Dorney Park & Wildwater Kingdom

GUEST ACCESSIBILITY GUIDE

WELCOME TO DORNEY PARK & WILDWATER KINGDOM!

We are glad you are here! At Dorney Park & Wildwater Kingdom we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment and we want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at [Insert Location]. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Ride Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Associates to help accommodate you.

RIDE SAFELY

PENNSYLVANIA ACT NO. 1994-58 requires that Riders must obey all warnings and directions regarding rides and must behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is cause for dismissal from the Park without refund.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Dorney Park & Wildwater Kingdom. Remember, if you suspect your health could be at risk for any reason, or if you could aggravate a pre-existing condition of any kind, **DO NOT RIDE**.

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or be assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harness and seatbelts, must be positioned, fastened and tightened at all times.
- Keep all parts of your body inside ride unit at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Dorney Park & Wildwater Kingdom is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone or electronic usage while riding is prohibited.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Dorney Park & Wildwater Kingdom.

RIDE RATING SYSTEM

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides		Rides that are generally calm and gentle in nature.
Mild Thrill Rides		Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides		Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides		Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.
Aggressive Thrill Rides		Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates Wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum Speed of Ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum Height of Ride
	Maximum Water Depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

 This symbol is used to identify rides where the Rider may remain in their wheelchair. Wheelchairs can be accommodated on Cedar Creek Cannonball.

 This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

 This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Dorney Park & Wildwater Kingdom uses the following terms:

 **Ability to Hold On or Brace:** Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

 **Hand-held Infants:** Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Antique Carousel (in a chariot); Cedar Creek Cannonball (center of the bench); and Zephyr (center of the bench). Hand-held infants and their Supervising Companion may also enjoy: Seaside Splashworks; Kid's Cove; and Lollipop Lagoon, but may not participate on the elevated sections of the attractions.

 **Supervising Companion:** Many of our rides have height requirements that allow a Guest under that requirement to ride with a Supervising Companion. A Supervising Companion is a Companion who is at least 54" in height and approximately 14 years of age, who meets all other criteria for riding, and who will assist their Companion in complying with safe participation instructions. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Assistance Guide or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrance.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride: Antique Carousel; Cedar Creek Cannonball; Ferris Wheel; MT Buckets; SNOOPY'S Cloud Climbers; and Zephyr and participate in: Runaway River; Seaside Splashworks (structure); Splash Landing; Wave Pool; Wildwater Cove; and Wildwater River.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be "officially" measured at Ride Services. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height measuring device may be used during the height measuring process. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, shoes that contribute excessively to a Guest's height are prohibited during measuring. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Dorney Park & Wildwater Kingdom reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

In Wildwater Kingdom, height measurements are taken in bare feet. (There is a separate height wristband system for Wildwater Kingdom).

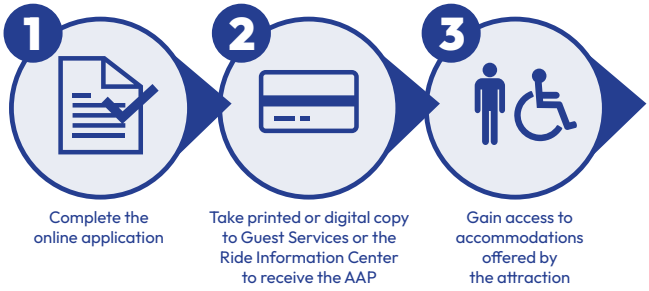

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Ride Services upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services Associate will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request reasonable accommodations are encouraged to obtain the IBCCES Accessibility Card (IAC) by registering at accessibilitycard.org or via the Accessibility Card mobile App. Once a Guest has filled out the online application and uploaded necessary documentation into a secure online portal, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to Dorney Park & Wildwater Kingdom upon their arrival at the park to express their accommodation needs. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Associate will provide the details needed to participate in the program.

Note: Only IBCCES can issue the IBCCES Accessibility Card, and not Dorney Park & Wildwater Kingdom.

CASTS & BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on most slides in Wildwater Kingdom.

The following chart displays the cast and brace rules for all rides and attractions.

C Must ride in a chariot

F Cast/Brace must fit safely in the ride unit

Y May ride with the condition

Z Participation or water depth may be restricted if necessary

PROSTHESIS

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most Wildwater Kingdom attractions. Guests are encouraged to visit Ride Services for assistance before riding to ensure a safe experience.

Leg prostheses are not permitted on: Hydra; Iron Menace; or Talon.

The manufacturers of Demon Drop and Possessed require documentation from the prosthetic device's manufacturer confirming it is designed to withstand high-speed roller coaster forces of up to 68 mph and G-forces between 1 to 5 Gs, with sufficient safety measures in place.

RIDE DEVICES

For safety reasons, certain attractions may require the removal of medical devices or prosthetics. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

On rides equipped with removable seats, Guests using wheelchairs may transfer directly to the ride vehicle. Ride attendants and Guest service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Transfer devices, when requested, can be used to assist a Guest out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Iron Menace; SNOOPY'S™ Rocket Express; Steel Force; Thunderhawk; Wild Mouse; and Woodstock Express.

Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Hydra; Iron Menace; and Talon.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride Attendant or Ride Services.

ADDITIONAL INFORMATION & SERVICES

Our goal is to make Dorney Park & Wildwater Kingdom as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large Print Guides
Print versions of the Park Guide and Guest Accessibility Guide are available at Guest Services. Braille and large print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Family Care Center
A space for nursing mothers is available at the Family Care Center in PLANET SNOOPY™. Baby changing areas and a companion restroom can be found in most restrooms. Please feel free to ask an Associate for directions to these locations or review a park map.

First Aid
Our First Aid Station located adjacent to Good Time Gifts is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. In addition, a First Aid Station is located in Wildwater Kingdom adjacent to Aqua Racer. This location is open during Wildwater Kingdom operating hours.

Hearing Needs
Assistive listening devices are available upon request. These lightweight, wireless devices amplify sounds using signals from transmitters located throughout the park and are recommended for Guests with mild to moderate hearing loss. For more details or to obtain a device, please visit Guest Services.

If you require American Sign Language (ASL) interpreting services, we can provide them with at least 7 days' advance notice for live show venues. Additionally, show scripts or score sheets can also be requested at each venue. To arrange ASL services, please complete the request form online at **sixflags.com/dorneypark**.

Parking
Accessible parking is available on a first-come, first-served basis within the main parking lots of the park. When you arrive at the parking toll booths, ask an Associate for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disability parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask an Associate for directions to additional parking areas.

Quiet Room
Dorney Park offers a Quiet Room located at the Family Care Center in PLANET SNOOPY™ for family members or caregivers to take a break and reduce sensory stimulation. Additionally, there are sensory features provided for guest use.

Restrooms
Private restroom facilities for Guests needing the assistance of a companion are available at Dorney Park First Aid and Wildwater Kingdom First Aid. Wheelchair accessible stalls are located at all restrooms For your convenience we also have a family restroom available at the Family Care Center in PLANET SNOOPY™, across from the Good Time Theatre on the corner of Good Time Gifts, and near Kid's Cove in Wildwater Kingdom.

Rider Swap program
The Rider Swap program allows one adult to stay with non-riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services near the park entrance.

Service Animals
Service animals are welcome at Dorney Park & Wildwater Kingdom. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include: guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be housebroken, controlled with a restraining device, and they must display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or Associate will be directed to remove the animal from the park. There is a limit of two service animals per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on: Antique Carousel; Camp Bus; Cedar Creek Cannonball; Ferris Wheel; Flying Ace Balloon Race; SNOOPY'S Junction; Woodstock's Wagon Wheel; and Zephyr. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and

seated on the floor, not the ride seat. They may also attend performances. Service animals are not permitted in water attractions, wet decks, wading pools, or lazy rivers. They are permitted to walk through the park areas, including scare zones. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information.

A Service Animal "relief area" is located in the area next to Hydra. Owners are responsible for disposing of their animal's waste.

Special Dietary Needs
Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles
A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at Good Time Gifts. Online reservations are available for wheelchair/ECV rentals in advance of your visit. Reservations can be made by going to **sixflags.com/dorneypark** and visit the rentals page under the Tickets tab. Rentals are also available at the park while supplies last.

Wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park Associate will be happy to provide any assistance you may need at that time. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park. Manual Wheelchairs are available at ride locations with Wheelchair Lifts if weight exceeds the max capacity.

Guests Using Wheelchairs & ECV's
We require a safe speed be maintained while traveling in the park by Guests who choose to use a wheelchair or ECV. Wheelchairs and ECV's cannot be accommodated on most rides and attractions, with the exception of Cedar Creek Cannonball, where one wheelchair can be accommodated. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information. For information on water wheelchairs in the waterpark, please see the Water Wheelchair and Pool Lifts section.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A standard elevator or wheelchair lift is

available at: Iron Menace; Hydra, SNOOPY'S™ Rocket Express; Steel Force; and Talon to transport a Guest in a wheelchair to our 2nd story ride platform. Please use the call button at base of lift to request service. Manual wheelchairs are available at all locations with a wheelchair lift if weight exceeds the max posted capacity. If an ECV has attachments to the vehicle which could impede with the operation of a lift or with safe lift ingress and egress, please transfer to manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask an Associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Ride Services. Dorney Park & Wildwater Kingdom personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Guest Services.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. In Wildwater Kingdom, Guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on: Hydra; Iron Menace; Possessed; Revolution; Steel Force; Talon; Thunderhawk; Wave Swinger; and Wild Mouse.

Maximum [and minimum] weight limits can be found under the individual rides in this guide and on the Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned about whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrances of: Hydra; Iron Menace; Possessed; Revolution; and Talon.

The manufacturer requires a maximum Guest height on the following rides: Iron Menace (78"); Musik Express (78"); Possessed (78"); and Wild Mouse (75").

GUESTS USING WHEELCHAIRS

Wheelchairs and ECV's cannot be accommodated on most rides and attractions, with the exception of Cedar Creek Cannonball, where one wheelchair can be accommodated. If your wheelchair can be safely accommodated, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this brochure for more specific information.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A standard elevator is available at Talon and Iron Menace to transport a Guest in a wheelchair to our 2nd story ride platform and wheelchair lifts are available at: Hydra; SNOOPY'S™ Rocket Express; and Steel Force. Please use the call button at base of lift to request service. Please ask an Associate at each location for assistance.

If an ECV has attachments to the vehicle which could impede with the operation of a lift or with safe lift ingress and egress, please transfer to manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Dorney Park & Wildwater Kingdom personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at The Family Care Center and Guest Services.

LOOSE ARTICLES

Most rides cannot accommodate loose articles including: cell phones; hats; cameras; purses; backpacks; basketballs; umbrellas; beverage containers; electronic devices; etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Dorney Park & Wildwater Kingdom is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body.

Using cell phones or other electronic device for any purpose, including picture taking, is prohibited on most rides. Failure to comply may result in ejection from the park.

Glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see an Associate for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST AND FOUND

All items found at Dorney Park & Wildwater Kingdom are turned in to Lost and Found at Guest Services. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported at SixFlags.com/lost-and-found

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnets are used at the following attractions: Iron Menace; Possessed; and White Water Landing. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: Antique Carousel (chariot); Cedar Creek Cannonball; Ferris Wheel; SNOOPY'S™ Junction; and Zephyr. The tank must fit safely in the ride unit and not interfere with the ride restraint system. For your convenience, the park's First Aid station(s) will be able to appropriately store your additional oxygen tanks during your visit.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the ride restraint system to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

PHOTOSENSITIVITY/STROBE LIGHTING

Many attractions utilize special effects, including but not limited to: haze and other atmospheric effects, scents, areas of low lighting, loud music, sound effects, strobe lighting and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions. Attractions utilizing these effects include: Dominator; Hydra; Iron Menace; Steel Force; Talon; and Woodstock Express.

PROPER ATTIRE

For the safety and enjoyment of our Guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride with shirts, shorts and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. On all roller coasters, loose clothing will be required to be removed in their entirety. Loose fitting shoes may only be removed before riding: Dominator; Hydra; Iron Menace; Linus Launcher; Possessed; Revolution; and Wave Swinger.

Swimwear is not permitted on rides outside of Wildwater Kingdom with the exception of Thunder Canyon and White Water Landing. Swimwear is required to be appropriate. Thongs or transparent clothing are not permitted.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Independent seated postural.
The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck, and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.
The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.
Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to hold on with two functioning arms.
Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with one functioning leg.
Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with two functioning legs.
Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Minimum of two functioning extremities.
Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.
Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.
Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.
Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our Associates and Guests, Associates are instructed not to perform any lifting of Guests.

Appropriate observed behavior:
Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest requirements. Appropriate observed behavior may include, but not be limited to, maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment, and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Antique Carousel 1

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.*

Maximum Weight – 170 lbs. per animal; 680 lbs. per chariot.

A carousel ride which features animals — both stationary and moving up and down — and chariot seating mounted on a circular platform that rotates.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the chariot. Riders with a full leg cast must be seated in a chariot.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, are permitted to ride on the ride platform or chariots.

Camp Bus 2

*Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lbs. per row.

This ride only accommodates one adult per row.

Bus with six rows that seats four Riders per row. The bus rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Cedar Creek Cannonball 1

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Guests less than 42" tall must sit in the center of the bench.*

Riders board an antique train ride that offers a round trip through the upper area of the park.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a Supervising Companion.

Rider Access: Alternate Access is available at the attraction exit. This attraction is wheelchair accessible. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Charlie Brown's Wind Up 2

*Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 275 lbs. per swing.

This ride only accommodates one adult per swing.

Chair swing children's ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row with an individual between-the-legs safety belt. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

Demon Drop 5

Guests must be 48" tall to ride.

A tower ride where Riders ascend the tower in a car that is dropped in a free fall at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend the tower.

Restraint System: A shoulder harness secures each Rider over the head and across the chest.

Rider Criteria: Guests must have a minimum of three functioning extremities that includes one functioning arm with a hand. Two functioning arms that include a hand are sufficient instead of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted on this ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down and over into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Dodgem 4

*Guests must be 48" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

A bumper car ride where Riders drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride. Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down and over into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: Avoid head-on collisions.

Dominator 5

Guests must be 48" tall to ride.

A tower ride with a chair lift-type seat where Riders are propelled up or shot down at high speeds. Guests will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

WARNING: This ride contains strobe lighting.

Enterprise 4

Guests must be 54" tall to ride.

A spinning thrill ride where gondolas quickly increase in speed from a horizontal position to a vertical position, thereby turning Riders upside down. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A door with a safety chain encapsulates the ride unit to secure Riders.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Ferris Wheel 2

*Guests must be 48" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants or single riders are not permitted.*

Maximum Weight - 1,020 lbs per gondola.

A Ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Flying Ace 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 660 lbs. per row.

This ride only accommodates one adult per row.

A swinging boat ride designed for children that produces a feeling of weightlessness.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift

Flying Ace Balloon Race 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 550 lbs. per balloon.

A tower with free hanging cabins suspended from an elevated, rotating pylon that rotates clock-wise as it climbs the tower for a great aerial view of the area.

Restraint System: An individual seatbelt secures Riders across the thighs and pelvis. A door further encloses the ride unit. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities, including a minimum of one functioning arm with a hand (excluding prosthesis). Guests with cervical collar, neck brace or broken collarbone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Hydra 5

Guests must be 54" tall to ride.

A high-speed, floorless looping roller coaster which turns Riders upside down multiple times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line

Rider Criteria: Guests must have one functioning arm that includes a hand and two legs. Two functioning arms including hands are sufficient if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation must be below the knee. Alternatively, two legs including feet are sufficient if guest has one functioning arm that includes a hand. Legs may be paralyzed. Guests with a cervical collar, neck brace, or

broken collarbone are not permitted to ride. Casts are not permitted on this ride. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available via the Fast Lane entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the exit to the ride platform. Please use the phone at the base of the lift to request assistance. Manual wheelchair available if weight exceeds the max capacity of 750 lbs. Limit one Rider in wheelchair and one companion in lift at a time.

WARNING: This ride contains strobe lighting.

Iron Menace 3

*Guests must be between 48" tall **and** 78" tall to ride.*

A high-speed, floorless looping dive roller coaster which turns Riders upside down multiple times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have one functioning arm that includes a hand and two legs. Two functioning arms including hands are sufficient if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation must be below the knee. Alternatively, two legs including feet are sufficient if guest has one functioning arm that includes a hand. Legs may be paralyzed. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are

eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

Kaleidoscope 3

*Guests must be 54" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 330 lbs. per car

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride's main clockwise rotation. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Kite Eating Tree 2

Guests must be 36" tall to ride.

Maximum Weight – 300 lbs. per seat;.

This ride only accommodates one adult per ride.

This children's ride hoists Riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests may ride with one leg amputation; amputation must be at the knee or below. Guests with the leg amputation must be at least 42" tall to ride or accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Linus Launcher 3

*Guests must be 42" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 275 lbs. per vehicle.

This ride only accommodates one adult per vehicle.

A circular ride where Riders experience the sensation of flying in an elevated, slanted and prone position. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A cage secures Riders across the back, shoulders and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

MT Buckets 3

*Guests must be 44" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight — 340 lbs per car.

Riders ride in suspended cars that rotate in a circle. Once the ride's speed increases, Riders use a fin on the front of the car to steer the car higher or lower

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Musik Express 3

*Guests must be 52" tall to ride alone **or** 40" tall **and** accompanied by a Supervising Companion. Hand-held infants are not permitted. Maximum height for Guests is 78" tall.*

Maximum Weight – 495 lbs. per car.

This is a circular ride where cars follow an undulating course. Riders will experience acceleration and side-to-side movement.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

PEANUTS™ 500 2

*Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 275 lbs. per car.

This ride only accommodates one adult per car.

This children's ride allows Riders to ride in their own car that whips around an oblong track.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. The smaller Rider must sit on the inside seat..

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

PEANUTS™ Road Rally 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 500 lbs. per truck.

This ride only accommodates one adult per truck. The adult must sit in the back seat.

This ride is a miniature truck ride that follows an electric track in a "train-like" fashion.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit in the front row.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Possessed 5

*Guests must be between 52" tall **and** 78" tall to ride.*

An impulse roller coaster using linear induction motors to launch Riders both forward and backward. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be

below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restraints them. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

Revolution

Guests must be 48" tall to ride

A thrill ride that swings to the height of 65 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Road Rally 2

*Guests must be 48" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

This is an sports car styled gas-powered car that is driven by the Rider on a designated track for up to two Riders per car.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests with a cervical collar or neck brace are not permitted to ride. **Driver Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. **Passenger Rider Criteria:** Guests must have sufficient lower extremities to ensure the ride's restraint system adequately restrains them. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion. Guests with a visual impairment must ride with a Supervising Companion who meets the requirements to drive.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car. Please use caution, as the ride unit may shift when entering and exiting.

CAUTION: Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.

Sally's Swingset 2

*Guests must be between 36" tall **and** 73" tall to ride.*

This ride only accommodates two adults per row.

A large swing ride designed for children that produces a feeling of weightlessness.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. A between-the-legs safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Scrambler 3

*Guests must be 48" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

Maximum Weight – 510 lbs. per car.

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Sea Dragon 3

*Guests must be 48" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 680 lbs. per row.

A swinging boat ride that produces a feeling of weightlessness.

Restraint System: A shared lap bar secures all Riders in the row. Smaller Riders must sit towards the middle of the row.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride. Full leg cast must fit safely in the ride unit in order to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

SNOOPY'S™ Cloud Climbers 2

Guests must be under 54" tall to ride. Hand-held infants are not permitted to ride.

A kiddie helicopter ride where Riders control the elevation of each unit.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

SNOOPY'S™ Junction 1

*Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lbs. in locomotive; 825 lbs. in each car.

This ride only accommodates 2 guests (1 adult) per locomotive, maximum 4 Guests (2 adults) per car.

Riders board a miniature train ride in the Planet SNOOPY™ section of the park.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

SNOOPY'S™ Rocket Express 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 780 lbs. per car.

This ride only accommodates two adults per car.

Rockets that follow an elevated electric track through the Planet SNOOPY™ area of the park.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Braced arm casts or full leg casts must fit safely in the ride unit.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. A wheelchair lift is available to transport Guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lb. Limit one Guest in wheelchair and one companion in lift at a time.

Steel Force

Guests must be 48" tall to ride.

An out and back hyper steel roller coaster with banked curves and airtime hills. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. A wheelchair lift is available to transport guests from the exit to the ride platform. Manual wheelchair available if weight exceeds the max capacity of 750 lbs. Limit one Guest in wheelchair and one companion in lift at a time.

WARNING: This ride contains strobe lighting.

Talon

Guests must be 54" tall to ride.

A high-speed, inverted looping roller coaster which turns Riders upside down four times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have one functioning arm that includes a hand and two legs. Two functioning arms including hands are sufficient if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation must be below the knee. Alternatively, two legs including feet are sufficient if guest has one functioning arm that includes a hand. Legs may be paralyzed. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available via the Fast Lane entrance. An elevator is available to transport Guests to the ride platform. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat.

WARNING: This ride contains strobe lighting.

Thunder Canyon 4

Guests must be 46" tall to ride.

Maximum Weight – 1,200 lbs. per boat.

A family water ride where Riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under

the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available via the Fast Lane entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Watch your step, as the ride unit may be slippery and wet.

CAUTION: Boats may bump into the side of channel and other boats.

Thunder Creek Mountain 4

*Guests must be 46" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

This is a water flume ride; Riders may get wet. Riders will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

CAUTION: Boats may bump into the side of channel and other boats.

Thunderhawk 4

Guests must be 48" tall to ride.

A wooden roller coaster with large drops and banked turns.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest

has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Tilt-A-Whirl 3

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted. Guests less than 6 years old must be accompanied by a Supervising Companion.*

Maximum Weight – 800 lbs. per car.

This is a circular ride where cars pivot by centrifugal force created by the ride's rotating table.

Restraint System: A shared lap bar secures all Riders in the row. A safety belt further secures the lap bar. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below knee. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast, are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Wave Swinger 3

Guests must be 48" tall to ride.

Maximum Weight – 230 lbs. per Rider

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Whip 2

*Guests must be 46" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

This classic ride allows Riders to ride in their own car that whips around an oblong track. Riders will experience sharp turns and rapid movements from side-to-side.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

White Water Landing ◆4

Guests must be 48" tall to ride.

Maximum Weight – 230 lbs. per Rider.

This is a water shoot-the-chutes ride; Riders may get wet. Riders will be seated in a boat and brace for a plunge down a chute and a splash of water.

Restraint System: A shared lap bar secures all Riders in the row.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available via the Fast Lane entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Watch your step, as the ride unit may be slippery and wet.

CAUTION: Boats may bump into the side of channel and other boats.

WARNING: This ride utilizes magnetic systems

Wild Mouse ◆4

*Guests must be 48" tall to ride alone **or** 44" tall **and** accompanied by a Supervising Companion. Maximum height for guests is 75" tall.*

Maximum Weight – 680 lbs. per car.

This ride only accommodates two adults per car.

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. An individual seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

CAUTION: Cars may bump into each other.

Woodstock Express 3

*Guests must be 42" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.*

This ride only accommodates two adults per car.

A junior steel roller coaster with mild drops, bumps, and turns. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a Rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock's Wagon Wheel 2

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lbs. per gondola.

This ride only accommodates one adult per gondola.

A miniature Ferris wheel ride where Riders ride in gondolas suspended from the outer rim of the wheel. Riders will experience changes in direction and elevation.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Woodstock Whirlybirds 2

*Guests must be 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 550 lbs. per car.

This ride only accommodates two adults per car.

This is a family ride that travels a circular path while individual seats rotate on an axis.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Zephyr 1

*Guests must be 42" tall to ride alone **or** accompanied by a Supervising Companion.*

Riders board an antique train ride that offers a round trip through the lower area of the park.

Restraint System: A door with a safety lock secures Riders.

Rider Criteria: Guests who do not have independent seated postural control or appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

WILDWATER KINGDOM

Each attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	This is a low speed, and or shallow water attraction.
Mild Thrill Rides	2	This is a low to medium speed attraction, and/or water depth to 48 inches. Some Rider control, maneuvering and/or swimming skills required.
Moderate Thrill Rides	3	This is a medium speed attraction. Height and water depth may vary Moderate or unexpected forces can be generated during the ride. This attraction may require Rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Rides	4	This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires Rider body control and strong swimming skills.
Aggressive Thrill Rides	5	This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires Rider body control and swimming skills.

Appropriate Attire

Appropriate swimwear is required to participate on all attractions. Thongs and transparent clothing/swimwear are not permitted. We reserve the right to determine the appropriateness of swimwear. Guests wearing bathing attire with metal buttons, rivets, zippers, or snaps will not be permitted to participate in any of our attractions. Jewelry including but not limited to, necklaces, bracelets, dangling earrings, and rings other than wedding bands are prohibited on Python Plummet. For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed and placed in a waist pack, in a locker, or with a non-participant to prevent any interference with the ride experience. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Contact lenses are not recommended. Guests requiring special accommodation should speak to a member of the Aquatics Supervisory Team.

Life Jackets

Life jackets are available for all Guests. Only U.S. Coast Guard approved life jackets are allowed as floatation devices. Life jackets are provided free of charge for Guests who require one.

In wave pools, life jackets are required for Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Wave Pool and Wildwater Cove.

In other attractions requiring life jackets, children who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers must wear a life jacket. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Runaway River and Wildwater River.

Ongoing Lifeguard Training

In an ongoing effort to provide a safe and enjoyable waterpark experience for our Guests, WildwaterKingdom routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water manikins, the use of video surveillance equipment, internal and external audits, and responsive/unresponsive water rescues and/or first aid scenarios.

Swim Diapers
Diaper dependent Guests are required to wear swim diapers or a diaper specifically designed for aquatic use while participating in Wildwater Kingdom attractions. Swim diapers are available for purchase at Tradewinds.

Water Wheelchairs & Pool Lifts
A water wheelchair is available for Guests requiring additional assistance when gaining access into Seaside Splashworks (ground level on), Wave Pool, and Wildwater Cove. The water wheelchair may be used by multiple Guests on the same day. While in a wave pool, the water level may not exceed the height of the seat on the chair. Guests participating in a wave pool are permitted to use a personal wheelchair. Personal wheelchairs are permitted up to the seat's water depth. Guests utilizing wheelchairs will not be required to utilize a lifejacket while in the wave pool only if their height exceeds 52" tall and meet all other rider criteria for the attraction. Guests may choose to use a water wheelchair instead of a personal wheelchair. While using either a personal wheelchair or a water wheelchair, Guests must not utilize the wheelchair's seatbelts while in the wave pool.

Motorized or electric personal wheelchairs will be permitted at Seaside Splashworks. Walkers, canes, or other assistive devices are permitted only at ankle depth in the following attraction(s): Seaside Splashworks; Wave Pool; and Wildwater Cove. A pool lift is available at Runaway River and Wildwater River.

During your visit, please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair or pool lift and for further accessibility information.

WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the types of actions caused by various attractions. Each of the following attractions will identify the restrictions according to the criteria outlined on page 11. In order to participate on most attractions, Guests must have independent seated postural control, appropriate center of gravity, appropriated observed behavior, and the ability to enter and exit the attraction safely. Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each attraction. Please use caution when entering and exiting waterpark attractions as the surrounding areas may be slippery. Conveying devices such as tubes and rafts may be slippery and can shift during loading and unloading.

Aqua Racer 4

Guests must be 42" tall in bare feet to participate.

Maximum Weight – 300 lbs. per Rider.

One single rider per mat and slide.

Slide complex that has Riders slide head first on a mat down flumes into a 6" deep runout.

Rider Criteria: Guests must lie stomach down on a mat, facing forward, and firmly grasping the handles throughout the ride with elbows tucked in towards the body. Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: : Access to the attraction requires climbing several flights of stairs with a mat. Riders will have to ascend the slide tower and be capable of safely boarding the mat, on their own or with the assistance of a companion. Please use caution when entering and exiting as the mat may shift. The mat and surrounding area may be slippery.

Aquablast 5

Guests must be 46" tall in bare feet to participate.

Maximum Weight – 800 lbs. per raft.

Four person family raft waterslide, with banked turns and drops ending in a 36" splash pool. Minimum of two Riders and maximum of four.

Rider Criteria: Guests are required to remain seated with back against the raft, legs crossed, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion. Please use caution when entering and exiting as the raft may shift. The raft and surrounding area may also be slippery.

Boa Blaster 5

Guests must be 48" tall in bare feet to participate.

Maximum Weight – 300 lb. per Rider.

These three slides send riders, who are seated on an inner tube, through twists and turns in near complete darkness.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Cascade 4

Guests must be at least 54" tall in bare feet to ride.

Maximum Weight – 400 lbs. per rider.

A large humpback slide that drops the riders into a 48" deep splash pool.

Rider Criteria: Guests must remain seated in the tube facing forward and holding onto the handles. The smaller guest sits in front in between the legs of the larger rider. Single riders must be seated in the back. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Constrictor 5

Guests must be 48" tall in bare feet to participate.

Maximum Weight – 300 lb. per tube.

These two slides send riders, who are seated on an inner tube, through twists and turns in near complete darkness.

Rider Criteria: Guests must be seated in the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Jumpin' Jack Splash 2

Guests must be 40" tall in bare feet to participate.

Maximum Weight – 300 lbs. per rider.

Maximum one Rider per slide.

Three single Rider body slides, one is fully enclosed, ending in a 6" runout.

Rider Criteria: Riders are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests must have a minimum of two functioning extremities; sufficient upper extremities to maintain the proper riding position and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Kids Cove – Play Area 1

*Guests must be less than 54" tall in bare feet to ride **or** be accompanied by a child. Guests over 54" tall are not permitted on the slides.*

An interactive pool for children which features slides, water cannons and other play elements. Maximum water depth is 12".

Rider Criteria: Guests who do not have seated postural control or appropriate observed behavior must be accompanied by a Supervising Companion. Hand-held Infants must be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero-depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for participants requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Kids Cove – Slides 1

Guests must be less than 54" tall in bare feet to participate.

Rider Criteria: Guests are required to slide upright or lying feet first. Guests must have a minimum of two functioning extremities. Guests unable to safely enter and exit the ride or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion to access the slide. Hand-held Infants must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several steps. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Lightning Falls 5

Guests must be 48" tall in bare feet to participate.

Maximum Weight – 300 lbs. per single rider; 400 lbs. per tube.

A complex of two separate slides with quick turns and sudden drops ending in a 48" deep catch pool.

Rider Criteria: Guests must remain seated in the tube facing forward and holding onto the handles. On a two person tube, the smaller guest sits in front in between the legs of the larger rider. Single riders on a two person tube must be seated in the front. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Lollipop Lagoon – Play Area 1

Guests must be less than 54" tall in bare feet to participate ***or*** *be accompanied by a child. Guests over 54" tall are not permitted on the slides.*

An interactive pool for children which features slides, water cannons and other play elements.

Rider Criteria: Guests who do not have seated postural control or appropriate observed behavior must be accompanied by a Supervising Companion. Hand-held Infants must be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero-depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for participants requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Lollipop Lagoon – Slides 1

Guests must be less than 54" tall in bare feet to participate.

Rider Criteria: Guests are required to slide upright or lying feet first. Guests must have a minimum of two functioning extremities. Guests unable to safely enter and exit the ride or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion to access the slide. Hand-held Infants must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several steps. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Patriot's Plunge 5

Guests must be 48" tall in bare feet to ride.

Maximum Weight – 300 lb. per rider.

A three slide complex, with one slide being enclosed, which twist and turn and drop the rider into a 42" deep splash pool.

Rider Criteria: Guests are required to remain seated in the middle of the tube, facing forward, and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube to reach the loading platform. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Python Plummet 5

Guests must be 48" tall in bare feet to rider.

Maximum Weight – 300 lb. per rider.

Maximum one rider per slide.

Riders stand in an enclosed capsule where the floor drops launching them down high speed drops and banked turns before ending in a water-filled runout. Rider will experience high speeds, weightlessness, and rapid movements from side to side. Maximum water depth is 6".

Rider Criteria: Guests must stand with their head and back against the slide, legs firmly crossed at the ankles, with arms folded across the chest, and maintain position throughout ride. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, forearm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery. Loose articles are not permitted, including jewelry and T-shirts.

Note: Loose articles are not permitted, including, but not limited to, piercings, necklaces, rings and t-shirts.

Guests must be 40" tall to participate in the large slides. Guests must be 36" tall to participate in the small slides.

Maximum Weight – 200 lb. per person on small slides; 300 lb. per person on large slides

Interactive play structure with various play elements including a giant tipping bucket, water cannons, net bridge, and six body slides.

Rider Criteria: Guests are required to remain lying flat on back, legs firmly crossed at the ankles, with arms folded across chest and maintain position throughout the ride on the large slides. On the smaller slides, Guests may ride sitting up feet first. Riders must have a minimum of two functioning extremities or sufficient upper extremities to maintain the proper riding position and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted to participate.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Seaside Splashworks – Structure 1

Guests under 40" must be accompanied by a Supervising Companion.

A wet and wild zero depth children's play structure with interactive water features and a large tipping bucket.

Rider Criteria: Guest must have the ability to enter/exit the attraction without endangering self or others and must have appropriate observed behavior. Hand-held Infants must be accompanied by a Supervising Companion..

Rider Access: : This attraction is wheelchair accessible on the ground level. Access to the elevated levels requires Guests to climb several flights of stairs. A water wheelchair is available for Guests requiring additional assistance. Please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair.

Wave Pool & Wildwater Cove 4

Guests must be 42" tall in bare feet to participate alone ***or*** *be accompanied by a Supervising Companion. Life jackets are required for Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers. A Supervising Companion may accompany up to two Guests.*

A large wave pool with depths ranging from 0' – 6'. Waves are generated for 5 minutes on, and then 5 minutes off. Strenuous activity is required during wave action cycles which may require the ability to swim and which may result in fatigue. Exercise Caution. Participants with a history of seizures or heart or other serious medical conditions should be supervised by someone who knows how to swim and how to provide emergency assistance.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held Infants participation or water depth may be restricted if necessary and must be accompanied by a Supervising Companion. Guests with a full arm cast or full leg cast are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collarbone or braced arm cast cannot participate.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for participants requiring additional assistance. Please speak to a member of our Aquatics Supervisory team to obtain access to the water wheelchair.

Wildwater Rapids 4

Guests must be 46" tall in bare feet to ride.

Maximum Weight – 300 lb. per rider.

Maximum one rider per slide.

A 40 foot tall complex of four separate slides, two slides being enclosed, that twist and turn and drop the rider into a 36" deep splash pool.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests may not sit up in enclosed slides while riding. Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

Wildwater River 2

*Guests must be 42" tall in bare feet to participate alone **or** be accompanied by a Supervising Companion. Guests under 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. A Supervising Companion may accompany up to two Guests.*

A slow moving river tube attraction.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of one functioning arm and one functioning leg or be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: : Access is available via the stairs or pool lift. Riders will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics Supervisory Team to obtain access to the pool lift.

ENTERTAINMENT

Due to the popularity of our shows, we suggest you arrive early as seating may be limited. Show schedules are available at Guest Services, on the (insert park name) mobile app and at any theatre entrance. All Entertainment venues are accessible to Guests who may have a mobility impairment. Assisted listening devices are available for Guests at each theater, who are hearing impaired. Large print scripts may also be available. Ask any Associate at the venue for assistance (Carousel Main Stage, PEANUTS™ Showplace, Surfside Stage).

PLANET SNOOPY™ Showplace
The PEANUTS™ Showplace, located in the heart of PLANET SNOOPY™, is a small outdoor venue with stadium seating featuring shows for kids. Access to the seating area can be found on either side of the stage. There are viewing areas that accommodate wheelchairs and companions. Please ask an Usher for assistance

TRICKS AND TREATS FALL FEST

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions or services offered visit Guest Services.

HALLOWEEN HAUNT®

Halloween Haunt at Dorney Park has extreme attractions that are designed to scare and startle. During this event, the park and certain attractions will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, a history of seizures or epilepsy, sensitivities to latex, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Characters in our Halloween Haunt attractions will not touch you; please do not touch them in any manner. Guests who do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access may be available. Please visit Ride Services for more information. Service animals are welcome to attend Halloween Haunt and are permitted to walk through the park and enter haunted attractions. Please adhere to all posted and verbal warnings and directions.

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept these risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations; Dorney Park & Wildwater Kingdom does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, **do not ride**.

All restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened, and tightened properly to allow Guests to ride.

Information in this guide is subject to change.
