GUEST ACCESSIBILITY GUIDE

Welcome to Six Flags New England!

We are glad you are here! At Six Flags New England we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment. We want our Guests to have a safe and enjoyable day. We continuously strive to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back, or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices, or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Relations. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Relations or the Ride Information Center to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Team Members to help accommodate you.

PLEASE RIDE SAFELY

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Relations or the Ride Information Center. Remember, if you suspect your health could be at risk for any reason, or if you could aggravate a pre-existing condition of any kind, **DO NOT RIDE**.

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. For rides that are not water attractions within Six Flags New England and for the Adventure River attraction at Hurricane Harbor, Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary. Additional information about wheelchairs at Six Flags New England Hurricane Harbor is discussed later in this Guide.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants, will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON**. You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper Rider positioning and hold on until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry, and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Six Flags New England is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone, or electronic usage while riding is prohibited on most rides.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Six Flags New England.

RIDE RATING SYSTEM

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides		Rides that are generally calm and gentle in nature.
Mild Thrill Rides		Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides		Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides		Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.
Aggressive Thrill Rides		Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction, and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair (subject to additional noted requirements at Hurricane Harbor attractions)
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride (and additional requirements in certain instances for some Hurricane Harbor attractions)
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth (subject to additional noted requirements at Hurricane Harbor attractions)
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

 This symbol is used to identify rides where Riders may remain in their wheelchair. (subject to additional noted requirements at Hurricane Harbor attractions).

 This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

 This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Six Flags New England uses the following terms:

 **Ability to hold on or brace:** Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

 **Hand-held Infant:** Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: 1909 Illions Carousel and New England Express.

Supervising Companion: Many of our rides have height requirements that allow a Guest under that requirement to ride with a Supervising Companion. A Supervising Companion is a Companion who is at least 54" in height and approximately 14 years of age, who meets all other criteria for riding, and who will assist their Companion in complying with safe participation instructions. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders. Some water attractions at Hurricane Harbor New England may also require Guests to be accompanied by a Supervising Companion; however, in those circumstances where a Guest at Hurricane Harbor uses a wheelchair and requires a seat restraint, or a minor who uses a wheelchair with or without a seat restraint, and due to safety considerations and requirements and therefore to enhance Guest safety, the Supervising Companion must be a parent, guardian, or other person responsible for the Guest, must be at least eighteen (18) years of age, and must accompany the Guest in the water.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide, or review the safety guides and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride the 1909 Illions Grand Carousel.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be officially measured at Guest Relations or the Ride Information Center. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height measuring device may be used during the height-measuring process. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, shoes that contribute excessively to a Guest's height are prohibited during measuring. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Six Flags New England reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which assists Guests with mobility restrictions or cognitive impairment in accessing attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions, in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Guest Relations or the Ride Information Center once inside the park to request reasonable accommodations. Requested accommodations will be discussed with a Guest Relations Team Member. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions.

While not a requirement, Guests with mobility restrictions or cognitive impairments who may request reasonable accommodations are encouraged to obtain an IBCCES Individual Accessibility Card (IAC) through the accessibilitycard.org website or via the IBCCES Accessibility Card mobile App. Once a Guest has completed the IBCCES online application, they will be able to access their digital IAC. Guests who choose to obtain an IAC should present the IAC to Guest Relations as part of their conversation with a Guest Relations Team Member.

Following the conversation, the Guest Relations Team Member will provide the Guest an Attractions Access Pass , which identifies the Guest's reasonable accommodations, for the Guest to use during their park visit.

Note: IBCCES is a third-party vendor. Only IBCCES can issue an IAC, and not Six Flags New England.

CASTS & BRACES

Guests with casts and braces will be restricted from rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on slides in Hurricane Harbor.

The following chart displays the cast and brace rules for all rides and attractions.

C Must ride in a chariot

F Cast/brace must fit safely in the ride unit

N May not ride

Y May ride with the condition

Six Flags New England	Braced Arm Cast	Broken Collarbone	Cervical Collar or Neck Brace	Foot/Lower Leg Cast	Forearm Cast	Full Arm Cast	Full Leg Cast

PROSTHESES

Guests with any type of Prostheses should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All Riders must be able to maintain the proper riding positioning. Additionally, prosthetic devices with exposed metal parts are not permitted on most Hurricane Harbor attractions. Guests should visit Guest Relations or the Ride Information Center prior to riding to ensure a safe riding experience.

Additional lists below for rides where there are no prosthetics permitted/specific limitations.

Prosthetics are not allowed on: Batman; The Dark Knight™; Cyborg™; Flashback; Harley Quinn™ Spinsanity; Quantum Accelerator; New England Skyscreamer; Supergirl™ Skyflyer; Superman™ The Ride; The Joker™; Riddler™ Revenge; and Wicked Cyclone.

Guests are encouraged to review all Six Flags New England ride descriptions in this guide for specific prostheses requirements.

RIDE DEVICES

For safety reasons, certain attractions may require the removal of medical devices or prosthetics that are not securely fastened to the Rider's body. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

Transfer devices, when requested, can be used to assist a Guest out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Supergirl™ Skyflyer, Harley Quinn™ Spinsanity, and Cyborg™.

Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they do not otherwise meet the Rider criteria.

Please see a Team Member at each ride or Guest Relations/ Ride Information Center for assistance. For additional guidance, Guests are encouraged to speak with a Ride Attendant or Guest Relations Team Member.

ADDITIONAL INFORMATION

Our goal is to make Six Flags New England as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large Print Guest Accessibility Guides
Print versions of the Park Guide and Guest Assistance Guide are available at Guest Relations. Braille and large print versions are also available. There are a limited number of print guides that are obtainable on a first-come, first-served basis.

First Aid
Our First Aid Building is located next to Rockville Theater in the Theme Park and Adventure River in Hurricane Harbor. Both are staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid.

Hearing Needs
Assistive listening systems utilize a lightweight wireless device that receives a signal from transmitters at locations in order to amplify sounds. These are recommended for Guests with mild to moderate hearing loss. These devices are available at Rockville Theater for use within Rockville Theater.

Parking
Accessible parking is available on a first-come, first-served basis within the general and preferred parking lots. When you arrive at the parking toll booths, ask a Team Member for instructions regarding where to proceed to the accessible parking lot. A valid disability parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask a Team Member for directions to additional parking areas.

Restrooms
Private restroom facilities for Guests needing the assistance of another Guest are available at the Scream, Looney Tunes™ Movie Town, and First Aid restroom locations. Wheelchair accessible stalls are located at all restrooms.

Rider Swap
The Rider Swap program allows one adult to stay with non-Riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Relations.

Service Animals
Service animals are welcome at Six Flags New England. A service animal is defined as a dog that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per Guest. A Service Animal Relief Area is located in the grassy area in front of Catwoman™ Whip. Owners are responsible for disposing of their animal's waste. Please look for the designated sign.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on 1909 Illions Grand Carousel, *Daffy Duck* Hollywood Tours, Krazy Kars, New England Express, and *Taz's* Prop Delivery Company. Service animals must be leashed and under the owner's control. They may also attend performances. Service animals are not permitted in water attractions, wet decks, wading pools, or lazy rivers.

Service animals are welcome to attend Fright Fest events. Guests with service animals, please note that these attractions use loud noises, theatrical lighting, special effects, and sudden moments intended to provide our guests with a thrilling experience. We rely on you to determine whether this attraction is appropriate for your service animal to experience. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Relations for more information.

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small, soft-sided coolers to accommodate such needs. Please visit Guest Relations for more information.

Wheelchairs, Electric Convenience Vehicles, and Strollers

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at the Rental Center on Main Street. However, since wheelchairs, ECVs, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own. For those Guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

For information on water wheelchairs and non-electric mobility aid usage in Hurricane Harbor, please visit the Hurricane Harbor section later in this Guide.

Park-provided wheelchairs, ECVs, and strollers may not be taken out of the park gates or to the parking lot.

GUESTS USING WHEELCHAIRS & ECVS

On all rides that can accommodate Guests using a wheelchair, Guests will need to leave their wheelchairs to be seated in the ride vehicle. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride platform is wheelchair accessible. A standard elevator is available at Batman: The Dark Knight™ to transport a Guest in a wheelchair to our second story ride platform.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Relations. Six Flags New England personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may recharge their wheelchair battery at the Rental Center on Main Street.

Additional information for Guests using wheelchairs and water wheelchairs at Six Flags New England Hurricane Harbor is provided in the Hurricane Harbor section of this Guide.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. In Hurricane Harbor, Guests may be asked to evacuate pools as quickly as possible using stairs or the 0 depth entry. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on: Scream; Wicked Cyclone; Superman™ The Ride; Thunderbolt; Pandemonium; Quantum Accelerator; and Blizzard River.

Maximum (and minimum) weight limits can be found under the individual rides in this guide and on the Rider Safety Guide signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance(s) of: Wicked Cyclone, Superman™ The Ride, The Joker™, and Batman: The Dark Knight™ and Quantum Accelerator.

The manufacturer requires a maximum Guest height on the following rides: Gotham City Gauntlet - 75", The Joker™ - 77", Quantum Accelerator 77", The Riddler™ Revenge - 78", and Superman™ The Ride - 76".

LOOSE ARTICLES

Most rides cannot accommodate loose articles, including: jewelry; cell phones; hats; cameras; purses; backpacks; basketballs; umbrellas; beverage containers; electronic devices; etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Six Flags New England is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body.

On Superman™ The Ride, Wicked Cyclone, The Riddler™ Revenge, Batman™ The Dark Knight, and The Joker™, loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line and must be stored in a locker or with a non-Rider.

For safety reasons, cell phone usage, taking pictures, and filming on rides are prohibited.

Glasses must be secured on all rides. On The Joker™ and Wicked Cyclone, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see a Team Member for more details. Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Six Flags New England are turned in to Lost and Found. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported online at **sixflags.com/newengland/Lost & Found/Contact Us/ Six Flags / Page / Six Flags**.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnetics are used at: Superman™ The Ride; Pandemonium; Quantum Accelerator; Wicked Cyclone; and The Joker™. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: 1909 Illions Carousel, and the New England Express. The tank must fit safely in the ride unit and not interfere with the ride restraint system.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the restraint mechanism to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects, including strobe lighting and specialty ride lights that may impact Guests with certain medical conditions. Rides utilizing these effects include: Batman The Dark Knight™; Cyborg™ Hyper Drive; Gotham City Gauntlet; Houdini; Quantum Accelerator; Stampede Bumper Cars; Superman™ The Ride; The Riddler™ Revenge; and Wicked Cyclone.

PROPER ATTIRE

Most rides require proper riding attire including shirts, shorts, and shoes. Proper attire is required to be worn in queues and all park pathways. Swimwear is not permitted on rides outside of Hurricane Harbor. For your safety, loose clothing (including scarves and other free-flowing clothing) must be secured or removed to prevent any interference with the ride restraint system. On all roller coasters and New England Skyscreamer, scarves will be required to be removed in their entirety.

Loose fitting shoes may be removed before riding: New England Skyscreamer; Crimewave; The Riddler™ Revenge; Supergirl™ Skyflyer; Batman The Dark Knight™; The Joker™; and Scream.

Appropriate swimwear is required. Thongs or transparent clothing are not permitted.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Independent seated postural.
The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck, and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.
The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.
Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a Prostheses which can be used for gripping and bracing. Any arm Prostheses must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to hold on with two functioning arms.
Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a Prostheses which can be used for gripping and bracing. Any arm Prostheses must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to brace self with one functioning leg.
Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a Prostheses used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg Prostheses must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to brace self with two functioning legs.
Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a Prostheses used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg Prostheses must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Minimum of two functioning extremities.
Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.
Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.
Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.
Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access entrance or having someone aid in boarding. For the safety of our (Associates/Team Members) and Guests, Associates are instructed not to perform any lifting of Guests.

Appropriate observed behavior:
Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest requirements. Appropriate observed behavior may include, but not be limited to, maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment, and willingness to participate.

Guests have a duty to:
- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided
- Follow all park rules

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

1909 Illions Grand Carousel 1

*Guests must be at least 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.*

A carousel ride which features animals, both stationary and moving up and down, and chariot seating mounted on a circular platform that rotates.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning arm and must have the ability to straddle the ride unit. Guests unable to straddle the ride unit or that do not have at least one functioning arm must be seated in a chariot unit. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the chariot. Riders with a full leg cast must be seated in a chariot.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up onto a platform. Service animals are permitted to ride on the ride platform or chariots. Service animals must be leashed, under the owner's control, and fit on the floor of the ride vehicle.

Animation Department 1

Guests must be between 36" and 54" tall to ride.

A child-size chair swing with free hanging seats suspended from a gently rotating tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion.

Balloon Race 2

*Guests must be at least 48" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Hot air balloon ride that spins and raises Riders in the air.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please use caution, as the ride unit may shift when entering and exiting.

Batman The Dark Knight™ 5

Guests must be at least 54" tall to ride.

A high-speed, floorless, looping roller coaster which turns Riders upside down multiple times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three extremities; One functioning arm that includes a hand and two legs. Two functioning arms including hands are sufficient if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Both legs must include the knee. Legs may be paralyzed. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses are not permitted.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity Prostheses must ensure the device is properly secured or removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please use caution, as the ride unit may shift when entering and exiting. Alternate access is available via the elevator.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride contains strobe lighting.

Blizzard River 4

*Guests must be at least 42" tall to ride alone **or** 36" tall and accompanied by a Supervising Companion.*

A family water ride where Riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm that includes at least three fingers and the ability to grip (excluding Prostheses) and one functioning leg with a foot (excluding Prostheses). Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

NOTE: Loose articles, including footwear, may not be left on the platform. All loose articles must be brought onboard the raft with Riders. These items will get wet. Please consider leaving loose articles with a non-Rider.

CAUTION: Boats may bump into the side of channel and other boats.

Catwoman™ Whip

*Guests must be at least 48" tall to ride alone **or** 41" tall and accompanied by a Supervising Companion.*

A steel roller coaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes at least three fingers and the ability to grip (excluding Prostheses), and two functioning legs with feet (excluding Prostheses). Guest with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Cast are not permitted on this ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps on their own or with the assistance of a Companion, and be capable of stepping down into the ride unit.

Cyborg™ Hyper Drive

Guests must be at least 48" tall to ride.

A moderate ride with a quick circular motion and tilt.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have one fully functioning arm and another arm to at least the elbow and two functioning legs including the knee. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride. Amputations must be below the knee. Prostheses are not permitted on the ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride contains strobe lighting.

Daffy Duck Hollywood Tours 2

*Guests must be at least 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per row.

Bus with six rows that seats four guests per row. The bus rotates in a counter-clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding Prostheses) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Full leg casts must fit safely inside the ride unit. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Dino Off Road Adventure 2

Must be at least 48" tall to drive or accompanied by a Supervising Companion to be a passenger. Hand-held infants are not permitted.

This is an antique-styled, gas-powered car that is driven by the Rider on a designated track for up to two Riders per car.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests who are not able to steer and press the accelerator must have a Supervising Companion accompany them to drive. Guests with a cervical collar, neck brace, broken collarbone, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and into the seat of the car. Please use caution, as the ride unit may shift when entering and exiting.

NOTE: Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

Flashback 5

Guests must be at least 48" tall to ride.

A high-speed, looping roller coaster which turns Riders upside down multiple times forward, and then again while traveling backward. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of one functioning arm that includes a hand and must have two legs, of which only the feet may be missing or a minimum of one natural leg including (partial) foot and one upper leg which extends to the end of the seat is required. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Arm prostheses are not permitted on this ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Gotham City™ Crime Wave 3

Guests must be at least 48" tall to ride.

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any type of Prostheses should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Note: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Gotham City Gauntlet: Escape From Arkham Asylum™ 4

*Guests must be at least 54 inches tall to ride alone **or** 46" tall and accompanied by a Supervising Companion. Guests who are more than 75" tall are not permitted to ride.*

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes at least three fingers and the ability to grip (excluding Prostheses) and two functioning legs with feet (excluding Prostheses). Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride contains strobe lighting.

Great Chase 2

Guests must be at least 36" tall to ride.

A junior steel rollercoaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Harley Quinn™ Spinsanity 5

Guests must be at least 52" tall to ride.

A thrill ride that swings to the height of 147 feet in a pendulum motion while spinning clockwise. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have one fully functioning arm and another arm to at least the elbow and two functioning legs including the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Amputations must be below the knee. Prostheses are not permitted on the ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

NOTE: Please notify a ride operator if needing to use the ramp.

Houdini: The Great Escape 3

*Guests must be at least 48" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

An indoor dark ride with an oscillating, up and down motion.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride contains strobe lighting.

WARNING: Attraction is designed to scare or startle.

The Joker™ 4D Free Fly Coaster

Guests must between 48" tall and 77" tall to ride.

A 4D free spin roller coaster which flips Riders upside down multiple times. Riders will experience weightlessness and rapid movements creating a unique experience.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have one functioning arm that includes at least three fingers and the ability to grip. Guest must have a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or leg casts are not permitted to ride. Prostheses are not permitted on this ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into the seat.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: Magnetic systems are used during this ride.

Krazy Kars 2

*Guests must be at least 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per car.

This ride is a car ride that follows an electric track in a "train-like" fashion.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Full leg casts must fit safely inside the ride unit.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Krazy Kups 2

Guests must be between 36" and 54" tall to ride.

This is a kiddie ride that travels a circular path while individual seats rotate on an axis.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding Prostheses) and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride. Full arm or full leg casts must fit safely inside the ride unit.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

New England Express 1

*Guests must be at least 48" tall to ride alone **or** accompanied by a Supervising Companion.*

Riders board a train ride that offers a round trip through changing landscapes. Guests can expect extremely mild front to back and left to right forces throughout the ride, clockwise.

Restraint System: A door encloses the ride unit.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a Supervising Companion.

Rider Access: Alternate Access is available at the attraction exit. This attraction is wheelchair accessible. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

New England Sky Screamer 4

*Guests must be at least 48" tall to ride alone **or** 44" tall and accompanied by a Supervising Companion.*

A chair swing thrill ride with free hanging seats suspended from an elevated and rotating gondola. Riders will rotate in a circular motion as the gondola ascends and descends the tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. An additional individual seatbelt is positioned across the chest and under the arms of each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have one fully functioning arm and another arm to at least the elbow and two functioning legs including the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride. Full arm cast must sit on the outside seat. Amputations must be below the knee. Prostheses are not permitted on the ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion to access the ride unit. This includes an elevated step onto the platform.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Pandemonium ◆4

Guests must be at least 47" tall to ride alone ***or*** *43" tall and accompanied by a Supervising Companion.*

Maximum Weight – 440 lbs per car.

Four seat roller coaster cars that traverse a steel track while rotating freely 360 degrees.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a Companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: Magnetic systems are used during this ride.

Quantum Accelerator 4

Guests must be 52" tall to ride alone OR 48" to ride with a Supervising Companion. This ride has a maximum heigh of 77".

Quantum Accelerator is a family-friendly thrill ride with two exciting launches, twists and turns, 11 moments of airtime, and speeds up to 45 miles per hour.
An individual lap bar secures each Rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate Riders of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have two functioning arms and 2 natural legs with feet. Casts are not permitted on this ride. Riders must have one natural arm with a hand. The second functioning arm may be a prosthetic. Riders must have one natural arm with a hand.

Rider Access: Rider access is available on the left side of the ride, marked by the accesible entrance sign. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride contains strobe lighting.

The Riddler™ Revenge 5

Guests must be between 52" and 78" tall to ride

A suspended roller coaster with cars that hang down from the track and swing out to the sides as the ride drops and turns.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guest must have two legs, of which only the feet may be missing, or a minimum of one natural leg including (partial) foot and one upper leg which extends to the end of the seat is required. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride. Prostheses are not permitted on this ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please use caution, as the ride unit may shift when entering and exiting. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: This ride contains strobe lighting.

Rock N Rodeo 3

*Guests must be at least 43" tall to ride alone **or** 40" tall accompanied by a Supervising Companion.*

A mild ride with circular and spinning motions.

Restraint System: A shared lap bar secures all Riders in the row. A safety belt further secures the lap bar.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, and braced arm cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a Companion.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

NOTE: Please notify a ride operator if needing to use the ramp.

Scrambler 3

*Guests must be at least 48" tall to ride alone **or** 36" tall and accompanied by a Supervising Companion.*

Maximum Weight – 510 lb. per car.

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Scream 5

Guests must be at least 52" tall to ride.

A tower ride with a chair lift-type seat where Riders are propelled up or shot down at high speeds. Guests will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. An additional seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any type of Prostheses should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

Ships Ahoy! 2

*Guests must be at least 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum of one adult per row.

A spinning tugboat ride that travels back and forth over an upward, curved track.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Stampede Bumper Cars 3

*Guests must be at least 52" tall to drive **or** 48" tall to be a passenger and accompanied by a Supervising Companion.*

A bumper car ride where Guests drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual shoulder strap is positioned across the chest and under the arm of each Rider. A shared lap bar is positioned above the laps of all Riders in the row.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guest with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Before cast are not permitted line Casts are not permitted on this ride. Guests with a visual impairment must ride as a passenger with a Driver who meets the requirements to drive.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

NOTE: Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

WARNING: Avoid head-on collisions.

WARNING: This ride contains strobe lighting.

Supergirl™ SkyFlyer 4

Guests must be at least 48" tall to ride.

Maximum Weight – 300 lb. per seat.

A spinning thrill ride where gondolas quickly increase in speed from a horizontal position to a vertical position, thereby turning Riders upside down. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have one functioning arm. Guest must have a normal center of gravity and lower extremities that are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. One leg amputation must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride. Prostheses are not permitted on this ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Superman™ The Ride

Guests must be between 54" and 76" tall to ride.

A high-speed Hyper roller coaster. Riders will experience high speed turns, steep drops, and sudden stop.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. The lap bar must be in firm contact with the pelvis and muscular parts of the thighs. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes at least three fingers and the ability to grip and two functioning legs with feet (excluding Prostheses). Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Prostheses are not permitted on this ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-Rider or be placed in lockers for storage.

WARNING: Magnetic systems are used during this ride.

WARNING: This ride contains strobe lighting.

Taz Prop Delivery Company 2

*Guests must be at least 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per truck.

This ride only accommodates two adult per truck. The adult must sit in the back seat.

This ride is a miniature truck ride that follows an electric track in a "train-like" fashion.

Restraint System: A shared seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Full leg casts must fit safely inside the ride unit.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Tea Cups 3

Guests must be at least 42" tall to ride alone **or** *accompanied by a Supervising Companion. Hand-held infants are not permitted.*

This is a family ride that travels a circular path while individual seats rotate on an axis.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding Prostheses) and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride. Full arm or full leg casts must fit safely inside the ride unit.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Thunderbolt 4

Guests must be at least 48" tall to ride.

A high speed wooden roller coaster with a combination of banked turns and airtime bumps.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Tweety's Clubhouse 2

Guests must be between 36" and 54" tall to ride.

Maximum Weight – 660 lb. max.

This is a family tower ride where Riders are propelled to the top and bounce down to the platform. Riders will experience weightlessness and rapidly changing forces and directions.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, lower leg cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Prostheses are not permitted on this ride. Guests with any type of Prostheses should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Wacky Wagons 1

*Guests must be at least 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Guests ride in gondolas in a miniature Ferris wheel while being suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: A door encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WhirlyBirdz 2

Guests must be at least 42" tall to ride alone **or** *accompanied by a Supervising Companion. Hand-held infants are not permitted.*

This ride only accommodates one adult per helicopter. The adult must sit in the back seat.

A mild helicopter ride with some up and down motion.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Wicked Cyclone 5

Guests must be at least 48" tall to ride.

A thrilling hybrid roller coaster that has a wood frame and steel track turning Riders upside down 3 times. Riders will experience high speeds, weightlessness, and rapid movement from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand (excluding Prostheses) and two functioning legs with feet (excluding Prostheses). Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Prostheses are not permitted on this ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an Associate if you wish to use that row. Please do not use the ride restraints for support while entering and exiting as they will shift.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-Rider or placed in lockers for storage.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

WARNING: Magnetic systems are used during this ride.

WARNING: This ride contains strobe lighting.

Wile E. Coyote Speed Trap 2

*Guests must be at least 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 275 lb. per car.

This ride only accommodates one adult per car.

This children's ride allows guests to ride in their own car that whips around an oblong track.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride. Leg cast/brace must fit safely inside ride unit. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a Companion.

Zinger Swings 2

*Guests must be at least 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Chair swing ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row with an individual between-the-legs safety belt.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion.

Zoom Jets 2

*Guests must be at least 48" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

This ride only accommodates one adult per row.

A slow moving circular ride with mild up and down motion.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Leg cast/brace must fit safely inside ride unit.

Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

HURRICANE HARBOR

Each attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	This is a low speed, and/or shallow water attraction.
Mild Thrill Rides	2	This is a low to medium speed attraction, and/or water depth to 48 inches. Some Rider control, maneuvering and/or swimming skills required.
Moderate Thrill Rides	3	This is a medium speed attraction. Height and water depth may vary. Moderate or unexpected forces can be generated during the ride. This attraction may require Rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Rides	4	This is a fast-paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires Rider body control and strong swimming skills.
Aggressive Thrill Rides	5	This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires Rider body control and swimming skills.

Appropriate Attire
Appropriate swimwear is required. Thongs and transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. Guests wearing bathing attire with metal buttons, rivets, zippers, or snaps will not be permitted to participate on any attractions in Hurricane Harbor. Contact lenses are not recommended. Guests requiring special accommodations should speak to Guest Relations or an Aquatics Supervisor.

Life Jackets
Life jackets are available for all Guests. Only U.S. Coast Guard approved life jackets are allowed in our attractions. Life jackets are provided free of charge.

In Wave Pools, life jackets are required for all Guests (regardless of whether they are using non-electric mobility aids) who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Guests who are less than 42" tall must wear life jackets for all Wave Pool attractions with a standing water depth in excess of 6 inches and be accompanied by Supervising Companions.

In non-Wave Pool water park attractions and any other pools and rivers, Guests who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers must wear a life jacket. Guests who are less than 42" tall must wear life jackets for these water attractions with a standing water depth in excess of 6 inches and be accompanied by Supervising Companions.

Ongoing Lifeguard Training
In an ongoing effort to provide a safe and enjoyable waterpark experience for our Guests, Hurricane Harbor routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water manikins; the use of video surveillance equipment; internal and external audits; and active/inactive water rescues and/or first aid scenarios.

Scales
Scale systems are used at weight sensitive attractions. Groups who exceed the weight requirement will not be permitted to ride. Scales are used at Swiss Family Toboggan.

Swim Diapers
Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

Water Wheelchairs and Pool Lifts

For safety reasons, Electric Conveyance Vehicles ("ECVs") and electric wheelchairs cannot be used or accommodated in water attractions.

A limited supply of water wheelchairs are available at Hurricane Harbor. These can be requested at Hurricane Harbor Guest Relations by the entrance of the waterpark, and at the Cabana rental station to the left of Commotion Ocean. However, since water wheelchairs are available on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own. Due to safety considerations and requirements, and therefore to enhance Guest safety, Guests of Hurricane Harbor New England who require seat restraints must use water wheelchairs provided by Hurricane Harbor with seat restraints provided by the park for certain of its pool attractions. Please note if a disabled Guest does not have or want to use their own water wheelchair and asks to use one of the park's without the need to use a seat restraint, or the Guest must use a seat restraint and therefore must use one of the park's water wheelchairs with seat restraints, the park does not charge a deposit, rent, or other fee for the Guest to use the park's water wheelchair or seat restraint.

For safety considerations and requirements, and therefore to enhance Guest safety, wheelchairs are not permitted in any Lazy River attractions or Lazy River components of Wave Pools. As used throughout this Guide, Wave Pools include Hurricane Bay, Commotion Ocean, Monsoon Lagoon, and Splash Island.

In these Wave Pools and some non-Wave Pool attractions, identified later in this Guide, manual wheelchairs may be used subject to certain limitations for Guest safety. In Wave Pools, or those few non-Wave Pool attractions where manual wheelchairs may be used, due to safety considerations and requirements, and therefore to enhance Guest safety, Guests with mobility disabilities who require a seat restraint: may only use water wheelchairs provided by the park and a seat restraint provided by the park (both on a first-come, first-served basis and at no charge); while accompanied in the water by a supervising companion who may be a parent, guardian, or other person responsible for the Guest and is at least eighteen (18) years of age; and up to a water depth of 18 inches.

In Wave Pools or those non-Wave Pool attractions where manual wheelchairs may be used, Guests with mobility disabilities who do not require a seat restraint: may use either water wheelchairs provided by the park or their own manual water wheelchairs (if the Guest chooses to use a park-provided water wheelchair, one will be provided on a first-come, first-served basis at no charge); and in a water depth that may not exceed the height of the seat on the wheelchair.

The life jacket requirements previously described apply to guests using manual wheelchairs and water wheelchairs, whether provided by the park or their own. Minors who use wheelchairs, with or without a seat restraint, must always be accompanied in the water by a supervising companion. Walkers, canes, or other assistive devices are permitted only at ankle depth in the Wave Pools. An elevator is available at Monsoon Lagoon to access the upper deck. Please contact an aquatics supervisor for use.

WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the types of actions caused by various attractions. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriated observed behavior, and the ability to enter and exit the attraction safely.** However, some specific exceptions or qualifications to those four criteria are noted in the Water Wheelchairs and Pool Lifts section above and in the information provided below. There is no Alternate Access in Hurricane Harbor. Please use caution when entering and exiting waterpark attractions as the surrounding areas may be slippery. Conveying devices such as tubes and rafts may be slippery and can shift during loading and unloading.

Adventure River 1

Life jackets are required for Guests who are less than 48" tall in bare feet. Guests who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests. Guests of all heights who are inexperienced or non-swimmers are encouraged to wear a life jacket.

250 lbs per single tube, 400 per double.

Single or double riders.

This is a slow-moving river tube ride that is 42" deep. Single and double tubes may be used. Guests must accompany a tube in the river.

Rider Criteria: Guests must be able to safely enter/exit the attraction and demonstrate appropriate observed behavior or be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collarbone are not permitted to ride.

Rider Access: Access is available via the zero depth entry. This attraction is not wheelchair accessible. Riders will have to transfer to a tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Big Kahuna 4

Guests must be at least 48" in bare feet to ride.

The maximum individual rider weight is 250 lbs.
The maximum total combined weight of riders is 400 lbs.

Single or double riders only. No lap riders.

A thrilling tube slide where Riders twist and turn in an enclosed flume in near complete darkness before finishing in a 36" depth splash pool. Riders will experience high speeds and rapid movements from side-to-side.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of two functioning arms. Hand-held Infants are not permitted to ride slides. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Cannonball Falls 5

Guests must be at least 48" tall in bare feet to ride.

Maximum Weight – 250 lb. Maximum one Rider per slide.

Guests ride down a serpentine or straight flume where they will experience the thrill of speed and downward movement. Riders will experience enclosed or dark spaces. Riders will decelerate into a runout slide.

Rider Criteria: Riders are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests must possess the physical and cognitive abilities to hold themselves in a feet first position throughout the ride. Hand-held Infants are not permitted to ride slides. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the area may be slippery.

NOTE: No lifejackets are permitted on this attraction.

NOTE: A T-shirt and other loose fitting clothing are not permitted.

Commotion Ocean 4

Life jackets are required for Guests who are less than 52" tall in bare feet. Guests who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests. Guests of all heights who are inexperienced or non-swimmers are encouraged to wear a life jacket.

A large wave pool with depths ranging from 0 to 7 feet. Waves are generated for five minutes on, and then five minutes off. **Strenuous activity is required during wave action cycles which may require the ability to swim and which may result in fatigue. Exercise caution. Participants with a history of seizures – or heart or other serious medical conditions – should be supervised by someone who knows how to swim and how to provide emergency assistance.**

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible as follows: (a) due to safety considerations and requirements, and therefore to enhance Guest safety, Guests in wheelchairs who require a seat restraint: may only use water wheelchairs provided by the park and a seat restraint provided by the park (both on a first-come, first-served basis at no charge); while accompanied in the water by a supervising companion who may be a parent, guardian, or other person responsible for the Guest and is at least eighteen (18) years of age; and up to a water depth of 18 inches; (b) Guests in wheelchairs who do not require a seat restraint: may use either water wheelchairs provided by the park or their own manual water wheelchairs (if the Guest

chooses to use a park-provided water wheelchair, one will be provided on a first-come, first-served basis at no charge); and in a water depth that may not exceed the height of the seat on the wheelchair. Minors using wheelchairs, with or without a seat restraint, must be accompanied in the water by a supervising companion.

WARNING: Only strong swimmers are recommended in the deep water.

Geronimo and Zooma 5

*Guests must be at least 48" in bare feet to ride **or** 42" with a Supervising Companion.*

Maximum Weight – 700 lb. per raft.

Minimum two riders and a maximum of four Riders per raft.

A large serpentine flume where multiple persons ride in a raft down a river rapids-like slide. Guests will experience high speeds, turns, and side-to-side motions. This ride ends in a landing pool 36" deep.

Rider Criteria: Guests must be seated in the tube with feet in the middle, facing forward, sitting up straight, and holding on to both handles. Minimum two guests; maximum four guests. Guests must have a minimum of two functioning arms. Hand-held Infants are not permitted to ride slides. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Hooks Lagoon 2

Guests must be at least 42" tall to ride the body slides.

Maximum 250 lbs.

Maximum one Rider per slide.

A children's aquatic attraction with various water elements in zero depth of water. Play elements include tipping bucket with water, net climbs, splashing and sprays. Hooks Lagoon slides are open and enclosed flumes that land in 36" deep pool. Guests experience high speeds, steep drops, zero gravity effects, and multi directional forces.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Hand-held Infants are not permitted to participate on elevated activity area or elevated structure. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing a few flights of stairs. Riders will have to be capable of safely entering the slide, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the area may be slippery.

NOTE: A manual wheelchair, with or without a seat restraint, may be used on the ground level of Hooks Lagoon.

Hurricane Bay ◆4

Life jackets are required for Guests who are less than 48" tall in bare feet. Guests who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests. Guests of all heights who are inexperienced or non-swimmers are encouraged to wear a life jacket.

A family pool/attraction for swimming and wading with water elements and features, at various depths of water up to 42" deep.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible as described below.

This attraction includes a Lazy River component with waves. Wheelchair use is not permitted in this component of Hurricane Bay. The portion of Hurricane Bay where the Lazy River component empties into the pool and other portions of Hurricane Bay are wheelchair accessible as follows: (a) due to safety considerations and requirements, and therefore to enhance Guest safety, Guests in wheelchairs who require a seat restraint: may only use water wheelchairs provided by the park and a seat restraint provided by the park (both on a first-come, first-served basis at no charge); while accompanied in the water by a supervising companion who may be a parent, guardian, or other person responsible for the Guest and is at least eighteen (18) years of age; and up to a water depth of 18 inches; (b) Guests in wheelchairs who do not require a seat restraint: may use either water wheelchairs provided by the park or their own manual wheelchairs (if the Guest chooses to use a park-provided water wheelchair, one will be provided on a first-come, first-served basis at no charge); and in a water depth that may not exceed the height of the seat on the wheelchair. Minors using wheelchairs, with or without a seat restraint, must be accompanied in the water by a supervising companion.

Hurricane Falls 3

Guests must be at least 36" tall in bare feet to ride.

Maximum 250 lbs.

Maximum one Rider per slide.

An open and enclosed flume that ends in a 6" deep runout. Guests experience high speeds, steep drops, zero gravity effects, and multi-directional forces.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests must possess the physical and cognitive abilities to hold themselves in a feet first position throughout the ride. Hand-held Infants are not permitted to ride slides. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

NOTE: No lifejackets are permitted on this attraction.

NOTE: T-shirts and other loose fitting clothing are not permitted. Appropriate swimwear required.

Lily Pads 2

Guests under 52" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. Riders must be able to reach the ropes.

An interactive Lily Pad Crossing with hanging nets and floating platforms. Maximum water depth is 36" deep.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Hand-held infants may not participate on the Lily Pads. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to this attraction is available from the main walkway. Please use caution when entering and exiting as the area may be slippery.

Monsoon Lagoon 4

Life jackets are required for Guests who are less than 52" tall in bare feet. Guests who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests. Guests of all heights who are inexperienced or non-swimmers are encouraged to wear a life jacket.

A large wave and activity pool with water elements and features with depths ranging from 0 to 5 ½ ft (167.64 cm). One side of the pool has waves, the other is flat water with water features. Waves are generated for five minutes on, and then five minutes off. **Strenuous activity is required during wave action cycles which may require the ability to swim and which may result in fatigue. Exercise caution. Participants with a history of seizures – or heart or other serious medical conditions – should be supervised by someone who knows how to swim and how to provide emergency assistance.**

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible as follows: (a) due to safety considerations and requirements, and therefore to enhance Guest safety, Guests in wheelchairs who require a seat restraint: may only use water wheelchairs provided by the park and a seat restraint provided by the park (both on a first-come, first-served basis at no charge); while accompanied in the water by a supervising companion who may be a parent, guardian, or other person responsible for the Guest and is at least eighteen (18) years of age; and up to a water depth of 18 inches; (b) Guests in wheelchairs who do not require a seat restraint: may use either water wheelchairs provided by the park or their own manual water wheelchairs (if the Guest chooses to use a park-provided water wheelchair, one will be provided on a first-come, first-served basis at no charge); and in a water depth that may not exceed the height of the seat on the wheelchair. Minors using wheelchairs, with or without a seat restraint, must be accompanied in the water by a supervising companion.

WARNING: Only strong swimmers are recommended in the deep water.

QPirate Slide 1

Children's slide that empties into 6" of water, with play elements designed to look like a pirate ship.

Rider Criteria: Riders are required to sit with feet facing forward. Hand-held Infants are not permitted to ride slides. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible as follows: (a) due to safety considerations and requirements, and therefore to enhance Guest safety, Guests in wheelchairs who require a seat restraint: may only use water wheelchairs provided by the park and a seat restraint provided by the park (both on a first-come, first-served basis at no charge); while accompanied in the water by a supervising companion who may be a parent, guardian, or other person responsible for the Guest and is at least eighteen (18) years of age; and up.

Shark Attack 4

Guests must be at least 48" tall in bare feet to ride.

The maximum individual rider weight is 250 lbs.
The maximum total combined weight of riders is 400 lbs.

Single or double riders only. No lap riders.

A thrilling tube slide where Riders twist and turn in an enclosed flume in near complete darkness before finishing in a 36" deep splash pool. Riders will experience high speeds and rapid movements from side-to-side.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have a minimum of two functioning arms. Hand-held Infants are not permitted to ride slides. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Shipwreck Cay 1

Small children's slide that empties into 6" of water.

Rider Criteria: Guests are required to slide upright or lying on back feet first. Hand-held infants are not permitted to ride slides. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the slides requires climbing a few steps. Riders will have to be capable of safely entering the slide, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the area may be slippery.

Splash Island 3

Life jackets are required for Guests who are less than 48" tall in bare feet. Guests who are less than 42" tall must wear life jackets and be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests. Guests of all heights who are inexperienced or non-swimmers are encouraged to wear a life jacket.

A family pool/attraction for swimming and wading with water elements and features and a depth of 24".

Rider Criteria: Hand-held Infants must be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible as follows: (a) due to safety considerations and requirements, and therefore to enhance Guest safety, Guests in wheelchairs who require a seat restraint: may only use water wheelchairs provided by the park and a seat restraint provided by the park (both on a first-come, first-served basis at no charge); while accompanied in the water by a supervising companion who may be a parent, guardian, or other person responsible for the Guest and is at least eighteen (18) years of age; and up to a water depth of 18 inches; (b) Guests in wheelchairs who do not require a seat restraint: may use either water wheelchairs provided by the park or their own manual water wheelchairs (if the Guest chooses to use a park-provided water wheelchair, one will be provided on a first-come, first-served basis at no charge); and in a water depth that may not exceed the height of the seat on the wheelchair. Minors using wheelchairs, with or without a seat restraint, must be accompanied in the water by a supervising companion.

Swiss Family Toboggan 4

*Guests must be at least 42" in bare feet to ride **or** 36" with a Supervising Companion.*

Maximum Weight – 600 lb. per raft.

Maximum 4 Riders per raft.

A large serpentine flume where 1 – 4 guests may ride in a raft down a river rapids-like slide and land in a 36" deep pool. Guests experience high speeds, steep drops, zero gravity effects, and multi-directional forces.

Rider Criteria: Riders are required to remain seated with back against the raft, legs crossed, facing forward, and holding onto the handles. Guests must have a minimum of two functioning arms. Guests must possess the physical and cognitive abilities to hold themselves in an upright seated position throughout the ride. Hand-held infants are not permitted to ride slides. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the raft may shift. The raft and surrounding area may also be slippery.

NOTE: T-shirts and other loose fitting clothing are not permitted. Appropriate swimwear required.

NOTE: A red light/green light scale is used at this attraction. Groups who exceed the weight requirements will not be permitted to ride.

Tornado 5

Guests must be at least 54" tall in bare feet to ride.

Maximum Weight – 700 lb. per tube.

Two, three, or four riders are permitted. No lap riders.

Cloverleaf tubes take riders twisting and turning into complete darkness before dropping vertically into a funnel. The tube will slide back and forth in the funnel before finally ending in a 36" splash pool.

Rider Criteria: Guests must be seated in the tube with feet in the middle, facing forward, sitting up straight, and holding on to both handles. Minimum two guests; maximum four guests. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

ENTERTAINMENT VENUES

ROCKVILLE THEATER

Rockville Theater, located in the Rockville 50's area of the park, is an indoor airconditioned and heated theater featuring main stage show productions. There are viewing areas in the front, sides and rear that can accommodate wheelchairs and companions. This venue is also equipped with assistive listening devices for the hearing impaired. Show up early and ask an usher or staff member for assistance. Check the free Six Flags Mobile App for midway shows, show times and character appearances.

CENTER STAGE

Center Stage located in Kidzopolis by the Scream Towers is an outdoor stage featuring main stage show productions and/or interactive experiences. There are viewing areas that can accommodate wheelchairs and companions. Show up early and ask an usher or staff member for assistance. Show times are available on the free Six Flags Mobile App.

Due to the popularity of our shows, we suggest you arrive early as seating may be limited. Permanent venues with seating are located at Rockville Theater and Center Stage. Show schedules are available on the Six Flags New England mobile app and at any theater entrance. All entertainment venues are accessible to guests who may have a mobility impairment. Assisted listening devices are available for Guests who are hearing impaired at Rockville Theater, to be used within Rockville Theater only. Please ask a Team Member at the venue for assistance.

HALLOWEEN NIGHTTIME EVENT: FRIGHT FEST

Fright Fest at Six Flags New England has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Characters in our Fright Fest attractions will not touch you; please do not touch them in any manner. Guests that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks. Service animals are welcome to attend Fright Fest events. Guests with service animals, please note that these attractions use loud noises, theatrical lighting, special effects, and sudden moments intended to provide our Guests with a thrilling experience. We rely on you to determine whether this attraction is appropriate for your service animal to experience. We remind guests with service animals that they must maintain full control of their service animal at all times while in the Park.

Please adhere to all posted and verbal warnings and directions.

HALLOWEEN DAYTIME/FAMILY EVENT: BOO FEST

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions or services offered visit Guest Relations.

NOTES

WARNING

There are inherent risks in participating in any amusement water attraction. If you choose to participate, you accept these risks and agree to do so responsibly. Read all important safety information in this Guide and at the park prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations, Six Flags New England does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition,
DO NOT RIDE.

All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened properly to allow Guests to ride.
