

GUEST ACCESSIBILITY GUIDE

WELCOME TO CAROWINDS!

We are glad you are here! At Carowinds we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment and we want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit North Gate Guest Services to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Operations Supervisory Team to help accommodate you.

PLEASE RIDE SAFELY

Under SC State law Section 41-18-35: "State law requires riders to obey all posted signs and warnings and instructions and to behave in a manner that will not cause or contribute to injuring themselves or others. Riders must report all injuries before leaving." If you have any questions please see attendant before exiting attraction — this includes people who are behaving in an unruly fashion or giving the indication of being under the influence of alcohol or chemical intoxicants.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Carowinds. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **do not ride.**

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper rider positioning and hold on until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Carowinds is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone or electronic usage while riding is prohibited on most rides.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Carowinds.

RIDE RATING SYSTEM

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	Rides that are generally calm and gentle in nature.
Mild Thrill Rides	2	Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	3	Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	4	Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction, and/or elevation.
Aggressive Thrill Rides	5	Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction, and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

-  This symbol is used to identify rides where riders may remain in their wheelchair. Riders may remain in their wheelchair to ride Carolina Skytower.
-  This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.
-  This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Carowinds uses the following terms:

-  **Ability to hold on or brace:** Ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride and to use one’s legs to brace to maintain a seated position during the forces of the ride.
-  **Hand-held Infant:** Hand-held infants are children who are unable to independently walk or maintain independent seated postural control and will only be able to ride the following rides with a Supervising Companion: Carolina Skytower, Coastal Currents, Grand Carousel (in a chariot), Myrtle Turtle Beach, Surf Club Harbor (water depth may be restricted), and Tidal Wave Bay (water depth may be restricted). Hand-held infants and their supervising companion may also enjoy Kiddy Hawk Cove, Pirate’s Landing, and Seaside Splashworks, but may not participate on elevated sections of the attractions.
-  **Supervising Companion:** Many of our rides have height requirements that allow a Guest under that requirement to ride with a Supervising Companion. A Supervising Companion is someone who meets all the requirements to ride the ride themselves, who is at least 54" in height, approximately 14 years of age, and demonstrates appropriate observed behavior. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide, or review the safety guides and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may only ride Carolina Skytower, The Grand Carousel, and Mountain Gliders, and may only participate in Surf Club Harbor and Tidal Wave Bay.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be “officially” measured at the Height Check Station near North Gate Guest Services. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height measuring device may be used during the height measuring process. This device may come into contact with the Guest’s head for a brief period.

For the safety of Guests, a shoe which does not contribute excessively to the Guest’s height is required. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Carowinds reserves the right to ask that shoes be removed to ensure that a Guest’s height is not being artificially enhanced or manipulated.

In Carolina Harbor, height measurements are taken in bare feet at the Waterpark entrance near Zephyr. There is a separate height wristband system for Carolina Harbor.

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction’s Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Guest Services upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services team member will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request reasonable accommodations are encouraged to obtain the IBCCES Accessibility Card (IAC) by registering at accessibilitycard.org or via the Accessibility Card mobile App. Once a Guest has filled out the online application and uploaded necessary documentation into a secure online portal, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to Guest Services upon their arrival at the park to express their accommodation needs. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the team member will provide the details needed to participate in the program.

Note: Only IBCCES can issue the IBCCES Accessibility Card, and not Carowinds.

CASTS & BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on most slides in Carolina Harbor.

The following chart displays the cast and brace rules for all rides and attractions.

- C** Must ride in a chariot
- F** Cast/brace must fit safely in the ride unit
- O** Not permitted to participate on elevated activity area
- Y** May ride with the condition
- Z** Participation or water depth may be restricted if necessary

PROSTHESIS

Guests with any type of prosthesis should not ride Charlie Brown's Wind Up, Electro Spin, Kite Eating Tree, Slingshot, Vortex or Zephyr unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit designated park locations for assistance before riding to ensure a safe experience.

Guests with prosthesis are advised to consult with the Carowinds Supervisory Team for guidance during their visit.

For certain rides, manufacturers may require documentation from the prosthetic device's manufacturer confirming it is designed to withstand high-speed roller coaster forces of up to 68 mph and G-forces between 1 to 5 Gs, with sufficient safety measures in place.

Rides where prosthesis are not permitted: The Airwalker, Copperhead Strike®, or WindSeeker.

Leg prosthetics are not permitted on Afterburn, Air Racers, Fury 325®, Gear Spin, Kiddy Hawk, Thunder Striker, or Windstar. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Guests should check with Guest Services or speak with a member of the ride supervisory team to see if they are eligible to ride without the prosthetic.

Guests with a single amputation above the knee may ride Afterburn, Air Racers, The Airwalker, Fury 325® and Thunder Striker with the use of a separate three-point harness, provided the Guest has remaining leg and arm residual limbs to be secured by the separate three-point harness. Guests should check with Guest Services to determine if they are eligible to use the three-point harness.

Guests with prosthesis enjoying their day at Carolina Harbor should consult with a member of our Aquatics supervisory team. Guests are encouraged to review all Carowinds ride descriptions in this guide for specific prosthesis requirements.

RIDE DEVICES

Guests with disabilities may be eligible to ride select attractions using a body harness provided by the park. Guests should visit designated park locations for assistance and to determine eligibility.

For safety reasons, certain attractions may require the removal of medical devices or prosthetics. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

On rides equipped with removable seats, Guests using wheelchairs may transfer directly to the ride vehicle. Ride attendants and Guest service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

- Transfer devices, when requested, can be used to assist a Guest out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Air Racers, The Airwalker, Carolina Cyclone, The Flying Cobras, Gear Spin, Hurler, Ricochet, Wilderness Run, Windstar, and Woodstock Express.
- Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Air Racers, Afterburn, The Airwalker, Copperhead Strike, Fury 325, and Thunder Striker.
- In addition, specific ride vehicles are equipped with removable sides at Air Racers, The Airwalker, Boo Blasters at Boo Hill, Gear Spin, and Windstar. These vehicles may further assist Riders in transferring from their wheelchair to the ride unit. Please inform a team member at the ride if you wish to use that vehicle.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride Attendant or Guest Relations team member.

ADDITIONAL INFORMATION

Our goal is to make Carowinds as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large Print Guest Accessibility Guides

Print versions of the Park Guide and Guest Accessibility Guide are available at Guest Services. Braille and large print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Campground Shuttle Buses

An ADA accessible bus is available for transportation from the campground to and from the park. Stop by the Campground Store for assistance.

Family Services

A space for nursing mothers is available in CAMP SNOOPY™ next to Woodstock Express. Baby changing areas and a companion restroom can be found in most restrooms. Please feel free to ask a team member for directions to these locations or review a park map.

First Aid

Our First Aid building is located in Carolina Boardwalk directly across from the Carolina Goldrusher is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. In addition, a First Aid Building/Station/Center is located in Carolina Harbor near Harbor House. This location is open during Carolina Harbor operating hours. Emergency medical care is available for overnight Guests.

Hearing Needs

Assistive listening devices are available upon request. These lightweight, wireless devices amplify sounds using signals from transmitters located throughout the park and are recommended for Guests with mild to moderate hearing loss. For more details or to obtain a device, please visit Guest Services.

If you require American Sign Language (ASL) interpreting services, we can provide them with at least 7 days advance notice for live show venues, and/or to accompany you for the day. Additionally, show scripts or score sheets can also be requested at each venue. To arrange ASL services, please submit a request at sixflags.com/carowinds/accessibility.

Parking

Accessible parking is available on a first-come, first-served basis within the main parking lots of the park. When you arrive at the parking toll booths, ask a team member for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask a team member for directions to additional parking areas.

Quiet Room

Carowinds offers a Quiet Room located at Guest Services for family members or caregivers who would like a break and reduce sensory stimulation.

Restrooms

Private restroom facilities for Guests needing the assistance of another Guest are available at all restrooms with the exception of the restrooms located inside our Palladium. Wheelchair accessible stalls are located in all restrooms.

Rider Swap

The Rider Swap program allows one adult to stay with non-riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services.

Service Animals

Service animals are welcome at Carowinds. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be house broken, controlled with a restraining device, display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or team member will be directed to remove the animal from the park. There is a limit of one service animal per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on the Camp Bus, Boo Blasters on Boo Hill, Carolina Skytower, and The Grand Carousel. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. They may also attend the performances at CAMP SNOOPY™ Theater, Carowinds Theater, and the Palladium Theater. Service animals are not permitted in water attractions, wet decks, wading pools, or lazy rivers. They are permitted to walk through the park areas, including scare zones. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information.

A Service Animal "Relief Area" is located in the grassy area next to Traditions at the North Gate. Owners are responsible for disposing of their animal's waste

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special need/diet items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at all park entrances. However, since wheelchairs, ECVs, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own. Quantities are limited. For those Guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs, ECVs, and strollers may not be taken out of the park gates or to the parking lot. However, a park team member will be happy to provide any assistance you may need at that time. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park. Manual Wheelchairs are available at ride locations with Wheelchair Lifts if weight exceeds the max capacity of 750 lbs.

GUESTS USING WHEELCHAIRS & ECVS

We require a safe speed be maintained while traveling in the park by Guests who choose to use a wheelchair or ECV. Wheelchairs and ECVs cannot be accommodated on most rides and attractions, with the exception of Skytower where one wheelchair can be accommodated. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information. For information on water wheelchairs in the waterpark, please see the Water Wheelchair and Pool Lifts section.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs behind. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride.

Almost every ride is wheelchair accessible. A standard elevator and/or wheelchair lift is available at Afterburn, Carolina Goldrusher, Copperhead Strike®, Fury 325®, Hurler, Thunder Striker, and Vortex to transport a Guest in a wheelchair to our second story ride platform. Please use the call button at base of lift to request service if posted. Manual wheelchairs are available at all locations with a wheelchair lift if weight exceeds the max posted capacity. If an ECV has attachments to the vehicle which could impede with the operation of a lift or with safe lift ingress and egress, please transfer to manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask a team member at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Carowinds personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary. Guests may recharge their wheelchair battery at Guest Services.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. In Carolina Harbor, Guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seat belts, must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of a larger size (in terms of height, weight, and/or body proportion) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on: Afterburn, Air Racers, The Airwalker, Carolina Cyclone, Carolina Goldrusher, Electro Spin, The Flying Cobras, Fury 325®, Hurler, Kiddy Hawk, Kite Eating Tree, Ricochet, Sling Shot, Thunder Striker, Vortex, WindSeeker, Woodstock Express, and Zephyr.

Maximum and minimum weight limits can be found under the individual rides in this guide and on the Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance of Copperhead Strike®, Fury 325®, and Thunder Striker.

The manufacturer requires a maximum rider height on the following rides: Copperhead Strike®, Kiddy Hawk, Rock N' Roller, and Sling Shot.

LOOSE ARTICLES

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-rider. Carowinds is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the rider and the restraint will not be allowed. The restraint mechanism must be secured snug against the rider's body.

On Copperhead Strike® and Fury 325®, loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line and must be stored in a locker or with a non-rider.

Using cell phones or other electronic device for any purpose, including picture taking, is prohibited on most rides. Failure to comply may result in ejection from the park.

Glasses must be secured on all rides. On Air Racers, Copperhead Strike®, Electro Spin, Gear Spin, Ripcord, and Sling Shot, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides.

Sensory headphones or helmets may be accommodated on select rides. Please see a rides team member for more details.

Any non-compliance which results in damage or injury to person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Carowinds are turned in to North Gate Guest Services. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported at [sixflags.com/lost-and-found](https://www.sixflags.com/lost-and-found). For your safety, do not enter unauthorized areas to retrieve lost articles. You may be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnets are used at the following attractions: Copperhead Strike®, Fury 325®, Hurler, SNOOPY'S™ Racing Railway, and Thunder Striker. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: Boo Blasters on Boo Hill, Carolina Skytower, and The Grand Carousel. The tank must fit safely in the ride unit and not interfere with the ride restraint system.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the ride restraint system to be secured snugly against the rider's body. The equipment must not prevent Guests from properly sitting in the ride unit with their back and shoulders against the seat back.

At no time may the equipment be between the Guest and the seat or the restraint. Guests may not carry anything in their hands during ride operation.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects, including but not limited to: haze and other atmospheric effects, scents, areas of low lighting, loud music, sound effects, strobe lighting and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions.

Attractions utilizing these effects include: Boo Blasters on Boo Hill, Carolina Goldrusher, Fury 325®, Hover and Dodge, SNOOPY'S™ Racing Railway, Thunder Striker, Ricochet, Wilderness Run, WindSeeker, and Woodstock Express.

PROPER ATTIRE

For the safety and enjoyment of our guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride with shirts, shorts and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. Loose clothing (including scarves, ponchos, and other free-flowing clothing), must be significantly secured or removed to prevent any interference with the ride restraint system. On all roller coasters, scarves will be required to be removed in their entirety. Loose fitting shoes may be removed before riding on Afterburn, Air Racers, The Airwalker, Charlie Brown's Wind Up, Electro Spin, Gear Spin, Kiddy Hawk, Kite Eating Tree, RipCord, Sling Shot, and Zephyr.

RIDER CRITERIA

Carowinds' Attraction Accessibility Program is designed to allow our Guests to participate in the enjoyment of our park as much as possible. The policy was developed by analyzing the physical and mental attributes required to safely ride each ride. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to himself or others. We continue to evaluate and update our Ride Admission Policy as necessary.

Ability to exhibit independent seated postural control under the dynamic conditions of the ride.

The rider must have the body and spinal control to sit upright without the aid of other people or devices. The rider must also have sufficient muscle control to support their head, neck, and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the rider's thighs.

Appropriate center of gravity.

The rider's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.

A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and strong enough to allow the rider to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to hold on with two functioning arms.

Ability to hold on with two functioning arms as defined above.

Ability to brace self with one functioning leg.

Riders must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis which can be used for bracing. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthesis.

Ability to brace self with two functioning legs.

Riders must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may be a normal leg or a prosthesis which can be used for bracing.

Minimum of two functioning extremities.

Riders must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Riders must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.

Riders must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.

Guests must be able to enter and exit the ride without jeopardizing themselves or others. They must also be able to assist with their own evacuation, if necessary.

This may include special arrangements such as entering through the Alternate Access Entrance (the exit or Fast Lane entrance) or having someone aid in boarding. For the safety of our team members and Guests, our team members are instructed not to perform any lifting of Guests.

Appropriate observed behavior.

Guests demonstrate appropriate observed behavior indicating a willingness and ability to participate and/or follow rider requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment, and willingness to participate.

Riders have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Obey all warnings prior and during participation
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Afterburn 

Guests must be 54" tall to ride.

This is an inverted steel coaster with floorless cars suspended below the track. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three extremities; One functioning arm that includes a hand and two legs. Two functioning arms including hands are sufficient if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Both legs must include the knee. Legs may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted on the ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

Rider Access: Alternate Access is available through the ride entrance where Guests using wheelchairs will encounter an elevator. Press the elevator intercom button for assistance from a ride operator. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

Air Racers 5

Guests must be 48" tall to ride.

Maximum Weight – 300 lb. per rider

An inverting thrill ride giving riders the sensations of an aerobatic airplane flight where units rotate on a 360 axis while spinning to a height of 26 feet around the clockwise-rotating center hub.

Restraint System: A shoulder harness with a between-the-legs safety strap secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast, or full leg cast are not permitted to ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full-body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding, and must ride with a Supervising Companion. Leg prosthetics above the knee are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

The Airwalker

Guests must be 48" tall to ride alone **OR** 42" tall **AND** accompanied by a Supervising Companion.

A family thrill ride where a 24-passenger gondola spins as it travels on a track. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces and directions.

Restraint System: A shared lap bar secures all riders in the row. Due to the nature of the restraint, this ride may not accommodate Guests of larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities: one functioning arm and two functioning legs. Prosthetics are not permitted on this ride. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast or full leg cast are not permitted to ride. Arm casts must not be positioned next to another rider. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Beagle Scout Acres 1

Guests taller than 54" are not permitted to participate on the structure.

Interactive play area includes slides, climbing boards, and open play area perfect for the little ones. Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to participate.

Boo Blasters on Boo Hill 2

*Guests must be 42" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 700 lb. per car

A ghost themed interactive dark ride.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row.

Rider Criteria: Guests who do not have one functioning leg, seated postural control, the ability to enter or exit the ride safely, or who cannot demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available via the Alternate Access Ramp. Please ring doorbell for assistance. Guests will have to transfer into the seat, either on their own or with the assistance of a companion. Specific ride vehicles at this attraction are equipped with a removable side which may assist a Guest in transferring from their wheelchair to the ride unit. Please inform a team member if you wish to use that vehicle. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, and be seated on the floor, not the ride seat.

WARNING: This ride contains strobe lighting.

WARNING: Attraction designed to scare or startle.

Camp Bus 2

*Guests must be 36" tall to ride alone **OR** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

Maximum Weight – 440 lb. per row; this ride only accommodates two adults per row.

PEANUTS™ themed bus with six rows that seats four Guests per row. The bus rotates both in a clockwise and counter clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all riders in the row.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals are permitted.

Carolina Cyclone 5

Guests must be 48" tall to ride.

A high-speed, looping roller coaster which turns riders upside down four times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Carolina Goldrusher 4

Guests must be 48" tall to ride.

A wood and steel roller coaster. Riders will experience rapid changes in direction.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit where Guests using wheelchairs will encounter an elevator. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering or exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Carolina Skytower 2

*Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion.*

An air-conditioned, enclosed cabin which rotates while traveling up a tower.

Rider Criteria: Guests who do not have seated postural control or do not demonstrate appropriate observed behavior must be accompanied by Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. This ride is wheelchair accessible and may accommodate one wheelchair. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Charlie Brown's River Blast 1

*Guests must be 48" tall to ride alone **OR** be accompanied by a Supervising Companion. Hand-held infants are not permitted.*

An interactive boat ride where boats are gently floating along a water channel at low speed and Riders shoot the on-board water cannons.

Rider Criteria: Guests who do not have seated postural control or do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Cast/brace must fit safely inside the ride unit.

Rider Access: Alternate Access is available at the ride exit. This ride is wheelchair accessible and may accommodate one wheelchair per select boats. Watch your step, as the ride unit may be slippery and wet. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Charlie Brown Wind Up 1

*Guests must be between 36" tall **AND** less than 54" tall to ride.*

A child-size chair swing ride with free-hanging seats suspended from a gently rotating tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each rider.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Copperhead Strike® 5

Guests must be 52" tall to ride.

A double-launch, full-circuit roller coaster featuring weightlessness, high-speed banked turns, and rapid directional changes.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper function and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities: one functioning arm and two functioning legs. Amputations must be below the ankle. Prosthetics are not permitted on this ride. Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit where Guests using wheelchairs will encounter an elevator. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems during ride.

Do-Si-Do 3

Guests must be 54" tall to ride alone **OR** 42" tall **AND** be accompanied by a Supervising Companion.

Maximum Weight – 330 lb. per car

This is a circular ride with three sweeps of gondolas moving counterclockwise against the ride's main clockwise rotation.

Restraint System: A shared lap bar and seatbelt secures all riders in a row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or a braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the gate to the right of the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Electro Spin 5

Guests must be 54" tall to ride.

An inverting thrill ride where units rotate on a 360-degree axis while spinning to a maximum height of 64 feet around the center hub. Riders will experience weightlessness, strong side-to-side movement, and rapidly changing forces and directions.

Restraint System: A shoulder harness with a between-the-legs safety strap secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Flying Ace Balloon Race 3

Guests must be 48" tall to ride alone **OR** be accompanied by a Supervising Companion. Hand-held infants are not permitted.

PEANUTS™ themed hot air balloon ride that spins and raises riders in the air.

Restraint System: A shared seatbelt secures all riders in a row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please use caution, as the ride unit may shift when entering and exiting.

CAUTION: Units tip while entering and exiting.

The Flying Cobras 5

Guests must be 48" tall to ride.

A high-speed, looping roller coaster which turns riders upside down multiple times forward and then again while traveling backward. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two legs (excluding prosthesis). Amputations must be below the ankle. One leg (excluding prosthesis) is sufficient instead of two legs if the other leg extends to the end of the seat. Guests with a cervical collar, neck brace, broken collar bone or full leg cast are not permitted to ride. Guests with any lower extremity prosthesis must ensure the device is properly secured or removed prior to riding. Arm prosthetics are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they will shift.

Fury 325® 5

Guests must be 54" tall to ride.

A high-speed steel roller coaster, where riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three extremities; one functioning arm that includes a hand and two legs that include a foot. Due to manufacturer requirements, a prosthetic leg is not a substitute for a leg amputation. Two functioning arms including hands are sufficient instead of two legs with feet as long as the amputation is below the ankle. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guests has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. A Guest operated wheelchair lift is available to transport Guests to the ride platform. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

Note: Loose articles may not be left on the platform and are not permitted in line. They may either be left with a non-rider or be placed in lockers for storage.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems during the ride.

Gear Spin 4

Guests must be 42" tall to ride.

Maximum Weight – 661 lb. per unit

A family thrill ride where gondolas rotate on arms around a horizontal axis in circular motion while rotating clockwise and counter-clockwise around the center hub. Riders will experience weightlessness and rapidly changing forces and directions.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted. Guests with a cervical collar, neck brace, broken collar bone, full or braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they will shift.

The Grand Carousel 1

Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.

A carousel ride which features animals — both stationary and moving up and down — and chariot seating mounted on a circular platform that rotates.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the chariot. Riders with a full-leg cast must ride in a chariot.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals must be leashed and under the owner's control, and are permitted to ride on the ride platform or chariots.

Gyro Force 3

Guests must be 42" tall to ride **OR** be accompanied by a supervising companion.

Maximum Weight – 340 lb. per seat

This is a circular ride that rises to a tilted position while rotating forward. It produces changes of force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, back brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion. Riders will need to step up and shift sideways to enter the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Hover and Dodge 4

Guests must be 48" tall to drive **OR** 42" tall **AND** be accompanied by a Supervising Companion to be a passenger.

A bumper car ride where Guests drive cars around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual shoulder strap is positioned across the chest and over the lap of each rider. A shared lap bar is positioned above the laps of all riders in the row.

Rider Criteria: **Driver:** Guests must have a minimum of three functioning extremities. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Passenger: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Guest with a visual impairment or who are not able to steer and press the accelerator must ride as a passenger with a driver who meets the requirements to drive.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: Avoid head-on collisions.

Hurler™ 4

Guests must be 48" tall to ride.

A wooden rollercoaster with large drops and banked turns.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit where Guests using a wheelchair will encounter an elevator located underneath the station to the left of the exit stairs. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they may shift.

WARNING: This ride utilizes magnetic systems.

Kaleidoscope 3

Guests must be 48" tall to ride alone **OR** 36" tall **AND** be accompanied by a Supervising Companion.

Maximum Weight – 510 lb. per car

Rotating cars are mounted on counter-rotating arms, which produce strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seat belt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of entering and exiting elevated vehicles which may shift.

Kiddy Hawk 4

Guest must be between 44" tall **AND** 76" tall to ride.

A family suspended-steel roller coaster. Riders will experience rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two extremities: one functioning arm with a hand (excluding prosthesis) and one leg. Two functioning arms are sufficient instead of one functioning arm and one leg if the Guest has one full leg or leg amputations extends to the end of the seat. One functioning arm with a hand (excluding prosthesis) is sufficient instead of two functioning extremities if the Guests lower extremities extend to the end of the seat. Leg prostheses are not permitted. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift. Guests between 44" tall and 54" tall may need to be assisted on and off the ride.

Kite Eating Tree 2

Guests must be 36" tall to ride.

Weight Requirement: – 770 lb. per ride; this ride only accommodates two adults per ride.

This children's ride hoists riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row with an individual between-the-legs safety belt. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. Adults must sit on the two outside seats.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Mountain Gliders 3

Guests must be 44" tall to ride alone **OR** 36" tall **AND** be accompanied by a Supervising Companion.

Riders ride in suspended cars that rotate in a circle. Once the rider's speed increases, riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests who do not demonstrate appropriate observed behavior must be accompanied by a supervising companion. Guests are not required to have appropriate center of gravity. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves into the seat. Please use caution, as the ride unit may shift when entering and exiting.

PEANUTS™ Pirates 3

Guests must be 48" tall to ride alone **OR** 40" tall **AND** be accompanied by Supervising Companion.

Mini pirate ships that rotate, pivot, twist and turn a full 180 degrees while the ride rotates up and down on a circular track.

Restraint System: A shared lap bar and seatbelt secures all riders in a row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

PEANUTS™ Trailblazers 2

Guests must be 36" tall to ride alone **OR** be accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight – 275 lb. per car

This children's ride allows Guests to ride in their own car that whips around an oblong track.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Pigpen's Mud Buggies 2

Guests must be 36" tall to ride alone **OR** be accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight – 382 lb. per car; this ride may only accommodate one adult per car.

Space vehicles that jump up and down while rotating around a circular track.

Restraint System: A shared seatbelt secures each rider across the thighs and pelvis. Adults must sit in the last row.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Ricochet 4

Guests must be 54" tall to ride alone **OR** 44" tall **AND** be accompanied by a Supervising Companion.

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they may shift.

WARNING: This ride contains strobe lighting.

RipCord 5

Guests must be 42" tall to ride.

Maximum Weight – 850 lb. per flight

This is a high-thrill Skycoaster attraction made to simulate flight. Riders are hoisted into the air. They control their own ride experience by pulling the ripcord, initiating their tethered freefall descent and flight. The sensation of flight as riders fall is similar to skydiving and hang gliding, with riders reaching speeds.

Restraint System: A full body harness secures each rider in the prone position. The harness is connected to the flight support cables.

Rider Criteria: Guests must have a minimum of one functioning leg and, by reason of the restraint system inherent in the flight suit, it is necessary that Guest possesses two arms sufficient for proper functioning of the flight suit to be maintained. Lower extremities must be sufficient enough length to be contained and restrained by a leg strap. Proper functioning of the flight suit must be maintained for riders without appropriate center of gravity. Guests with a cervical collar, neck brace, or broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Guests with a forearm cast must ride with the cast positioned on the outside.

Rider Access: Alternate Access is available at the ride exit. Riders must be able to walk independently or be assisted by a member of their party.

Note: This is an extra-charge attraction.

Rock N' Roller 3

Guests must be 52" tall to ride alone **OR** be accompanied by a Supervising Companion. Maximum height for Guests is 78" tall. Hand-held infants are not permitted.

Maximum Weight – 495 lb. per car

This is a high-speed circular ride which follows a steeply rolling up-and-down table. Riders will experience side-to-side forces on this ride.

Restraint System: A shared lap bar and seatbelt secures all riders in a row across the thighs and pelvis. The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning leg and one functioning arm. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the rider has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic condition of the ride. Amputations must be below the knee. Guests may have two functioning legs instead of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use ride restraint for support while entering and exiting, as they will shift.

CAUTION: Units tip while entering and exiting.

Sling Shot 5

Guests must be between 44" tall **AND** 79" tall to ride.

Weight Requirement: minimum combined weight of 110 lb. per ride; single riders are not permitted.

A two-person capsule that is attached to steel cables and propels riders into the air. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces and directions.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, full foot, or lower leg cast are not permitted to ride. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Note: This is an extra-charge attraction.

SNOOPY™ vs. Red Baron 2

Guests must be between 36" tall **AND** 54" tall to ride.

A slow-moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

SNOOPY'S™ Racing Railway 4

Guests must be 48" tall to ride alone **OR** 36" tall **AND** accompanied by a Supervising Companion.

A family launch coaster that accelerates from zero to 27 miles per hour in a matter of seconds before zipping through dips and turns.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.

Thunder Striker 5

Guests must be 54" tall to ride.

A high-speed steel roller coaster with a combination of banked turns and airtime hills.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper function and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three extremities; one functioning arm that includes a hand and two legs that include a foot. Due to manufacturer requirements, a prosthetic leg is not a substitute for a leg amputation. Two functioning arms including hands are sufficient instead of two legs with feet as long as the amputation is below the ankle. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Leg prosthetics are not permitted on this ride. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate Access if available at the ride exit. A Guest operated wheelchair lift is available to transport Guests to the ride platform. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.

WARNING: This ride contains strobe lighting.

Vortex® 5

Guests must be 54" tall to ride.

A stand-up steel roller coaster that travels through a vertical loop, up and into an oblique loop, down into a carousel, and finally into a flat spin.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities: one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthetics are not permitted.

Rider Access: Alternate Access is available at the ride exit where Guests using a wheelchair will encounter an elevator. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering or exiting, as they will shift.

Wilderness Run 2

Guests must be 36" tall to ride.

A junior steel rollercoaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering or exiting, as they will shift.

WARNING: This ride contains strobe lighting.

WindSeeker 4

Guests must be 52" tall to ride.

Maximum Weight – 304 lb. per rider

A chair swing that spins and swings riders to a 45-degree angle while ascending a giant 301-foot tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Guests with any prosthesis must consult with Guest Services prior to waiting in line or riding.

Rider Access: Alternate Access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

WARNING: This ride contains strobe lighting.

Windstar 3

Guests must be 48" tall to ride alone OR 42" tall AND be accompanied by a Supervising Companion.

Maximum Weight – 600 lb. per unit

An interactive family ride that creates the experience of a flying hang glider that rotates around in a circle. Riders can use a bar to control the elevation of their unit.

Restraint Systems: An individual seatbelt and a between-the-legs safety belt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm and one functioning leg. One functioning arm is sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding position under the dynamic conditions of the ride and must be accompanied by a Supervising Companion. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride. Leg prosthetics are not permitted.

Rider Access: Alternate Access entrance is available at the ride exit. Riders will have to transfer into the seat, on their own, or with the assistance of a companion. Specific ride vehicles at this attraction are equipped with removable sides which may assist a rider in transferring from their wheelchair to the ride unit. Please inform a team member if you wish to use that vehicle.

Woodstock Express 4

Guests must be 46" tall to ride alone **OR** 40" tall **AND** be accompanied by a Supervising Companion.

A junior wooden roller coaster with banked curves and airtime hills.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a rider out of a wheelchair and into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Woodstock Whirlybirds 2

Guests must be 36" tall **OR** be accompanied by a supervising companion. Hand-held infants are not permitted.

Maximum Weight – 550 lb. per car

This is a family ride that travels a circular path while individual seats rotate on an axis.

Restraint System: A shared seatbelt secures riders. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities: one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access entrance is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Zephyr 3

Guests must be 48" tall to ride.

Maximum Weight – 230 lb. per rider

A chair swing family ride with free-hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the Guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputation must be below the knee. Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access entrance is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

CAROLINA HARBOR

Each attraction is placed into one of five categories:

CATEGORY	DESCRIPTION
Low Thrill Rides	1 This is a low speed, and/or shallow water attraction.
Mild Thrill Rides	2 This is a low to medium speed attraction, and/or water depth to 48 inches. Some rider control, maneuvering and/or swimming skills required.
Moderate Thrill Rides	3 This is a medium speed attraction. Height and water depth may vary. Moderate or unexpected forces can be generated during the ride. This attraction may require Rider control and/or strong swimming skills. Physical activity may be strenuous.
High Thrill Rides	4 This is a fast-paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires rider body control and strong swimming skills.
Aggressive Thrill Rides	5 This is a high speed and/or deep water attraction with turbulent turns, drops and/or strong water currents with changes in speed, direction, elevation and/or deep water, which may be unexpected. This attraction requires rider body control and swimming skills.

Appropriate Attire

Appropriate swimwear is required to participate on all attractions. Thongs or transparent clothing/swimwear are not permitted. We reserve the right to determine the appropriateness of swimwear.

Guests wearing bathing attire with metal buttons, rivets, zippers, or snaps will not be permitted to participate in any of our attractions.

For your safety, loose clothing (including scarves and other free-flowing clothing) must be significantly secured or removed and placed in a waist pack, in a locker, or with a non-participant to prevent any interference with the ride experience. Hearing devices or other electronic devices may be damaged by water. Please take the necessary steps to protect such items. Contact lenses are not recommended. Guests requiring special accommodation should speak to a member of the Aquatics Supervisory Team.

Swimwear, swim diapers, and eye wear straps may be purchased at Beach Combers.

Life Jackets

Life jackets are available for all Guests. Only Coast Guard approved life jackets are allowed as flotation devices. Life jackets are provided free of charge for Guests who require one.

In wave pools, life jackets are required for Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions or heart conditions, or those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Surf Club Harbor and Tidal Wave Bay.

In other attractions requiring life jackets, children who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers must wear a life jacket. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Coastal Currents.

Ongoing Lifeguard Training

In an ongoing effort to provide a safe and enjoyable waterpark experience for our Guests, Carolina Harbor routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water manikins, the use of video surveillance equipment, internal and external audits, and responsive/unresponsive water rescues and/or first aid scenarios.

Swim Diapers

Diaper-dependent Guests are required to wear swim diapers or a diaper specifically designed for aquatic use while participating in Carolina Harbor attractions. Swim diapers are available for purchase at Beach Combers.

Water Wheelchairs and Pool Lifts

A water wheelchair is available for Guests requiring additional assistance when gaining access into Surf Club Harbor and Tidal Wave Bay. The water wheelchair may be used by multiple Guests on the same day. While in a wave pool, the water level may not exceed the height of the seat on the chair. Personal wheelchairs are permitted up to the seat's water depth. Guests utilizing wheelchairs will not be required to utilize a lifejacket while in the wave pool only if their height exceeds 52" tall and meet all other rider criteria for the attraction. Guests may choose to use a water wheelchair instead of a personal wheelchair. While using either a personal wheelchair or a water wheelchair, Guests must not utilize the wheelchair's seatbelts while in the wave pool. During your visit, please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair or pool lift and for further accessibility information.

WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the type of actions caused by various attractions. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have independent seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each attraction. Please use caution when entering and exiting water park attractions as the surrounding areas may be slippery. Conveying devices, such as tubes and rafts, may be slippery and can shift during loading and unloading.

Barracuda Blasters 4

Guests must be 48" tall in bare feet to ride

Maximum Weight – 250 lb. per tube

Two 40 ft. tall enclosed serpentine tube slides ending in a 42" pool.

Rider Criteria: Guests must sit facing forward in a tube, holding onto the tube handles with legs extended forward. Guests must have a minimum of three functioning extremities. Full arm casts, braced arm casts, foot or lower leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Blackbeard's Revenge – Drop Slides 4

Guests must be 48" tall in bare feet to ride

Maximum Weight – 300 lb. per rider

Riders stand in an enclosed capsule where the floor drops launching them down high speed drops and banked turns before ending in a water-filled runout. Riders will experience high speeds, weightlessness, and rapid movements from side to side. Maximum water depth is 12".

Rider Criteria: Guests must stand with their head against the slide, legs firmly crossed at the ankles, with arm folded across the chest, and maintain position throughout the ride. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion. Please use caution when entering and exiting as the area may be slippery.

WARNING: Loose articles are not permitted, including, but not limited to: piercings, necklaces, rings, and T-shirts.

Blackbeard's Revenge – Tube Slides 4

Guests must be 48" tall in bare feet to ride

Maximum Weight – 300 lb. per single tube; 400 lb. per double tube

Two partially enclosed tube slides that send riders on single or double tubes down a series of intense drops and turns. All slides end in a catch pool with 42" of water. Maximum of one Guest per single tube and two Guests per double tube. On double tubes, the front rider must sit between the legs of the heavier rider.

Rider Criteria: Guests must remain seated in the tube facing forward and holding onto the handles. Guests must have a minimum of three functioning extremities. Guests with cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this slide.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Boogie Board Racer 4

Guests must be 42" tall in bare feet to ride

Maximum Weight – 300 lb. per rider

Slide complex that has Guests slide head first on a mat down flumes into a 6" deep runout. One single rider per mat and slide.

Rider Criteria: Guests must lie down on a mat, facing forward, and firmly grasping the handles throughout the ride with elbows tucked in towards the body. Guests must have a minimum of three functioning extremities: two functioning arms and one functioning leg. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a mat. Riders will have to ascend the slide tower and be capable of safely boarding the mat, on their own or with the assistance of a companion.

Carolina Harbor Shore House 1

A 21 years old and over adult pool and bar. ID required for entry. Water depth is 42".

Rider Criteria: Guests must be able to maintain independent seated postural control, must have appropriate observed behavior, and the ability to enter and exit the attraction safely or be accompanied by a companion 21 years or older.

Rider Access: Access is available via the stairs or pool lift. Guests will have to transfer to the stairs or lift on their own or with the assistance of a companion.

Coastal Currents 2

Children must be 42" tall in bare feet to ride alone OR be accompanied by a Supervising Companion. Children under 48" tall in bare feet or those who are inexperienced or non-swimmers are required to wear a life jacket. A supervising companion may accompany up to two children.

A slow-moving river tube ride. The river is approximately 1,000 ft. long and passes through both North and South Carolina.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Guests who cannot enter/exit without endangering themselves or others must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access is available via the zero depth entry or stairs. Riders will have to transfer to the stairs, or tube, on their own or with the assistance of a companion.

Hurricane Falls 4

Guests must be 48" tall in bare feet to ride. Guests between 42" and 48" tall in bare feet must wear a life jacket AND be accompanied by a supervising companion.

Maximum Weight – 800 lb. per raft

A thrilling family raft ride where riders experience turns and drops before finishing in a 36" deep splash pool. Riders will experience high speeds and rapid movements from side-to-side.

Rider Criteria: Guests must be seated with their back against the raft and hands firmly grasping the handles throughout the ride. Guests must have a minimum of three functioning extremities. Guests with cervical collar, neck brace or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion.

Rider Criteria: Guests who cannot maintain seated postural control, do not have appropriate observed behavior, or do not have the ability to enter/exit the attraction safely must be accompanied by a Supervising Companion.

Myrtle Turtle Beach 1

Rider Criteria: Guests who cannot maintain seated postural control, do not have appropriate observed behavior, or do not have the ability to enter/exit the attraction safely must be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion.

Pelican Plunge 2

A pair of tube slides that twist riders in double tubes along dual 125 ft. long chutes. Both slides end in a catch pool with 24" of water. Single riders must be positioned in the back of the tube. When riding in a pair, the front rider must sit between the legs of the heavier rider. Maximum of two Guests per double tube.

54

Pirate's Landing – Play Structure 2

Pirate's Landing - Play Slide 2

Seaside Splash Works – Play Structure 2

A multi-level play structure that features over 80 play elements including dozens of interactive spray jets, water blasters, adventuresome net bridges, awesome water wheels, and a giant 423-gallon tipping bucket that drenches everyone below.

Rider Access: Access to the attraction requires climbing stairs. Guests will have to ascend the stairs on their own or with the assistance of a companion.

Six mild body slides, each starting at different heights within the play structure. Each body slide ends in a shallow run-out lane.

Rider Access: Access to the attraction requires climbing stairs. Guests will have to ascend the stairs and be capable of safely entering the slide, on their own or with the assistance of a companion.

Two high-speed enclosed body slides with sudden drops designated for a single rider. Slides end in a 6" deep run out.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests may not sit up in enclosed slides while riding. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

WARNING: Loose articles are not permitted, including, but not limited to: piercings, necklaces, rings, and T-Shirts.

Two enclosed tube slides that send riders on double tubes down a series of drops and turns in total darkness. Both slides end in a catch pool with 30" of water. Single riders must be positioned in the back of the tube. When riding in a pair, the front rider must sit between the legs of the heavier rider. Maximum of two Guests per double tube.

Rider Access: Access to the attraction requires climbing a flight of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Two large wave pools with depths ranging from 0' – 6' (0 cm – 182.88 cm). Waves are generated for five minutes on and five minutes off. During wave action, strenuous activity is required. Prolonged exposure to wave action may result in fatigue. Exercise caution in deep water.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand held infants or Guests with full arm casts or full leg casts are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast cannot participate.

Rider Access: Access to the attraction is available via the zero-depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for Guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to a water wheelchair.

ENTERTAINMENT VENUES

Due to the popularity of our shows, we suggest you arrive early as seating may be limited. Show schedules are available at Guest Services, on the Six Flags mobile app, and at any theater entrance. All entertainment venues are accessible to Guests who may have a mobility impairment. Assisted listening devices are available for Guests at each theater who are hearing impaired. Large print scripts may also be available. Ask any team member at the venue for assistance.

Carowinds Theater

Carowinds Theater, located in Carousel Park, is an indoor, air-conditioned theater featuring main stage show productions. There are viewing areas that accommodate wheelchairs and companions in the middle of the theater. Please ask an usher for assistance.

Paladium Theater

Paladium Theater, located by the North Entrance Gate, is an outdoor theatre featuring main stage show productions. There are viewing areas that accommodate wheelchairs and companions at the front, middle and rear of theater. Please ask an usher for assistance.

SCAROWINDS®

Select Nights: Sept 11 – Nov 7

SCarowinds has extreme haunts that are designed to scare and startle. During this event, the park and certain attractions will have areas of low lighting, loud sounds, and dense fog. Please adhere to all posted and verbal warnings and directions. Some attractions may require Guests to transfer from their motorized wheelchairs to a non-motorized wheelchair located at the attraction. Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised to not participate in these attractions.

Characters inside our SCarowinds attractions will not touch you; please do not touch them in any manner. Guests that do so will be removed from the park without refund. Rowdy behavior and profanity are cause for removal from the park. For safety reasons, Guests may not wear face paint, costumes, or masks.

Alternate Access may be available. Please visit Guest Services for more information. Service animals are welcome to attend SCarowinds event. Service animals are welcome to attend SCarowinds event and are permitted to walk through the park and enter haunted attractions. Please adhere to all posted and verbal warnings and directions.

TRICKS AND TREATS FALL FEST

Select Days: Sept 12 – Nov 7

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event's attractions or services, visit Guest Services.

WINTERFEST

Select Dates: Nov 27 – Jan 3

Carowinds WinterFest is filled with delightful holiday cheer for Guests of all ages. Many areas of the park will have low lighting, fog, snow machines, and strobe-styled lighting. Guests with a history of seizures or epilepsy should be aware of flashing and strobe styled lighting that will be present throughout the park. For more information about the event, visit Guest Services.

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept these risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations, Carowinds does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, **do not ride!**

All restraint systems including lap bars, shoulder harnesses, and seatbelts must be positioned, fastened, and tightened properly to allow Guests to ride.

Information in this guide is subject to changes.
