

GUEST ACCESSIBILITY GUIDE

WELCOME TO SIX FLAGS OVER TEXAS

We are glad you are here! At Six Flags Over Texas, we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment. We want our Guests to have a safe and enjoyable day. We continuously strive to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back, or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices, or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other Riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Relations. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Relations to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our team member to help accommodate you.

RIDE SAFELY

Texas Rider Responsibility Requirements (Occupations Code §2151.102) Riders must:

- **Obey Posted Rules:** Riders must comply with all posted rules and warnings, and follow instructions provided by ride operators.
- **Avoid Reckless Behavior:** Riders must not behave in a manner that may cause injury to themselves or others, including horseplay, standing up improperly, or intentionally rocking cars on seats.
- **Be Honest About Health Conditions:** Riders must not ride if they know of a health condition or are under the influence of drugs or alcohol that could affect their ability to safely participate.
- **Use Provided Safety Equipment:** Riders must use safety restraints and devices properly as instructed.
- **Report Injuries:** If injured on a ride, the Rider must report the injury to the operator before leaving the premises, if possible.

Texas Occupations Code §2151.103 - Rider Responsibility: This section states a person may not:

1. Board or attempt to board an amusement ride when the person's behavior or physical condition would impair the person's ability to use the ride safely or obey instructions;
2. Board or attempt to board an amusement ride except at the designated time and area;
3. Board or dismount from an amusement ride except at the designated time and area; if any; or
4. Engage in any reckless act or activity that may injure the person or others.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Six Flags Over Texas. Remember, if you

suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE.**

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper Rider positioning until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Six Flags Over Texas is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone or electronic usage while riding is prohibited.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Six Flags Over Texas.

RIDE RATING SYSTEM

A Ride Rating Program has been designed to provide a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY	DESCRIPTION
Low Thrill Rides	 Rides that are generally calm and gentle in nature.
Mild Thrill Rides	 Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	 Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	 Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction, and/or elevation.
Aggressive Thrill Rides	 Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction, and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates Wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum Speed of Ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum Height of Ride
	Maximum Water Depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where Riders may remain in their wheelchair.

This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Six Flags Over Texas uses the following terms:

Ability to Hold On or Brace: Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Hand-Held Infant: Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Silver Star Carousel; Dino Off Road Adventure; Oil Derrick, and Pirates of Speelunkers Cave. Hand-held infants and their Supervising Companion may also enjoy, but may not participate on, the elevated sections of the attractions.

Supervising Companion: A Supervising Companion is someone who meets all the requirements to ride the ride themselves, who is at least 54" in height, and demonstrates appropriate observed behavior. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines, and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a Rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride the Six Flags Railroad and Oil Derrick.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be “officially” measured at each ride location.

To accurately measure Guests, a height measuring device may be used during the height measuring process. This device may come into contact with the Guest’s head for a brief period.

For the safety of Guests, a shoe which does not contribute excessively to the Guest’s height is required. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Six Flags Over Texas reserves the right to ask that shoes be removed to ensure that a Guest’s height is not being artificially enhanced or manipulated.

ATTRACTION ACCESSIBILITY PROGRAM

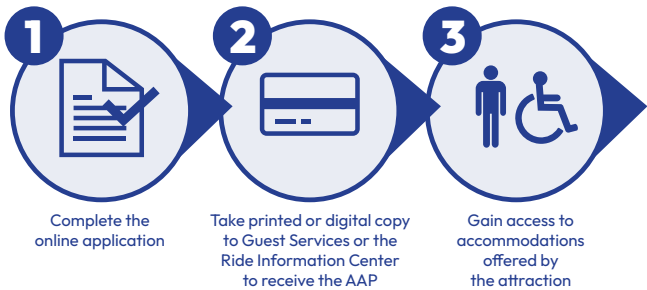

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is

posted on each attraction’s Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Guest Relations upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services team member will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request helpful accommodations are encouraged to obtain the IBCCES Individual Accessibility Card (IAC) by registering at **accessibilitycard.org**. The registration process requires the information listed below be uploaded into a secure online portal. Once a Guest has filled out the online application and uploaded necessary documentation, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to the Guest Relations inside each park to receive any necessary accommodations.

Note: Only IBCCES can issue the IBCCES Accessibility Card, and not Six Flags Over Texas.

CASTS & BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides. We suggest you delay your visit until the cast is removed.

The following chart displays the cast and brace rules for all rides and attractions.

C Must ride in a chariot

F Cast/Brace must fit safely in the ride unit

Y May ride with the condition

SIX FLAGS OVER TEXAS

PROSTHESIS

Guests with any type of prosthesis should not ride: AQUAMAN™: Power Wave; CATWOMAN™ Whip; Dino Off Road Adventure; THE JOKER™; MR. FREEZE™; New Texas Giant; THE RIDDLER™'s Revenge; Roaring Rapids; Runaway Mountain; and Texas Skyscreamer unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit designated park locations for assistance before riding to ensure a safe experience.

Guests with prosthetics are advised to consult with the Six Flags Over Texas Supervisory Team for guidance during their visit.

For certain rides, manufacturers may require documentation from the prosthetic device's manufacturer confirming it is designed to withstand high-speed roller coaster forces of up to 68 mph and G-forces between 1 to 5 Gs, with sufficient safety measures in place.

Rides where prosthetics are not permitted or have specific limitations: AQUAMAN™: Power Wave; BATMAN™: The Ride; CATWOMAN™: Whip; Dino Off Road Adventure; MR. FREEZE™; New Texas Giant; Roaring Rapids; Runaway Mountain; Six Flags Speedway; Texas Skyscreamer; THE JOKER™; THE RIDDLER™'s Revenge; and Titan.

RIDE DEVICES

Guests with disabilities may be eligible to ride select attractions using a body harness provided by the park. Guests should visit designated park locations for assistance and to determine eligibility.

For safety reasons, certain attractions may require the removal of medical devices or prosthetics that are not securely fastened to the Rider's body. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

On rides equipped with removable seats, Guests using wheelchairs may transfer directly to the ride vehicle. Ride attendants and Guest service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific Rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Transfer devices, when requested, can be used to assist a Guest out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: THE RIDDLER™'s Revenge (only a ramp, not a transfer device).

Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. Every single ride is equipped with a body harness with the exception of water rides: AQUAMAN™: Power Wave; *Daffy Duck* Bucket Blasters; El Aserradero; Pirates of Speelunkers Cave; and Roaring Rapids.

In addition, specific ride vehicles are equipped with removable sides at *Daffy Duck* Bucket Blasters, and JUSTICE LEAGUE™: Battle for METROPOLIS™. These vehicles may further assist Riders in transferring from their wheelchair to the ride unit.

Please inform an team member at the ride if you wish to use that vehicle.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride Attendant or Guest Relations team member.

ADDITIONAL INFORMATION

Our goal is to make Six Flags Over Texas as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Family Services

A space for nursing mothers is available at Six Flags Over Texas. Baby changing areas and a companion restroom can be found in most restrooms. Please feel free to ask a team member for directions to these locations or review a park map.

First Aid

Our First Aid Station located in the Spain Section next to La Fiesta de las Tazas is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. Emergency medical care is available for overnight Guests.

Hearing Needs

Assistive listening devices are available upon request. These lightweight, wireless devices amplify sounds using signals from transmitters located throughout the park and are recommended for Guests with mild to moderate hearing loss. For more details or to obtain a device, please visit Guest Relations.

Interpretive Services

If you require American Sign Language (ASL) interpreting services, we can provide them with at least two days advance notice for live show venues, and/or to accompany you for the day. Additionally, show scripts or score sheets can also be requested at each venue. To arrange ASL services, please email guestrelations@sixflags.com at least 48 hours prior to visit. Alternatively, you can submit your request online through [sixflags.com/contact-us](https://www.sixflags.com/contact-us).

Parking

Accessible parking is available on a first-come, first-serve basis within the main parking lots of the park. When you arrive at the parking toll booths, ask a team member for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival,

members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask a Team Member.

Printed Guides

Print versions of the Park Guide and Guest Accessibility Guide are available at Guest Relations. Large print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Quiet Room

Six Flags Over Texas offers a Quiet Room located in our First Aid Location near the Fiesta de las Tazas for family members or caregivers to take a break and reduce sensory stimulation. Additionally, there are sensory features provided for Guest use.

Restrooms

Private restroom facilities for Guests needing the assistance of a Companion are available at First Aid. Wheelchair accessible stalls are located at all restrooms. For your convenience, we also have a family restroom available at First aid.

Rider Swap Program

The Rider Swap program allows one adult to stay with non-riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services.

Service Animals

Service animals are welcome at Six Flags Over Texas. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be housebroken, controlled with a restraining device, display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions

toward a Guest or team member will be directed to remove the animal from the park. There is a limit of one service animal per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on Oil Derrick and Silver Star Carousel. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. They may also attend the performances at Majestic Theater and Southern Palace. Service animals are permitted to walk through the park areas, including Scare Zones. Visit Guest Relations for more information. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information

A Service Animal "Relief Area" is located in the grassy area next to Pirates of Speelunkers Cave. Owners are responsible for disposing of their animal's waste. Please look for this designated sign: Pet Relief Area

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at the Service Center. However, since wheelchairs, ECVs, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own. Rentals are also available at the park while supplies last

Wheelchairs, ECVs, and strollers may not be taken out of the park gates or to the parking lot. However, a park team member will be happy to provide any assistance you may need at that time. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park.

Guests Using Wheelchairs or ECVs

Guests who choose to use a wheelchair or ECV, we require a safe speed be maintained while traveling in the park. Wheelchairs and ECVs cannot be accommodated on most rides and attractions, with the exception of Oil Derrick. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. A wheelchair lift is available at: BATMAN™: The Ride, MR. FREEZE™; Pandemonium; Silver Star Carousel; and Titan to transport a Guest in a wheelchair to our second-story ride platform. Please use the call button at base of lift to request service. Manual wheelchair available at all locations with a wheelchair lift if weight exceeds the max posted capacity. If an ECV has attachments to the vehicle which could impede the operation of a lift or with safe lift ingress and egress, please transfer to manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask an team member at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Relations. Six Flags Over Texas personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may recharge their wheelchair battery at the Service Center.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on:
AQUAMAN™: Power Wave; Batman: The Ride;
CATWOMAN™: Whip; MR. FREEZE™; New Texas Giant;
Pandemonium; Rodeo; SUPERMAN™: Tower of Power;
THE JOKER™; Titan; and Tormenta Rampaging Run.

Maximum weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrances of:
AQUAMAN™: Power Wave; New Texas Giant; THE JOKER™;
and Tormenta Rampaging Run.

The manufacturer requires a maximum Guest height on the following rides: *Marvin the Martian Space Rockets* – 54"; New Texas Giant – 77"; THE JOKER™ – 77"; and Tormenta Rampaging Run – 78".

LOOSE ARTICLES

Most rides cannot accommodate loose articles including jewelry, cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Six Flags Over Texas is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body. On AQUAMAN™: Power Wave and Titan, loose items that are not able to be stored in waist packs or cargo pockets are not permitted to be brought up to the station and must be stored in a free locker located in the queue or with a non-Rider.

For safety reasons, cell phone usage, taking pictures and filming on rides are prohibited.

Glasses must be secured on all rides. On New Texas Giant, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see an team member for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Six Flags Over Texas are turned in to Lost & Found in the Spain Section. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported via the internet at sixflags.com/overtexas/help/lost-found-services.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnetics are used at the following attractions: THE JOKER™; MR. FREEZE™; New Texas Giant; Pandemonium; and Tormenta Rampaging Run.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: Oil Derrick; Silver Star Carousel; and the Six Flags Rail Road. The tank must fit safely in the ride unit and not interfere with the ride restraint system. For your convenience, the park's First Aid station will be able to appropriately store your additional oxygen tanks during your visit.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the restraint mechanism to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects, including but not limited to: haze and other atmospheric effects; scents; areas of low lighting; loud music; sound effects; strobe lighting and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions. Attractions utilizing these effects include: CATWOMAN™: Whip; JUSTICE LEAGUE™:

Battle for METROPOLIS™; MR. FREEZE™; Pirates of Speelunkers Cave; Rodeo; Texas Skyscreamer; and THE RIDDLER™'s Revenge.

PROPER ATTIRE

For the safety and enjoyment of our Guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride with shirts, shorts, and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. On New Texas Giant and Six Flags Speedway, scarves will be required to be removed in their entirety. Loose-fitting shoes may only be removed before riding CATWOMAN™: Whip and Gunslinger.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Independent seated postural.

The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck, and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.

The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.

Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to hold on with two functioning arms.

Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position

throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with one functioning leg.

Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with two functioning legs.

Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Minimum of two functioning extremities.

Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.

Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.

Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our team members and Guests, team members are instructed not to perform any lifting of Guests.

Appropriate observed behavior:

Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or

follow Guest requirements. Appropriate observed behavior may include, but not be limited to, maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment, and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

SIX FLAGS OVER TEXAS RIDE DESCRIPTIONS

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

AQUAMAN™: Power Wave

Guests must be 48" tall to ride.

Twin 150-foot-tall towers rock this coaster back and forth with multiple 90-degree drops that plunge passengers through the water at 60mph.

Restraint System: A lap bar that secures Riders pelvis and thighs. Due to the nature of the restraint, this ride may not accommodate Guest of larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: Riders with any missing arms or hands may ride, provided such Rider has two natural functioning legs to the ankle. Riders that possess two natural minimum paralyzed legs to the ankle may ride, provided such Rider has two natural arms until a grip. No prosthetic devices. Lower leg cast (full, foot, and lower) are not permitted to ride. Guests with any extremity prosthesis must ensure the device is removed prior to riding.

Rider Access: Alternate Access is available at the Fast Lane entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

BATMAN™: The Ride 5

Guests Must be 54" tall to ride.

A high-speed, inverted looping roller coaster which turns Riders upside down five times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of larger size. Additionally, each unit has one accommodating restraint. These seats are located on row 5, seat 2 on each train.

Rider Criteria: Guest must have a minimum of one functioning arm including a hand and two legs with feet. Legs may be paralyzed. Two functioning arms including hands are sufficient. If the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. No casts are permitted on this ride. Guest with cervical collar, neck brace, broken collarbone are not permitted to ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

BATWING™ 2

*Guests must be 48" tall to ride alone **OR** be accompanied by a Supervising Companion.*

Maximum Weight – 330 lbs. per plane.

A gentle ride with a circulating, up-and-down motion.

Restraint System: A seat belt that secures each Rider across the pelvis.

Rider Criteria: Guest must have minimum of two functioning extremities: one functioning arm (excluding prosthesis) and least one sufficient lower extremity to ensure the ride's restraint system adequately restrains them. Guest with cervical collar, neck brace, broken

collarbone are not permitted to ride. Guests with any extremity prosthesis must ensure the device is properly secured prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Boot Scootin 2

Guests must be 36" tall to ride alone **OR** be accompanied by a Supervising Companion.

Maximum Weight – 382 lbs. per boot.

A gentle ride with a circulating, up-and-down motion.

Restraint System: A seat belt that secures each Rider across the pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis). And one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, broken collarbone, full or braced arm cast are not permitted to ride. Guests with any extremity prosthesis must ensure the device is properly secured or removed prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Bugs Bunny Cloud Bouncer 2

Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion.

A children's ride with elevation and short drops.

Restraint System: An individual seat belt that secures each Rider across the pelvis. With a shared over-the-shoulder restraint that secures Riders at the pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Guests with any extremity prosthesis must ensure the device is properly secured or removed prior to riding. Riders with arm cast must be seated towards outside of ride. Any leg casts are not permitted. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion

Caddo Lake Barge 2

*Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion.*

A mild family ride with circulating and spinning motions.

Restraint System: A safety bar restraint that secures each Rider across the front of their chest and gate that secures Riders in each row.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Guests with a cervical collar, neck brace, broken collarbone are not permitted to ride. Guests with an extremity prosthesis must ensure the device is properly secured prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

CATWOMAN™: Whip 4

Guests must be 48" tall to ride.

Maximum Weight – 794 lbs. per vehicle.

An exciting circular ride that elevates and tilts.

Restraint System: A individual over-the-shoulder restraint that secures each Rider across the chest with a safety belt between-the- legs. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guest must be able to hold on with one functioning arm. Guest may have two leg amputations. One leg amputation must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast are not permitted to ride. Lower leg cast (full) are not permitted to ride. Alternatively, Guests with certain amputations may be able to ride with the use of a sperate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper or lower extremity prosthesis must ensure the device is removed prior to riding, and must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

WARNING: Please use caution when entering and exiting as the ride unit may shift.

WARNING: This ride contains strobe lighting.

Cloud Bouncer **2**

Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion.

Maximum Weight – 550 lbs. per unit.

A gentle ride with circulating up-and-down movement.

Restraint System: A seat belt that secures each Rider across the pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Guests with a cervical collar, neck brace, broken collarbone are not permitted to ride. Full arm/leg cast are not permitted. Guests with any extremity prosthesis must ensure the device is properly secured or removed prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a sperate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Daffy Duck Bucket Blasters 1

Guests must be 48" tall to ride alone **OR** 36" tall **AND** be accompanied by a Supervising Companion.

Brisk circular motion of both the buckets and the ride unit. Riders will most likely get wet from the spray off of the center bucket and Guests using spray guns.

Restraint System: A safety gate that secures each Rider in their bucket.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Guests with a cervical collar, neck brace, broken collarbone are not permitted to ride. Guests with any extremity prosthesis must ensure the device is properly secured or removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Dino Off Road Adventure 1

Guest must be 48" tall to drive. Guest under 48" tall must be a passenger and accompanied by a Supervising Companion.

A safari car drive with 15 life-size dinosaurs along a quarter mile track.

Restraint System: A shared seat belt that secures each Rider across the pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Guests with a cervical collar, neck brace, and broken collarbone. Riders with arm cast must be seated towards the outside of the ride. Full leg cast are not permitted for drivers and passengers. Guests with any extremity prosthesis must ensure the device is properly secured or removed prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a sperate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Dive Bomber Alley 5

Guests must be at least 48" tall to ride alone **OR** 42" tall **AND** be accompanied by a Supervising Companion.

Maximum Weight – 850 lbs. per flight.

A thrilling freefall attraction with exciting swinging action. This attraction requires an additional charge.

Restraint System: Riders wear a full body harness that supports the Rider in a prone position. The harness is connected to the flight support cables.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms with hands and proper functioning of the flight suit must be maintained. and one functioning leg with a foot. Guests with a cervical collar, neck brace, broken collarbone, braced/full arm, and full leg casts are not permitted to ride. Guests with any extremity prosthesis must ensure the device is properly secured and removed prior to riding.

Rider Access: Alternate Access is available at the ride store. Riders will have to transfer into the suit, on their own or with the assistance of a companion.

El Aserradero 3

Guests must be 46" tall to ride alone **OR** be accompanied by a Supervising Companion.

Float through water at mild speeds over medium hills and plunge down a chute for a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Guests with a cervical collar, neck brace, and broken collarbone. Guests with any extremity prosthesis must ensure the device is properly secured or removed prior to riding.

Rider Access: Alternate Access is available at the Fast Lane entrance or the ride exit (El Aserradero I exit, or bridge pathway at El Aserradero II). Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

El Sombero 3

Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion.

Maximum Weight – 340 lbs. per seat

A family ride with spinning up and down motions.

Restraint System: A lap bar restraint that secures Riders across the chest.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, and braced arm cast are not permitted to ride. Guests with any extremity prosthesis must ensure the device is properly secured prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Gunslinger 2

Guests must be 42" tall to ride.

Circular swinging motion while elevated above the ground.

Restraint System: A seat belt strap that secures each Rider across the legs and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and a hand and one functioning leg with a foot. Guests with a cervical collar, neck brace, broken collarbone, are not permitted to ride. Guests with any extremity prosthesis must ensure the device is properly secured or removed prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride entrance and exit. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Judge Roy Scream 4

Guests must be 48" tall to ride.

Mild coaster with medium drops.

Restraint System: A individual lap bar that secures Riders across the thighs and pelvis with a shared seat belt that secures both Riders next to each other.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, full/braced arm cast, full leg cast, are not permitted to ride. Guests with any extremity prosthesis must ensure the device secured or removed prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

JUSTICE LEAGUE™: Battle For METROPOLIS™ 2

*Guests must be at least 48" tall to ride alone **OR** 42" tall **AND** be accompanied by a Supervising Companion.*

An interactive dark ride with turns and spins.

Restraint System: A shared lap bar that secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; two natural functioning arms with a hand and one functioning leg with foot in order to ride. Guests with a cervical collar, neck brace, broken collarbone, are not permitted to ride. Guests with any extremity prosthesis must ensure the device removed prior to riding. Arm casts must be seated towards outside of ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness.

Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the Fast Lane entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

WARNING: This ride contains strobe lighting.

La Fiesta de las Tazas 3

*Guest must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion and must sit toward the inside of the cup.*

A circular ride with spinning motion, fast turns, and side-to-side forces.

Restraint System: A gate that secures Riders in each cup.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis) in order to ride. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast are not permitted to ride. Guests with any upper and lower extremity prosthesis must ensure the device secured prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the exit. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Looney Tunes Adventure Camp 2

*Guest must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion. Supervising Companions over 54" tall may ride when accompanying a Guest under 54" tall.*

A children's play area with climbing and slides.

Rider Criteria: Guests with a cervical collar, neck brace, broken collarbone, are not permitted to ride.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Rider Access: Alternate Access is available at the exit. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

MR. FREEZE™ 4

Guests must be 54" tall to ride.

Riders are launched through a tunnel, traveling from 0 to 70mph in 3.8 seconds. Rocketing up the 236-foot-tall spike, Riders are then launched toward the ground.

Restraint System: An individual lap bar and seat belt secures each Rider across the thighs and pelvis; additional padding constrains both legs across the ankle. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of four functioning extremities; two functioning arms with hands and two functioning legs with feet in order to ride. Guests with a cervical collar, neck brace, broken collarbone, full/braced arm cast, or full/lower leg casts are not permitted to ride. Guests with any extremity prosthesis are not permitted to ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at entrance in the ride elevator. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

WARNING: This ride contains strobe lighting.

New Texas Giant 5

Guests must be 48" tall to ride.

On this hybrid wooden roller coaster, Riders will climb 147 feet in the air, experiencing a 79-degree drop, multiple 115-degree overbank turns, and speeds up to 65mph.

Restraint System: An individual lap bar and seat belt secures each Rider across the thighs and pelvis; additional padding constrains one individual leg (shin). Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand and two functioning legs with feet in order to ride. Guests with a cervical collar, neck brace, broken collarbone, full/braced arm cast, or full/lower leg casts are not

permitted to ride. Guests with any extremity prosthesis are not permitted to ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at exit or Fast Lane entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

WARNING: Magnetic systems are used during this ride.

Oil Derrick 2

Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion.

Riders will experience a 300-foot ascent in an observation tower and enjoy stunning views of the Dallas/Fort Worth area.

Rider Criteria: Guests who are unable to enter and exit safely or demonstrate appropriate behavior, must be accompanied by a supervising companion.

Rider Access: Alternate Access is available at exit. This attraction is wheel chair accessible. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle and seated on the floor not the ride seat.

Pandemonium 4

Guests must be 47" tall to ride alone **OR** 42" tall **AND** be accompanied by a Supervising Companion.

Maximum Weight – 660 lbs. per car.

Skateboarding simulation with moderate to heavy side-to-side motion, moderate-to-heavy spinning and mild up-and-down hills.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis; additional padding constrains one individual leg (shin). Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand and two functioning legs with feet in order to ride. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride. Arm cast must be seated towards the outside of the ride. Guests with any extremity prosthesis must ensure the device secured or removed prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate

full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the elevator next to the staircase or Fast Lane entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

WARNING: Magnetic systems are used during this ride.

Pirates of Speelunkers Cave **2**

*Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion.*

A Dark Ride family attraction which features the Speelunkers battling Pirates that have invaded a cave.

Rider Criteria: Guests must have a one functioning arm with a hand and two legs to the mid-thigh. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Guests with any extremity prosthesis must ensure the device secured or removed prior to riding.

Rider Access: Alternate Access is available at the exit or Fast Lane entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

WARNING: This ride contains strobe lighting.

Roaring Rapids **2**

*Guests must be 42" tall to ride alone **OR** 36" tall **AND** be accompanied by a Supervising Companion.*

Slight side-to-side motion, occasional side jolts and dipping throughout this rafting simulation.

Restraint System: A seat belt that secures each Rider across the pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Guests with any extremity prosthesis must ensure the device secured or removed prior to riding. Guest with arm cast must be seated towards outside of ride.

Rider Access: Alternate Access is available at the exit or Fast Lane entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Rodeo 2

Guests must be 54" tall to ride alone **OR** 48" tall **AND** be accompanied by a Supervising Companion.

A moderate ride with heavy side-to-side and front-to-back motion.

Restraint System: An over-the-shoulder restraint that secures both Riders across the lower chest. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand and two functioning legs with feet. Guests with a cervical collar, neck brace, broken collarbone, or full leg cast are not permitted to ride. Guests with any extremity prosthesis must ensure the device secured or removed prior to riding. Guest with arm casts must be seated towards outside of ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the exit. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

WARNING: This ride contains strobe lighting.

Runaway Mine Train

Guests must be 48" tall to ride.

An exciting roller coaster with high speeds, steep drops, and fast turns.

Restraint System: A lap bar restraint that secures both Riders across the lower chest. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand and two functioning legs with feet OR two functioning arms with hands and one functioning leg and a foot. Arm cast must be seated towards outside of ride. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Guests with any extremity prosthesis must ensure the device secured or removed prior to riding. Guest with arm casts must be seated towards outside of ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness.

Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the exit or Fast Lane entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Runaway Mountain 4

Guests must be 48" tall to ride.

An exciting roller coaster with high speeds, steep drops, and fast turns.

Restraint System: A lap bar restraint that secures both Riders across the lower chest.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand and two functioning legs with feet or two functioning arms with hands and one functioning leg and a foot. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Guests with any extremity prosthesis must ensure the device removed prior to riding. Guest with arm casts must be seated towards outside of ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the side entrance by the exit or Fast Lane entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Shockwave 5

Guests must be 42" tall to ride.

An exciting roller coaster with high speeds, steep drops, fast turns, and loops.

Restraint System: An individual lap bar that secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand and two functioning legs with feet. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Guests with any extremity prosthesis must ensure the device secured or removed prior to riding. Guest must be seated towards outside of ride. Alternatively, Guests

with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the Fast Lane entrance. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Sidewinder 3

Guests must be 48" tall to ride alone **OR** 36" tall **AND** be accompanied by a Supervising Companion.

Maximum Weight – 510 lbs. per car.

A circular ride with spinning motion, fast turns, and side-to-side forces.

Restraint System: A lap bar and seat belt that secures each individual Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand and one functioning leg with a foot. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, broken collarbone, or braced arm casts are not permitted to ride. Guests with any extremity prosthesis must ensure the device secured or removed prior to riding. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness. Provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the exit. Riders will have to transfer into the ride unit, on their own or with the assistance of a companion.

Silver Star Carousel 1

Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion.

Low-speed antique carousel.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit or do not have the ability to hold on with one functioning arm

must be seated in a chariot unit. Texas Courthouse Stage

Texas Courthouse Stage, located in the Texas section, is an outdoor main stage show productions. There are viewing areas that accommodate wheelchairs and companions at this location.

FRIGHT FEST

Fright Fest at Six Flags Over Texas has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, sensitivities to latex, or sensitivities to loud music and sound effects are advised not to participate in these attractions. Characters in our Fright Fest attractions will not touch you; please do not touch them in any manner. Guests that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access may be available. Please visit Guest Services for more information. Service animals are welcome to attend Six Flags Over Texas events. They are permitted to walk through the park areas, including Scare Zones. Please adhere to all posted and verbal warnings and directions.

TRICKS AND TREATS

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions, or services offered, visit Guest Services.

HOLIDAY IN THE PARK

Holiday in the Park is an event filled with delightful holiday cheer for Guests of all ages. Many areas of the park will have low lighting, fog, snow machines, and strobe-styled lighting. Guests with a history of seizures or epilepsy should be aware of flashing and strobe lighting that will be present throughout the park. Please see a Guest Services representative for any additional questions.

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept the risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations, Six Flags Over Texas does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, **do not ride!**

All restraint systems including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened properly to allow Guests to ride.
