Kings Dominion & Soak City

GUEST ACCESSIBILITY GUIDE

Welcome to Kings Dominion!

We are glad you are here! At Kings Dominion we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment and we want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back, or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices, or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Team Members to help accommodate you.

RIDE SAFELY

Virginia State Law requires all Riders to obey all warnings and directions and behave in a manner that will not cause or contribute to injuring themselves or others. Riders shall report all injuries before leaving.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions, known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or First Aid. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **do not ride**.

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **For your safety, do not enter an unauthorized area for any reason.**You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper Rider positioning until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Six Flags Over Texas is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone or electronic usage while riding is prohibited.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted at Kings Dominion.

RIDE RATING SYSTEM

A Ride Rating Program has been designed to provide a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	Rides that are generally calm and gentle in nature.
Mild Thrill Rides	2	Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	3	Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	4	Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction, and/or elevation.
Aggressive Thrill Rides	5	Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction, and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates Wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum Speed of Ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum Height of Ride
	Maximum Water Depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

 This symbol is used to identify rides where Riders may remain in their wheelchair.

 This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

 This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Kings Dominion uses the following terms:

 **Ability to Hold On or Brace:** Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

 **Hand-held Infant:** Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Carousel (in a chariot), Eiffel Tower, Lazy Rider, and Tidal Wave Bay (water depth may be restricted). Hand-held infants and their Supervising Companion may also enjoy Lighthouse Landing, Lil' Barefoot Beach, and Splash Island but may not participate on the elevated sections of the attractions.

 **Supervising Companion:** A Supervising Companion is someone who meets all the requirements to ride the ride themselves, who is at least 54" in height, and demonstrates appropriate observed behavior. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Assistance Guide or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines, and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a Rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride Americana, Carousel, Eiffel Tower, Flying Eagles, Lazy Rider, Lighthouse Landing (pool and interactive activities only), Tidal Wave Bay, Lil' Barefoot Beach, Sand Dune Lagoon, and Splash Island.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be "officially" measured at the Height Check Station on International Street. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height measuring device may be used during the height measuring process. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, a shoe which does not contribute excessively to the Guest's height is required. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Kings Dominion reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

In Soak City, height measurements are taken in bare feet. *(There is a separate height wristband system for Soak City).*

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions, in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Guest Services upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services Associate will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request reasonable accommodations are encouraged to obtain the IBCCES Accessibility Card (IAC) by registering at **accessibilitycard.org** or via the Accessibility Card mobile app. Once a Guest has filled out the online application and uploaded necessary documentation into a secure online portal, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to Guest Services upon their arrival at the park to express their accommodation needs. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Team Member will provide the details needed to participate in the program.

Note: Only IBCCES can issue the IBCCES Accessibility Card, and not Kings Dominion.

CASTS AND BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on most slides in Soak City.

The following chart displays the cast and brace rules for all rides and attractions.

- **C** Must ride in a chariot
- **F** Cast/brace must fit safely in the ride unit
- **O** Not permitted to participate on elevated activity area
- **Y** May ride with the condition
- **Z** Participation or water depth may be restricted if necessary

PROSTHESIS

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit designated park locations for assistance before riding to ensure a safe experience.

Guests with prosthesis are advised to consult with the Kings Dominion Supervisory Team for guidance during their visit.

For certain rides, manufacturers may require documentation from the prosthetic device's manufacturer confirming it is designed to withstand high-speed roller coaster forces of up to 68 mph and G-forces between 1 to 5 Gs, with sufficient safety measures in place.

Rides requiring additional documentation: Delirium, Drop Tower, and Pantherian.

Prosthetics are **not** allowed on Dominator and Rapterra (leg prosthesis not allowed), Flight of Fear, Twisted Timbers, and WindSeeker (a Rider with more than one lower body prosthetic is not allowed).

RIDE DEVICES

Guests with disabilities may be eligible to ride select attractions using a body harness provided by the park. Guests should visit designated park locations for assistance and to determine eligibility.

For safety reasons, certain attractions may require the removal of medical devices or prosthetics that are not securely fastened to the Rider's body. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

On rides equipped with removable seats, Guests using wheelchairs may transfer directly to the ride vehicle. Ride attendants and Guest service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific Rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

- Transfer devices, when requested, can be used to assist a Guest out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Apple Zapple, Great Pumpkin Coaster, Grizzly, Racer 75, Reptilian, Snoopy's™ Rocket Express, and Woodstock Express.
- Body harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Dominator and Rapterra.
- Hand controls, when requested, can be used to assist a Rider in operating a vehicle if unable to use the gas pedal. The following rides are equipped with hand controls: Blue Ride Tollway.
- In addition, specific ride vehicles are equipped with removable sides at Backlot Stunt Coaster and Boo Blasters on Boo Hill. These vehicles may further assist Riders in transferring from their wheelchair to the ride unit. Please inform an Associate at the ride if you wish to use that vehicle.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride Attendant or Guest Relations team member.

ADDITIONAL INFORMATION & SERVICES

Our goal is to make Kings Dominion as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large-Print Guest Accessibility Guides
Print versions of the Park Guide and Guest Accessibility Guide are available at Guest Services. Braille and large-print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Campground Shuttle Buses
An ADA accessible bus is available for transportation from the campground and select hotel partners to and from the park. Stop by Guest Services, the Campground Store, or hotel front desk for assistance.

Family Services
A space for nursing mothers is available at Family Care Center. Baby changing areas and a companion restroom can be found in most restrooms. Please feel free to ask a Team Member/Associate for directions to these locations or review a park map.

First Aid
Our First Aid facility located on International Street near the Eiffel Tower is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. In addition, a First Aid station is located in Soak City next to the lockers on the Southside of the waterpark. This location is open during Soak City operating hours. Emergency medical care is available for overnight Guests.

Hearing Needs
Assistive listening devices are available upon request. These lightweight, wireless devices amplify sounds using signals from transmitters located throughout the park and are recommended for Guests with mild to moderate hearing loss. For more details or to obtain a device, please visit Guest Services.

If you require American Sign Language (ASL) interpreting devices, we can provide them with at least seven days' advance notice for live show venues. Additionally, show scripts or score sheets can also be requested at each venue. To arrange ASL services, please complete the request form online at **sixflags.com/kingsdominion**.

Parking
Accessible parking is available on a first-come, first-served basis within the main parking lots of the park. When you arrive at the parking toll booths, ask a Team Member for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask a Team Member for directions to additional parking areas.

Quiet Room
Kings Dominion offers a Quiet Room, at the Family Care Center, for family members or caregivers to take a break and reduce sensory stimulation. Additionally, there are sensory features provided for Guest use.

Restrooms
Private restroom facilities for Guests needing the assistance of another Guest are available at First Aid, outside the Front Gate, next to Bad Apple across from Victoria's Pizza, at the Tidal Wave Bay Cabanas, and at the Southside Soak City Restroom. Wheelchair accessible stalls are located at all restrooms.

Rider Swap
The Rider Swap program allows one adult to stay with non-riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services near the front gate.

Service Animals
Service animals are welcome at Kings Dominion. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be house-broken, controlled with a restraining device, display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or Team Member will be directed to remove the animal from the park. There is a limit of one service animal per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on: Americana, Blue Ridge Tollway, Carousel, Eiffel Tower, Boo Blasters on Boo Hill, Flying Ace Balloon Race. Sally's Sea Plane, and SNOOPY's™ Junction. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. They may also attend the performances at Kings Dominion Theater. Service animals are not permitted in water attractions, wet decks, wading pools, or lazy rivers. They are permitted to walk through the park areas, including scare zones. However, for safety reasons, service animals are not permitted in any Haunt exterior or interior maze. Visit Guest Services for more information. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information

A Service Animal Relief Area is located in the grassy area next to First Aid. Owners are responsible for disposing of their animal's waste. Please look for the designated sign.

Special Dietary Needs
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles
A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at Upgrade Your Day inside the main gate and to the right. Online reservations are available for wheelchair/ECV rentals in advance of your visit. Reservations can be made by going to **sixflags.com/kingsdominion** and visit the rentals page under the Tickets tab. Rentals are also available at the park while supplies last. For those Guests who choose to use a battery powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park. Wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park Associate will be happy to provide any assistance you may need at that time. For any Guests using a personal Segway, please stop by Guest Services prior to entering the park.

GUESTS USING WHEELCHAIRS & ECV'S

We require a safe speed to be maintained while traveling in the park by Guests who choose to use a wheelchair or ECV. Wheelchairs and ECV's cannot be accommodated on most rides and attractions. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information. For information on water wheelchairs in the waterpark, please see the Water Wheelchair and Pool Lifts section.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A wheel chair lift is available at Grizzly, Rocket Express, Woodstock Express, Twisted Timbers, and Dominator to transport a Guest in a wheelchair to our second-story ride platform. Please use the call button at base of lift to request service. Manual wheelchair available at all locations with a wheelchair lift if weight exceeds the max posted capacity. If an ECV has attachments to the vehicle which could impede with the operation of a lift or with safe lift ingress and egress, please transfer to manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask an Associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Kings Dominion personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. In Soak City, Guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF A LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/ or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on Apple Zapple, Backlot Stunt Coaster, Delirium, Dominator, Drop Tower, Flight of Fear, Flying Ace, Great Pumpkin Coaster, Grizzly, Pantherian, Racer 75, Rapterra, Twisted Timbers, and Woodstock Express. Maximum and minimum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions. If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are also located at the ride entrance of Delirium, Dominator, Drop Tower, Pantherian, Rapterra, Tumbili, and Twisted Timbers.

The manufacturer requires a maximum Rider height on Drop Tower (80"), Pantherian (78"), Rapterra (78"), Reptilian (78"), and Tumbili (77").

LOOSE ARTICLES

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Kings Dominion is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body.

On Flight of Fear, Pantherian, Rapterra, and Twisted Timbers, loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line and must be stored in a locker or with a non-rider.

Using cell phones or other electronic devices for any purpose, including picture taking, is prohibited on most rides. Failure to comply may result in ejection from the park.

Glasses must be secured on all rides. On Tumbili and Twisted Timbers, glasses must be secured by an athletic strap or they cannot be worn on the ride.

At Twisted Timbers, metal detectors are in use. All loose items must be stored in a locker or left with a non-Rider prior to riding.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see an Associate for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Kings Dominion are turned in to Lost and Found. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported at **sixflags.com/lost-and-found**.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES.You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnets are used at the following attractions: Backlot, Drop Tower, Flight of Fear, Pantherian, Rapterra, and Tumbili. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: Americana, Blue Ride Toll Way, Boo Blasters on Boo Hill, Carousel (in a chariot), and the Eiffel Tower. The tank must fit safely in the ride unit and not interfere with the ride restraint system.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the ride restraint system to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

PHOTOSENSITIVITY/STROBE LIGHTING

Many attractions utilize special effects, including but not limited to: haze and other atmospheric effects, scents, areas of low lighting, loud music, sound effects, strobe lighting and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions. Attractions utilizing these effects include: Apple Zapple, Bad Apple, Boo Blasters on Boo Hill, Dominator, Flight of Fear, Great Pumpkin Coaster, Pantherian, Rapterra, Shenandoah Lumber Company, Twisted Timbers, WindSeeker, and Woodstock Expresss.

PROPER ATTIRE

For the safety and enjoyment of our guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride with shirts, shorts, and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. Loose-fitting shoes may only be removed before riding Charlie Brown's Wind Up, Delirium, Dominator, Drop Tower, Flying Ace, Kite Eating Tree, Rapterra, Wave Swinger, and WindSeeker.

Swimwear is not permitted on rides outside of Soak City. Swimwear is required to be appropriate. Thongs or transparent clothing are not permitted.

Additionally, jewelry, such as necklaces, bracelets, dangling earrings, and rings (except wedding bands) are prohibited on Paradise Plundge.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Independent seated postural.
The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.
The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.
Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to hold on with two functioning arms.
Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to brace self with one functioning leg.
Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to brace self with two functioning legs.
Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Minimum of two functioning extremities.
Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.
Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.
Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit the attraction within specified parameters without endangering self or others.
Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our Associates and Guests, Associates are instructed not to perform any lifting of Guests.

Appropriate observed behavior.
Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment, and willingness to participate.

Guests have a duty to:
- *Exercise good judgment*
- *Act in a responsible manner while using amusement rides*
- *Not participate while under the influence of alcohol or drugs*
- *Properly use all ride safety equipment provided*

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Americana 2

Guests must be 48" tall to ride alone or be accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight – 992 lb. per gondola

A 100-foot tall slow moving Ferris wheel. Guests ride in one of 24 gondolas suspended from the outer rim of the wheel.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Service animals are welcome, must sit on floor.

Note: Single Riders are not permitted. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle.

Apple Zapple 4

Guests must be 54" tall to ride alone or 44" tall and accompanied by a Supervising Companion.

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction,moments of weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guests out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Arachnidia 3

Guests must be 48" tall to ride alone or 36" tall and accompanied by a Supervising Companion

Maximum Weight – 510 lb. per car

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of entering and exiting elevated vehicles which may shift.

Backlot Stunt Coaster

Guests must be 48" tall to ride.

Maximum Weight – 300 lb. per Rider

A steel LIM roller coaster that launches Riders up to 40 mph per hour in 4 seconds. Riders will experience high speeds, weightlessness, rapid movements from side-to-side, and a tunnel.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis, and additional padding constrains both legs across the ankles. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an associate if you wish to use that row. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.

Bad Apple

*Guests must be 54" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 330 lb. per car

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride's main clockwise rotation. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Blue Ridge Tollway

*Guests must be 48" tall to drive **or** accompanied by a Supervising Companion to ride. Hand-held infants are not permitted.*

This is an antique styled gas-powered car that is driven by the Rider on a designated track for up to four Riders per car.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities to drive; one functioning arm and one functioning leg. Guests who are not able to steer and press the accelerator must have a Supervising Companion accompany them to drive. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the back seat. Guests with a cervical collar or neck brace are not permitted to ride. Guests with a visual impairment must ride with a Supervising Companion who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. Please use caution, as the ride unit may shift when entering and exiting. Hand controls, when requested, can be used to assist a Guest who is unable to press the gas pedal.

NOTE: Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

Boo Blasters on Boo Hill 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 881 lb. per car

This is a ghost-busting interactive dark ride where Riders travel through a haunted mansion to capture ghosts with "boo blasters." An onboard computer keeps track of each Rider's score.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests with a minimum of one functioning leg must ride with a Supervising Companion. Guests who do not have seated postural control, the ability to enter or exit the ride safely, or cannot demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, several ride units with a larger opening is available upon request. Please inform an associate if you wish to use one of those units. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle.

WARNING: This ride contains strobe lighting.

WARNING: Attraction is designed to scare or startle.

Carousel 1

Guests must be 42" tall to ride alone or be accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.

Maximum weight – 170 lb. per animal, and 680 lb. per chariot.

A carousel ride which features animals — both stationary and moving up and down — and chariot seating mounted on a circular platform that rotates.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the chariot. Riders with a full leg cast must be seated in a chariot.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, are permitted to ride on the ride platform or chariots.

Charlie Brown's Wind-Up 2

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 275 lb. per swing

A chair swing children's ride with free-hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under dynamic conditions of the ride. Amputation must be below the knee. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Delirium 5

Guests must be 54" tall to ride.

Maximum Weight – 300 lb. per seat

A thrill ride that swings Riders to a height of 115 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience weightlessness and rapidly changing forces and direction.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services or First Aid prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Dodgem 4

Guests must be 48" tall to ride.

A bumper car ride where Riders drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual shoulder strap is positioned across the chest and under the arm of each Rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests who are not able to steer and press the accelerator must ride as a passenger accompanied by an individual who meets the requirements to drive. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Dominator 5

Guests must be 54" tall to ride.

A high-speed, floorless looping roller coaster which turns Riders upside down multiple times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities that includes one functioning arm with a hand. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or any type of cast are not permitted to ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate access is available via the elevator to the right of the entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Drop Tower 4

*Guests must be between 48" tall **and** 80" tall to ride.*

A free-fall ride that lifts Riders to the top of a 305-foot structure and drops them 272 feet. Riders will experience weightlessness and rapidly changing forces.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance, which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of two functioning extremities; one of which must be an arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Guests with any prosthesis must consult with Guest Services or First Aid prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.

Eiffel Tower 2

*Must be 42" tall to ride **or** accompanied by a Supervising Companion.*

One-third scale replica of the Eiffel Tower located in Paris. Standing 331 feet, this observation tower provides stunning views of the park and surrounding area.

Rider Criteria: Guests who are unable to enter and exit safely or demonstrate appropriate observed behavior, must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the attraction's exit. This attraction is wheelchair accessible. Service animals must be leashed and under the owner's control.

WARNING: During night operation this ride contains strobe lighting.

Flight of Fear 5

Guests must be 54" tall to ride.

An indoor steel roller coaster that launches Riders up to 54 miles per hour and turns Riders upside down 4 times. Riders will experience high speeds, weightlessness and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the ankles. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Guests with any type of prosthesis or leg amputation are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride utilizes magnetic systems during the ride.

WARNING: This ride contains strobe lighting.

Flying Ace 3

*Guests must be 48" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 340 lb. per car

Guests ride in suspended cars that rotate in a circle and rise to a height of 85 feet. Guests can control a lever that allows them to maneuver the car in and out.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have at least three functioning extremities. Guests without functioning legs can ride provided they have two functioning arms, a normal center of gravity and the lower extremities are sufficiently strong to maintain the proper riding posture under the dynamic conditions of the ride. Must have sufficient lower extremities to ensure the ride restraint adequately restrains them. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up onto a suspended seat. Please use caution and do not use the restraints for support while entering and exiting, as both the ride unit and/or restraint may shift.

Flying Ace Balloon Race 2

*Guests must be 42" tall to ride **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 550 lb. per balloon

Hot air balloon ride that lifts Riders up 35 feet into the air. Guests ride in one of eight balloons that represent a different country of the world and are able to control the spin of the balloons.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle.

Flying Eagles 3

*Guests must be 44" tall to ride along **or** 36" tall **and** accompanied by a Supervising Companion.*

Guests ride in suspended cars that rotate in a circle. Once the ride's speed increases, Riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures each set of Riders, fastening across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Great Pumpkin Coaster 2

Guests must be 36" tall to ride.

A junior steel rollercoaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar and individual seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Grizzly 4

Guests must be 48" tall to ride.

A wooden roller coaster with large drops and banked turns.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. There is a wheelchair lift prior to the stairs in the exit walkway. Guests requiring assistance should ring the bell located at the base of the wheelchair lift. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Kite Eating Tree 2

Guests must be 36" tall to ride.

Maximum Weight – 770 lb. per ride

This children's ride hoists Riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row with an individual between-the-legs safety belt. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Linus Launcher 3

*Guests must be 42" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 275 lb. per unit; this ride only accommodates one adult per unit

A circular ride where Riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A safety cage secures Guests over their bodies as they lay in a prone position.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat and into a prone position.

Lucy's Crabbie Cabbies 2

Guests must be less than 54" tall to ride. Hand-held infants are not permitted.

A children's bumper car ride.

Restraint System: An individual shoulder strap is positioned across the chest and under the arm of each Rider.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Lucy's Tugboat 2

*Guests must be 42" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted. This ride only accommodates one adult per row.*

Come aboard this spinning tugboat ride which travels back and forth over an upward, curved track.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes two elevated steps.

Pantherian 5

*Guests must be between 54" tall **and** 78" tall to ride.*

A high-speed Giga roller coaster. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests may ride with one leg amputation; amputation must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services or First Aid prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps on their own and be capable of stepping up and over the side of the car to enter and exit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride utilizes magnetic systems during the ride.

WARNING: This ride contains strobe lighting.

PEANUTS™ 500 2

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 275 lb. per car

This children's ride allows Guests to ride in their own car that whips around an oblong track.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Rider Access: Alternate access is available at the ride exit. Please see a ride attendant for assistance. Guests must be able to transfer into the seat of the ride unit on their own or with the assistance of a companion.

PEANUTS™ Turnpike 1

Guests must be less than 54" tall to ride. Hand-held infants are not permitted.

This is a slow-moving children's corvette car ride on an electric track.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Riders must have at least one functioning arm and one functioning leg (appropriate center of gravity not required).

Rider Access: Alternate access is available at the ride exit. Please see a ride attendant for assistance. Guests must be able to transfer into the seat of the ride unit on their own or with the assistance of a companion.

Racer 75 4

Guests must be 48" tall to ride.

A wooden roller coaster with large drops, banked turns, and airtime hills.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Rapterra 5

*Must be 48" to ride **and** under 78".*

A high-speed, launched wing looping roller coaster. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the- legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities that includes one functioning arm with a hand. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone not permitted to ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.

WARNING: This ride contains strobe lighting.

Reptilian 4

*Guests must be between 46" and 78"tall to ride alone **or** 40" tall **and** accompanied by a Supervising Companion.*

A bobsled style roller coaster that takes Riders through multiple twists and turns.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis. The smaller Rider must sit ahead of the larger Rider within the seat.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit.

Sally's Sea Plane 2

*Guests must be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per row; this ride only accommodates two adults per row

A themed plane with six rows that seats four Guests per row. The plane rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle.

Shenandoah Lumber Company 4

*Guests must be 46" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

This is a water flume ride. You will get wet. Guests will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities, one of which must be an arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available next to the main exit. Please use the walkway on the right to access the loading area. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

WARNING: Boats may bump into the side of channel and other boats.

WARNING: This ride contains strobe lighting.

SNOOPY™ vs. Red Baron 2

*Guests must be between 36" tall **and** 54" tall to ride.*

This is a slow-moving children's circular ride with bi-planes. Guests can maneuver each plane up or down by pulling on a joystick.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

SNOOPY's™ Junction 1

*Guests musts be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per locomotive and 825 lb. per vehicle; this ride only accommodates one adult in the locomotive and two adults per vehicle

It's all aboard a SNOOPY™-themed railway, with Woodstock leading the way.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests unable to maintain seated postural control, demonstrate appropriate observed behavior, or able to safely enter and exit the ride unit must ride with a supervising companion.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps on their own or with the assistance of a companion to access the ride unit including stepping up into the train. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle.

SNOOPY's™ Rocket Express 2

*Guests must be 42" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 780 lb. per rocket; this ride only accommodates two adults per rocket

A slow-moving rocket-themed aerial monorail that looks out over Planet SNOOPY™.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate access is available via the entrance. There is a wheelchair lift at the end of the walkway prior to the staircase. Guests requiring assistance should ring the bell located at the base of the wheelchair lift. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit.

SNOOPY's™ Space Buggies 2

*Guests musts be 36" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 382 lb. per car; this ride only accommodates one adult per car

Space vehicles that jump up and down while rotating around a circular track.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Tumbili 5

*Guests must be between 48" tall **and** 77" tall to ride.*

A 4D free spin roller coaster which flips Riders upside down multiple times. Riders will experience weightlessness and rapid movements creating a unique experience.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes at least three fingers and the ability to grip and two functioning legs. One functioning arm is sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or leg casts are not permitted to ride. Guests with any type of prosthesis are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding

WARNING: This ride utilizes magnetic systems during the ride.

Twisted Timbers® 5

Guests must be 48" tall to ride.

A thrilling hybrid coaster that has a wood frame and steel track turning Riders upside down 3 times. Riders will experience high speeds, weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the shins. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Prosthetics are not permitted on this ride. Guests should check with Guest Services or First Aid prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an associate if you wish to use that row. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Limit one Guest in wheelchair and one companion in lift at a time.

Note: Loose articles may not be left on the platform. They may either be left with a non-Rider or placed in lockers for storage. Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: This ride requires Guests to pass through metal detection prior to being allowed on the loading platform.

WARNING: This ride utilizes magnetic systems during the ride.

WARNING: This ride contains strobe lighting.

Wave Swinger 3

Guests must be 48" tall to ride.

Maximum Weight – 230 lb. per person

A chair swing family ride with free-hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

White Water Canyon 4

Guests must be 46" tall to ride.

A river raft ride. You will get wet. Guests will experience sudden drops and rapid movements from side-to-side as they encounter river rapids and hidden geysers.

Restraint System: A shared seatbelt secures both Riders in the section across the thighs and pelvis.

Rider Criteria: Riders must have at least three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not allowed to ride.

Rider Access: Alternate access is available via the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, including stepping down into a wet boat while loading.

WARNING: Boats may bump into the side of channel and other boats.

WindSeeker 4

Guests must be 52" tall to ride.

Maximum Weight – 304 lb. per Rider

A chair swing ride that ascends nearly 301 feet while spreading its arms, swings Riders in a circular motion at a 45-degree angle at speeds up to 30 miles per hour.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services or First Aid prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock Express 4

Guests must be 46" tall to ride alone OR 40" tall ***and*** *accompanied by a Supervising Companion.*

A junior wooden rollercoaster with banked curves and airtime hills.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock Whirlybirds 2

*Guests must be 36" tall to ride **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 550 lb. per car; this ride only accommodates two adults per unit

Spin around in this junior teacup ride where Guests control the spin of their tea cup.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift.

SOAK CITY WATERPARK

Each attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	This is a low speed, and or shallow water attraction.
Mild Thrill Rides	2	This is a low to medium speed attraction, and/or water depth to 48 inches. Some Rider control, maneuvering and/or swimming skills required.
Moderate Thrill Rides	3	This is a medium speed attraction. Height and water depth may vary. Moderate or unexpected forces can be generated during the ride. This attraction may require Rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Rides	4	This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires Rider body control and strong swimming skills.
Aggressive Thrill Rides	5	This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires Rider body control and swimming skills.

Appropriate Attire

Appropriate swimwear is required to participate in all attractions. Thongs and transparent clothing/ swimwear are not permitted. We reserve the right to determine the appropriateness of swimwear. Guests wearing bathing attire with metal buttons, rivets, zippers, or snaps will not be permitted to participate in any of our attractions with the exception of Lazy Rider, Freestylin', Splash Island, Tidal Wave Bay, Aqua Blast, Thunder Falls, Ripslide, Turbo Twister, Lil' Barefoot Beach, Zoom Flume, Sand Dune Lagoon, and the Lighthouse Landing play structure. Jewelry, including but not limited to, necklaces, bracelets, dangling earrings, and rings other than wedding bands that will come into frequent contact with a slide are prohibited on Paradise Plunge, Baja Bends, Night Slider, Power Plunge, and all slides in Lighthouse Landing. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed and placed in a waist pack, in a locker, or with a non-participant to prevent any interference with the ride experience. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Contact lenses are not recommended. Guests requiring special accommodation should speak to a member of the Aquatics supervisory team.

Life Jackets

Life jackets are available for all Guests. Only U.S. Coast Guard (or Canada) approved life jackets are allowed as floatation devices. Life jackets are provided free of charge for Guests who require one.

In wave pools, life jackets are required for Guests who are less than 52” tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Children who are less than 42” tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Sand Dune Lagoon and Tidal Wave Bay.

In other attractions requiring life jackets, children who are less than 48” tall in bare feet or those who are inexperienced or non-swimmers must wear a life jacket. Children who are less than 42” tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Lazy Rider.

Ongoing Lifeguard Training

In an ongoing effort to provide a safe and enjoyable waterpark experience for our Guests, Kings Dominion routinely utilizes training exercises to improve our lifeguards’ skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water manikins, the use of video surveillance equipment, internal and external audits, and responsive/unresponsive water rescues and/or first aid scenarios.

Swim Diapers

Diaper dependent Guests are required to wear swim diapers or a diaper specifically designed for aquatic use while participating in Soak City attractions. Swim diapers are available for purchase at Mary's Shorts and Shades.

Water Wheelchairs and Pool Lifts

A water wheelchair is available for Guests requiring additional assistance when gaining access into Sand Dune Lagoon and Tidal Wave Bay. The water wheelchair may be used by multiple Guests on the same day. While in a/the wave pool, the water level may not exceed the height of the seat on the chair. Guests participating in a wave pool are permitted to use a personal wheelchair. Personal wheelchairs are permitted up to the seat's water depth. Guests utilizing wheelchairs will not be required to utilize a lifejacket while in the wave pool only if their height exceeds 52" tall and meet all other rider criteria for the attraction.

Guests may choose to use a water wheelchair instead of a personal wheelchair. While using either 47 a personal wheelchair or a water wheelchair, Guests must not utilize the wheelchair’s seatbelts while in the wave pool. Motorized or electric personal wheelchairs will be permitted at Splash Island.

Walkers, canes, or other assistive devices are permitted only at ankle depth in the following attraction(s) Lil' Barefoot Beach (ground level only), Lighthouse Landing (ground level only), Sand Dune Lagoon, Splash Island, and Tidal Wave Bay. A pool lift is available at Lazy Rider. During your visit, please speak to a member of our Aquatics management team to obtain access to the water wheelchair or pool lift and for further accessibility information.

WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the types of actions caused by various attractions. Each of the following attractions will identify the restrictions according to the criteria outlined on page 11. In order to participate on most attractions, Guests must have independent seated postural control, appropriate center of gravity, appropriated observed behavior, and the ability to enter and exit the attraction safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each attraction. Please use caution when entering and exiting waterpark attractions as the surrounding areas may be slippery. Conveying devices such as tubes and rafts may be slippery and can shift during loading and unloading.

Aqua Blast 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per person

Located at the Hurricane Heights slide tower, Aqua Blast is an inner tube water slide that sends Riders through an enclosed chute into a spine-tingling series of spirals ending in a 42" deep pool. Four intense 360-degree turns across 449 ft. of slide lead to one of the tightest and highest banking tube slide experiences at Soak City. One single Rider per tube.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Baja Bends 4

Guests must be 52" tall in bare feet to ride.

Maximum one Rider per slide.

A maze of four individual body flumes where sliders will twist and turn ending in a 42" deep splash pool.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Note: T-shirts and other loose fitting clothing are not permitted. Appropriate swim wear required.

FreeStylin' 3

Guests must be 40" tall in bare feet to ride. Guests between 40" tall to 52" tall in bare feet must wear a life jacket.

Individual tube slide where Riders experience twists, turns, and drops before ending into a 42" deep pool.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Lazy Rider 2

Children must be 42" tall in bare feet to ride alone. Guests under 42" tall in bare feet, including hand-held infants, must be accompanied by a Supervising Companion. Children under 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. A Supervising Companion may accompany up to two children.

A slow-moving, winding river tube ride at a depth of 34" (86 cm.).

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion and wear a lifejacket. Guests who cannot enter/exit without endangering self or others must be accompanied by a Supervising Companion. Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access is available via the secondary exit stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics Management Team to obtain access to the pool lift.

Lighthouse Landing – Play Structure 1

A multi-level play structure that features over 200 play elements, including dozens of interactive spray jets, water guns, adventuresome net bridges, awesome water wheels, and a giant 423-gallon tipping bucket that drenches everyone below.

Rider Criteria: Guests unable to maintain seated postural control must be accompanied by a Supervising Companion. Hand-held infants are not permitted to participate on elevated activity areas. Cervical collars or neck braces are not permitted to participate on elevated activity areas.

Rider Access: Access to the attraction requires climbing stairs. Guests will have to ascend the stairs on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Lighthouse Landing – Slides 3

Guests must be at least 36" tall in bare feet to participate on slides lower than 8 ft. in the air. Guests must be at least 40" tall in bare feet to participate on slides 8 ft. in the air or higher.

Maximum Weight – 200 lb. for slides lower than 8'; 300 lb. for slides higher than 8'

Eight impressive body slides that range in height and color. Each body slide ends in a shallow runout.

Rider Criteria: Guests must ride feet first or lay feet first with their arms across their chest, legs crossed at the ankles, and back flat against the slide. Guests must have a minimum of two functioning extremities; sufficient upper extremities to maintain the proper riding position and two functioning legs. Hand-held infants are not permitted. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing stairs. Guests will have to ascend the stairs and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Lil' Barefoot Beach – Pool 1

An interactive water playground for children with water depths ranging from 0" – 16".

Rider Criteria: Guests unable to maintain seated postural control, have the ability to safely enter and exit the ride or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Access is available at the zero depth section. Please see the Aquatics Management Team to taking a wheelchair into the pool.

Lil' Barefoot Beach – Slide 2

A small children's slide which empties into 16" of water.

Rider Criteria: Guest must ride feet first facing forward, one at a time. Guests are required to maintain seated postural control, have the ability to safely enter and exit the attraction, and have appropriate observed behavior or must be accompanied by a Supervising Companion to access the slide. Hand-held Infants may not ride slides. Guests with full arm casts, braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the slide requires Guests to walk up a few stairs.

Paradise Plunge 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per Rider

Maximum one Rider per slide

Riders stand in an enclosed capsule where the floor drops launching them down high speed drops and banked turns before ending in a water-filled runout. Rider will experience high speeds, weightlessness, and rapid movements from side to side. Maximum water depth is 6".

Rider Criteria: Riders must stand with their head and back against the slide, legs firmly crossed at the ankles, with arms folded across the chest, and maintain position throughout ride. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Note: Loose articles are not permitted, including, but not limited to: piercings, necklaces, rings, and T-shirts.

Pipeline Peak Night Slider & Power Plunge 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per Rider

Maximum one Rider per slide

Two single-rider enclosed body slides that end in a 6" runout.

Rider Criteria: Riders are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Pipeline Peak Rip Slide & Turbo Twister 4

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per single person tube; 600 lb. per double tube

From Pipeline Peak's™ 45-foot level, these two slides send Riders, who are seated on an inner tube, through twists and turns in near complete darkness.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Sand Dune Lagoon 3

Guests must be less than 54" tall in bare feet to participate. Children less than 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. Children less than 42" tall in bare feet must wear a life jacket ***and*** *be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests.*

A children's wave pool with depths ranging from 0' – 3' (0 cm – 91.44 cm). Waves are generated for five minutes on, and then five minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held Infants participation or water depth may be restricted if necessary and must be accompanied by a Supervising Companion. Guests with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for Guests requiring additional assistance. Please speak to a member of our Aquatics Management Team to obtain access to the water wheelchair.

Splash Island 1

A zero-depth interactive water playground.

Rider Criteria: Guests unable to maintain seated postural control, have the ability to safely enter and exit the attraction or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Hand-held Infants must be accompanied by a Supervising Companion.

Rider Access: The ground level attractions are fully accessible. Please see the Aquatics Management Team prior to taking a wheelchair onto the pad.

Splash Island – Slides 1

Rider Criteria: Guests are required to maintain seated postural control. Guests unable to safely enter and exit the ride or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion to access the slide. Guests must have a minimum of two functioning extremities. Hand-held Infants may not ride slides. Guests with full arm casts, braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access to the slides require Guests to walk up a few stairs.

Thunder Falls 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per Rider

A set of inner tube water slide that offer a variety of exciting twists, turns, and drops going in and out of darkness before a high-speed drop into the 42" deep catch pool.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Tidal Wave Bay 3

Life jackets are required for Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Guests who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests.

A 450,000-gallon wave pool with depths ranging from 0' – 6' (0 – 183 cm). Waves are generated for five minutes on, and then five minutes off. Strenuous activity is required during wave action cycles which may require the ability to swim and which may result in fatigue. Exercise caution. Participants with a history of seizures (or heart or other serious medical conditions) should be supervised by someone who knows how to swim and how to provide emergency assistance.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held Infants participation or water depth may be restricted if necessary and must be accompanied by a Supervising Companion. Guests with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone or braced arm cast cannot participate.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for Guests requiring additional assistance. Please speak to a member of our Aquatics Supervisor Team to obtain access to the water wheelchair.

Zoom Flume ◆4

Guests must be 42" tall in bare feet to ride.

Maximum Weight – 1,000 lb. per raft

Minimum of two Riders; maximum of four Riders

Family raft water slide, with banked turns and drops ending in a 30" splash pool.

Rider Criteria: Riders are required to remain seated with back against the raft, legs crossed, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion. Please use caution when entering and exiting as the raft may shift. The raft and surrounding area may also be slippery.

ENTERTAINMENT VENUES

Due to the popularity of our shows, we suggest you arrive early as seating may be limited. Show schedules are available at Guest Services, on the Six Flags mobile app, and at any theatre entrance. All Entertainment venues are accessible to Guests who may have a mobility impairment. Assisted listening devices are available at each theater for Guests who are hearing-impaired. Large-print scripts may also be available. Ask any Associate at the venue for assistance.

Action Theater
The Action Theater, located between International Street and Old Virginia, is an indoor theater with bench seating used for showing movies and music festival competitions. Access to the theater is to the left of the main entrance. Use the path on the right before the building exit. There are viewing areas that accommodate wheelchairs and companions. Please ask an usher for assistance. All Guests exit through the exit doors.

Candy Apple Grove Stage
The Candy Apple Grove Stage, located near Twist & Shop, is a multi-purpose stage used for performers, presentations, and special events. The venue does not have seating.

Grande Bandstand
The International Street Grande Bandstand, located under the Eiffel Tower, is a multi-purpose stage used for performances, presentations, and special events. The venue does not have seating.

Kings Dominion Theatre
The Kings Dominion Theatre, located in Old Virginia, is an indoor theatre featuring main stage show productions. Access to the theatre is through the main entrance doors across from the Blue Ridge Tollway. Doors typically open 15 minutes before show time and close promptly at the start of the show. There are viewing areas that accommodate wheelchairs and companions. Please ask an usher for assistance. After the show, an usher will assist you with exiting the theatre.

Kingswood Amphitheater
The Kingswood Amphitheater is a large outdoor concert venue. Access is through the main entrance. There are viewing areas that accommodate wheelchairs and companions. Please ask an usher for assistance.

PEANUTS™ Playhouse
The PEANUTS™ Playhouse, located in the heart of Planet SNOOPY™, is a small outdoor venue featuring shows for kids. Access to the seating area can be found on either side of the stage. There are viewing areas that accommodate wheelchairs and companions. Please ask an usher for assistance.

Peanuts™ Showplace
The PEANUTS™ Showplace, located in Planet SNOOPY™, isa covered, outdoor theater with stadium seating. Access to the theater is across from the Planet SNOOPY™ Fountain. The venue typically opens 15 minutes prior to show. There are viewing areas that accommodate wheelchairs and companions. Please ask an usher for assistance.

HALLOWEEN HAUNT®

Halloween Haunt at Kings Dominion has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions. Characters inside our Haunt attractions will not touch you; please do not touch them in any manner. Those that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks. Please adhere to all posted and verbal warnings and directions.

Alternate Access may be available. Please visit Guest Services for more information. Service animals are welcome to attend Halloween Haunt and are permitted to walk through the park and enter haunted attractions. Please adhere to all posted and verbal warnings and directions.

TRICKS AND TREATS®

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions or services offered visit Guest Services.

NOTES

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept these risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations, Kings Dominion does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, **do not ride!**

All restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened and tightened properly to allow Guests to ride.

Information in this guide is subject to changes.
