turns Riders upside down five times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two legs of which only the feet may be missing, or a minimum of one natural leg including (partial) foot and one upper leg which extends to the end of the seat is required. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Prostheses are not permitted on this ride.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

The Fly 4

Guests must be 54" tall to ride alone OR 44" tall and accompanied by a Supervising Companion.

A steel roller coaster with airtime hills and hairpin turns.

Treetop Adventure 2

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight – 462 lb. per unit

A slow-moving family ride themed to helicopters that takes Guests along an elevated track 15 feet above the ground.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have at least one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit to the left. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Tundra Twister 5

Guests must be 54" tall to ride.

A giant looping ride with rotating gondola arms that will have guests spinning, twisting, and twirling 360-degrees upside down at heights of 47 meters and speeds of 75 kilometres per hour.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraints, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of one functioning arm (excluding prostheses). Leg amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the left. A wheelchair lift is available to transport Guests to the ride platform. Please use the button at the exit to receive operator assistance. Riders will have to take several steps, on their own or with the assistance of a companion, and be

capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

Viking's Rage 3

Guests must be 48" tall to ride alone OR 39" tall and accompanied by a Supervising Companion.

A swinging ship that produces a feeling of weightlessness as it swings back and forth.

Restraint System: A shared lap bar secures all Riders in the row. Riders between 39" and 48" tall must be seated in the four rows closest to the mast of the ship and sit toward the middle of the row with their Supervising Companion.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Vortex 4

Guests must be 42" tall to ride.

A suspended roller coaster with cars that hang down from the track and swing out to the sides as the ride drops and turns.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg residual limbs sufficient

to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

White Water Canyon 4

Guests must be between 46" and 76" tall to ride.

A family water ride where Guests travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

Note: Loose articles, including footwear, may not be left on the platform. All loose articles must be brought on board the raft with Riders. These items will get wet. Please consider leaving loose articles with a non-Rider.

WARNING: Boats may bump into the side of channel and other boats.

Wilde Beast 4

Guests must be 48" tall to ride.

A wooden roller coaster with large drops, banked turns, and enclosed tunnels.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one arm and one leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Wilde Knight Mares 4

Guests must be 54" tall to ride.

A spinning thrill ride where Guests ride in a standing position. Centrifugal force presses Riders back against the backrest while the ride rises to a vertical position. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A door with a safety chain encapsulates the ride unit to secure Riders.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WindSeeker 4

Guests must be 52" tall to ride.

Maximum Weight – 304 lb. per ride unit.

A chair swing that spins and swings Riders to a 45 degree angle while ascending a giant 301-foot tower.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of one functioning arm. Let amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: This ride contains strobe lighting.

Wonder Mountain's Guardian 4

Guests must be 48" tall to ride alone OR 42" tall and accompanied by a Supervising Companion.

A steel roller coaster blended with interactive video-based gaming, where Riders compete with other Riders for the high score. In the final harrowing scene, cars drop 30 feet in a surprising freefall element. Riders will experience weightlessness, high speeds, and prolonged moments of darkness.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of one functioning arm that includes a hand. Leg amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. A wheelchair lift is available to transport Guests to the ride platform. Please use the call button at the base of the lift to request assistance. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

Woodstock Whirlybirds 3

Guests must be 36" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted. There is a maximum of 1 Guest over 60" per unit.

Maximum Weight – 440 lb. per unit

A children's ride that elevates and travels a circular path while Riders control the spin of their unit.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or full arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Yukon Striker 5

Guests must be between 52" and 77" tall to ride.

A high-speed, floorless looping dive roller coaster which turns Riders upside down four times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three extremities that includes one functioning arm with a hand. Two functioning arms including hands are sufficient instead of three extremities if the Guest has a normal centre of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining

leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate access is available at the ride exit to the right. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

SPLASH WORKS WATERPARK

Each attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	This is a low speed, and or shallow water attraction.
Mild Thrill Rides	2	This is a low to medium speed attraction, and/or water depth to 48 inches. Some Rider control, maneuvering and/or swimming skills required.
Moderate Thrill Rides	3	This is a medium speed attraction. Height and water depth may vary Moderate or unexpected forces can be generated during the ride. This attraction may require Rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Rides	4	This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires Rider body control and strong swimming skills.
Aggressive Thrill Rides	5	This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires Rider body control and swimming skills.

Appropriate Attire

Appropriate swimwear is required. Thongs and transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. Guests wearing bathing attire with metal buttons, rivets, zippers, or snaps will not be permitted to ride Lakeside Lagoon – Slides, Muskoka Plunge or Splash Station – Slides. Jewelry including but not limited to, necklaces, bracelets, dangling earrings, and rings other than wedding bands are prohibited on Muskoka Plunge. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed to prevent any interference with the ride experience. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Contact lenses are not recommended. Guests requiring special accommodation should speak to a member of the Aquatics Supervisory Team.

Life Jackets

Life jackets are available for all Guests. Only Canadian Coast Guard, Department of Fisheries and Oceans, or Department of Transport Canada approved life jackets are allowed as floatation devices. Life jackets are provided free of charge for Guests who require one.

In wave pools, life jackets are required for Guests who are less than 52" tall in bare feet, participants under 10 years of age, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers

At White Water Bay, children who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion.

In other attractions requiring life jackets, children who are less than 48" tall in bare feet, or those who are inexperienced or non-swimmers must wear a life jacket. Children who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. This policy will be enforced at Lazy River.

Ongoing Lifeguard Training

In an ongoing effort to provide a safe and enjoyable waterpark experience for our Guests, Splash Works routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water manikins, the use of video surveillance equipment, internal and external audits, and active/inactive water rescues and/or first aid scenarios.

Scales

Red light/green light scale systems are used at weight sensitive attractions. Guests who exceed the weight requirement will not be permitted to ride. Scales are used at Barracuda Blaster, Moosehorn Falls, Muskoka Plunge, Super Soaker, The Plunge, and Typhoon.

Swim Diapers

Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

Water Wheelchairs

A water wheelchair is available for Guests requiring additional assistance when gaining access into Lakeside Lagoon – Pool, Lazy River, Pumphouse (ground level only), Splash Station (ground level only), Sprayground, and White Water Bay. The water wheelchair may be used by multiple Guests on the same day. While in the wave pool, the water level may not exceed the height of the seat on the chair. Guests participating in a wave pool are permitted to use a personal wheelchair. Personal wheelchairs are permitted up to the seat's water depth. Guests utilizing wheelchairs will not be required to utilize a life jacket while in the wave pool only if their height exceeds 52". Guests may choose to use a water wheelchair instead of a personal wheelchair. While using either a personal wheelchair or a water wheelchair, Guests must not utilize the wheelchair's seatbelts while in the wave pool.

Motorized or electric personal wheelchairs will be permitted at Pumphouse (ground level only), Splash Station (ground level only), and Sprayground. Walkers, canes, or other assistive devices are permitted only at ankle depth in the following attractions: Lakeside Lagoon – Pool and White Water Bay.

During your visit, please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair and for further accessibility information.

WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate centre of gravity, appropriate observed behaviour, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride. Please use caution when entering and exiting waterpark

attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

Barracuda Blaster 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 250 lb. per Rider and 400 lb. per tube

Maximum of two Riders per tube

A thrilling tube slide where Riders descend down a darkened enclosed flume before exiting into an open-air circular basin which sends Riders spiraling in circles. Once momentum subsides, the ride continues into one last enclosed flume before finishing in a 36" (92 cm) depth splash pool. Riders will experience high speeds and rapid movements from side to side.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Note: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

Black Hole 5

Guests must be 48" tall in bare feet to ride.

Maximum one Rider per slide

A thrilling tube slide where Riders twist and turn in an enclosed flume in near complete darkness before finishing in a 42" (107 cm) depth splash pool. Riders will experience high speeds and rapid movements from side-to-side.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Lakeside Lagoon – Pool 1

Hand-held infants must remain with a Supervising Companion.

A children's pool with spray jets and interactive water features with a maximum water depth of 19" (48 cm).

Rider Criteria: Guests must have the ability to enter and exit the ride safely, maintain seated postural control, and demonstrate appropriate observed behaviour. Guests who do not meet these requirements must be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for Guests requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Lakeside Lagoon Slides – Family 1

Guests over 60" tall in bare feet must be accompanied by a child. Hand-held infants are not permitted.

Maximum one Rider over 60" and one under 60" per slide
OR three Riders under 60" per slide

A children's body slide where Riders can ride down a wider slide on their own or together with one adult, or two other children. This slide finishes in a runoff.

Rider Criteria: Riders are required to sit with feet facing forward. Guests must have a minimum of two functioning extremities. Guests must also have the ability to maintain seated postural control and enter and exit the ride safely. Guests who do not meet these requirements must ride the family slide with a Supervising Companion. Guests must also have the ability to demonstrate appropriate observed behavior. Hand-held infants are not permitted to ride slides. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride. Prostheses with exposed metal parts are not permitted on most waterpark attractions. Guests with prosthesis should check with Guest Services to determine if they are eligible to ride without the prosthesis.

Rider Access: Access to the tower requires climbing a few steps, and ascending an incline. Riders need to ascend the steps and incline on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Lakeside Lagoon Slides – Individual 1

Guests must be under 60" tall in bare feet to ride. Hand-held infants are not permitted.

Maximum one Rider per slide

A set of children’s body slides where Riders can ride down a gentle slope on their own racing two other Riders. The slides finish in a runoff.

Rider Criteria: Riders are required to sit with feet facing forward. Guests must have a minimum of two functioning extremities. Guests must also have the ability to maintain seated postural control and enter and exit the ride safely. Guests who do not meet these requirements must ride the family slide with a Supervising Companion. Guests must also have the ability to demonstrate appropriate observed behavior. Hand-held infants are not permitted to ride slides. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride. Prostheses with exposed metal parts are not permitted on most waterpark attractions. Guests with prostheses should check with Guest Services to determine if they are eligible to ride without the prosthesis.

Rider Access: Access to the tower requires climbing a few steps, and ascending an incline. Riders need to ascend the steps and incline on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Lazy River 2

Children must be 42" tall in bare feet to ride alone OR accompanied by a Supervising Companion. Children under 48" tall in bare feet, children under 10 years of age, or those who are inexperienced or non-swimmers are required to wear a life jacket. A Supervising Companion may accompany up to 2 children. Hand-held infants must be accompanied by a Supervising Companion.

A slow moving, winding river tube ride at a depth of 36" (92 cm).

Rider Criteria: Guests must have a minimum of two functioning extremities. Guests must also have the ability to maintain seated postural control and enter and exit the ride safely. Guests must have the ability to demonstrate appropriate observed behavior. Guests who do not meet these requirements must ride with a Supervising Companion. Hand-held infants must also be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Guests use an inner tube that can accommodate one Rider each. Guests under 42" may ride in the same inner tube as the Supervising Companion. Access is available via the zero depth entry. A water wheelchair is available for participants requiring additional assistance. Riders will have to transfer to a tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Moosehorn Falls 5

Guests must be 42" tall in bare feet to ride.

Maximum Weight – 1,000 lb. per raft

Minimum three Riders per raft; Maximum six Riders per raft

A thrilling family raft ride where riders experience open-air turns and drops, before cresting a 13-metre (42') wall and finally finishing in a 36" (90 cm) depth catch pool with stairs. Riders will experience high speeds and rapid movements from side-to-side.

Rider Criteria: Riders are required to remain seated with back against the raft, legs crossed, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion. Please use caution when entering and exiting as the raft may shift. The raft and surrounding area may also be slippery.

Note: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

Mountain Bay Cliffs

Guests must be 54" tall in bare feet to participate.

Guests will experience the exhilaration of cliff jumping from a variety of heights into the water below. Guests will have the option to jump from 3.0 metres (10 feet), 5.0 metres (16.5 feet), or 7.5 metres (25 feet).

Rider Criteria: Guests must jump looking straight ahead, jump feet first with your legs straight, held firmly together, with feet pointed downwards, and arms down at your side. Guests should be aware of the deep water (up to 15') and strong swimming skills are required. Guests must have the ability to maintain proper riding position and be able to exit the pool on their own. Guests must have a minimum of two functioning extremities; two functioning legs. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to this attraction requires climbing several flights of stairs. Guests will have to ascend the cliff and be capable of safely entering the platform area, on their own or with the assistance of a companion.

Note: Loose articles are not permitted, including, but not limited to, necklaces, rings, glasses, goggles, non-aquatic footwear, and hats.

Muskoka Plunge 5

Guests must be 48" tall in bare feet to ride.

Minimum Weight – 45 lb. per Rider

Maximum Weight – 300 lb. per Rider

Maximum one Rider per slide

Riders stand in an enclosed capsule where the floor drops launching them down high speed drops and banked turns before ending in a water-filled runout. Riders will experience high speeds, weightlessness, and rapid movements from side to side. Maximum water depth is 6".

Rider Criteria: Riders must stand with their head and back against the slide, legs firmly crossed at the ankles, with arms folded across the chest, and be able to maintain position throughout the ride. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Prostheses are not permitted on this ride. Guests should check with Guest Services to determine if they are eligible to ride without the prosthesis.

Rider Access: Access to the attraction requires climbing several flights of stairs, and ascending an incline. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Note: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

Note: Loose articles are not permitted, including, but not limited to, piercings, necklaces, and rings.

Pumphouse 1

Hand-held infants must remain on ground level with a Supervising Companion.

A zero depth play structure with a host of wacky interactive activities including waterfalls, rotating water jets, and a giant tipping bucket.

Rider Criteria: Guests unable to maintain seated postural control must be accompanied by a Supervising Companion. Guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction. Guests with a broken collar bone are not permitted to participate.

Rider Access: This attraction is wheelchair accessible on the ground level. Access to the elevated levels requires Guests to climb several flights of stairs. A water wheelchair is available for Guests requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair. Motorized/electric personal wheelchairs are permitted on splash pads.

Riptide Racer 4

Guests must be 40" tall in bare feet to ride

A mat racing slide where rival sliders compete for first place as they descend down the slide before finishing in a runout. Riders will experience high speeds.

Rider Criteria: Guests must be lying down on a mat, facing forward, and firmly grasping the handles throughout the ride with elbows tucked in towards the body. Guests must have a minimum of two functioning extremities; two functioning arms. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a mat. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Splash Station – Slides 1

Guests must be between 36" and 48" tall in bare feet to ride.
Maximum one Rider per slide

A set of two children’s body slides where Riders gently twist and turn in an enclosed flume while riding on their back, before finishing in a runoff.

Rider Criteria: Guests must ride feet first. Guests must have a minimum of two functioning extremities; sufficient upper extremities to maintain the proper riding position and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Prostheses with exposed metal parts are not permitted on most waterpark attractions. Guests with prostheses should check with Guest Services to determine if they are eligible to ride without the prosthesis.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Splash Station – Structure 1

Hand-held infants must remain on ground level with a Supervising Companion.

A wet and wild zero depth children’s play structure with interactive water features and a large tipping bucket.

Rider Criteria: Guests unable to maintain seated postural control must be accompanied by a Supervising Companion. Guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction. Guests with a broken collar bone are not permitted to participate.

Rider Access: This attraction is wheelchair accessible on the ground level. Access to the elevated levels requires Guests to climb several flights of stairs. A water wheelchair is available for Guests requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair. Motorized/electric personal wheelchairs are permitted on splash pads.

Super Soaker 5

Guests must be 40" tall in bare feet to ride. Guests between 40" and 48" tall in bare feet must wear a life jacket and be accompanied by a Supervising Companion.

Maximum Weight – 800 lb. per raft

Minimum two Riders per raft; Maximum four Riders per raft

A thrilling family raft ride where Riders experience both open-air and darkened enclosed turns and drops, before finishing in a 37" (94 cm) depth splash pool. Riders will experience high speeds and rapid movements from side-to-side.

Rider Criteria: Riders are required to remain seated with their back against the raft, legs crossed, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion. Please use caution when entering and exiting as the raft may shift. The raft and surrounding area may also be slippery.

Note: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

The Plunge 5

Guests must be 40" tall in bare feet to ride. Guests between 40" and 48" tall in bare feet must wear a life jacket and be accompanied by a Supervising Companion.

Maximum Weight – 800 lb. per raft

Minimum two Riders per raft; Maximum three Riders per raft

A thrilling family raft ride that takes Riders down a high speed triple drop, before finishing in a 37" (94 cm) depth splash pool. Riders will experience high speeds and weightlessness.

Rider Criteria: Riders are required to remain seated with their back against the raft, legs crossed, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion. Please use caution when entering and exiting as the raft may shift. The raft and surrounding area may also be slippery.

Note: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

Typhoon 4

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 250 lb. per Rider

Maximum one Rider per slide

A thrilling tube slide that takes Riders through both open-air and darkened enclosed flumes, along with giant oscillating funnels. Once momentum subsides in each funnel, the ride continues onwards before finishing in an 18" (46 cm) depth runout. Riders will experience high speeds, weightlessness, and rapidly changing forces and direction.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the tower requires climbing several flights of stairs, and ascending an incline with a tube. Riders need to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Note: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

Waterways 2

Guests must be 36" tall in bare feet to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum two Riders per tube

A gentle children's tube slide which runs a serpentine course before finishing in a 24" (61 cm) depth splash pool.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires ascending an incline with a tube. Riders will have to ascend the incline and be capable of safely entering the tube, on their own or with the assistance of a companion.

Whirlwinds 3

Guests must be 40" tall in bare feet to ride. Guests between 40" and 48" tall in bare feet must wear a life jacket.

Maximum one Rider per slide

A tube slide which takes Riders down an intertwining flume of twists, turns, and gentle drops, before finishing in a 42" (107 cm) depth splash pool.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs, and ascending an incline with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

White Water Bay 3

Life jackets are required for Guests who are less than 52" tall in bare feet, children under 10 years of age, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Guests who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to 2 Guests.

A large wave pool with depths ranging from 0 ft. to 6 ft. (183 cm). Waves are generated for 5 minutes on, and then 5 minutes off. **Strenuous activity is required during wave action cycles which may require the ability to swim and which may result in fatigue. Exercise caution. Participants**

with a history of seizures—or heart or other serious medical conditions—should be supervised by someone who knows how to swim and how to provide emergency assistance.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held infants' participation or water depth may be restricted if necessary and must be accompanied by a Supervising Companion. Guests with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for participants requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

To participate in a Wave Pool, a Guest who is non-ambulatory must wear a life jacket and be accompanied by a Supervising Companion if they do not have an assistive device – wheelchair, walker, or cane(s). A Guest in a wheelchair will not be required to wear a life jacket if their height exceeds 52". Guests in either water wheelchairs or personal wheelchairs will be asked to not utilize the wheelchair's seatbelts while in the Wave Pool. Personal wheelchairs are permitted in wave pools up to the water depth of the seat. Walkers and canes may be permitted in wave pools up to ankle depth.

ENTERTAINMENT VENUES

Due to the popularity of our shows, we suggest arriving early as seating may be limited. Show schedules are available at Guest Services, on the Canada's Wonderland mobile app, and at any theater entrance. All Entertainment venues are accessible to Guests who require mobility assistance. Assistive listening devices are available for Guests at select theater locations. Large print scripts may also be available. Ask any Associate at the venue for assistance.

Canterbury Theatre

Canterbury Theatre, located in Medieval Faire, is an indoor, air conditioned theater featuring main stage show productions. There are viewing areas that accommodate wheelchairs and companions at the front, middle, and rear of the theater. Please ask an usher for assistance.

International Showplace

International Showplace, located on the south side of Wonder Mountain, is a covered, outdoor amphitheatre with bench seating. There are viewing areas that accommodate wheelchairs and companions at the front and rear of the theatre. Please ask an usher for assistance.

Playhouse Theatre

Playhouse Theatre, located in KidZville, is a covered, outdoor children's theater with bench seating. There is a viewing area that accommodates wheelchairs and companions at the rear of the theater. Please ask an usher for assistance.

HALLOWEEN HAUNT®

Halloween Haunt at Canada's Wonderland has extreme attractions that are designed to scare and startle. During this event, the park and certain attractions will have areas of low lighting, strobe lighting, loud sounds, and dense fog.

Characters in our Halloween Haunt attractions will not touch you; please do not touch them in any manner. Guests who do will be removed from the park without refund. Rowdy behaviour and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access is available. Please visit Guest Services for more information. Service animals are welcome to attend Halloween Haunt events. They are permitted to walk through the park areas, including scare zones. Please adhere to all posted and verbal warnings and directions.

CAMP SPOOKY

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions or services offered visit Guest Services.

WINTERFEST

Canada’s Wonderland’s WinterFest is filled with delightful holiday cheer for Guests of all ages. Many areas of the park will have low lighting, fog, and strobe-styled lighting. Guests with a history of seizures or epilepsy should be aware of flashing and strobe-styled lighting that will be present throughout the park. Please refer to individual attractions for usage criteria.

Snow Flake Lake

Guests under 48" must be accompanied by a Supervising Companion and wear a helmet to participate.

Ride Description: This traditional styled ice skating rink allows participants to skate in one direction around the ice rink. Ice skates are required for all participants on the ice. Speed skating, roughness, excessive speeding, or weaving through other skaters is prohibited.

Rider Criteria: Guests must have appropriate observed behaviour to participate. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to participate. Lower body casts (foot, lower leg, etc.) are not permitted on this attraction.

Rider Access: Alternate access is available at the attraction exit. Access to this attraction requires Guests to be able to take several steps and step on to the ice on their own or with the assistance of a companion. Wheelchair and children's skate assists are available on a first come, first served basis. Please see an ice rink Associate for details.

Note: This is an extra charge attraction.

WARNING

Many rides at Canada's Wonderland are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speeds, steep drops, sharp turns, or other dynamic forces. If you choose to ride, you accept all of these risks. Restrictions for Guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Attraction Accessibility Program available at Guest Services. Participate responsibly. You should be in good health to ride safely. You know your physical conditions and limitations, Canada's Wonderland does not. If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **do not ride!**

All restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened and tightened properly to allow Guests to ride.

Information in this guide is subject to change.
