

Guest ACCESSIBILITY GUIDE

WELCOME TO SIX FLAGS GREAT AMERICA!

We are glad you are here! At Six Flags Great America we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment and we want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at the Ride Information Center or Guest Relations. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit the Ride Information Center to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Team Members to help accommodate you.

RIDE SAFELY

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Six Flags Great America. Remember, if you suspect your health could be at risk for any reason, or if you could aggravate a pre-existing condition of any kind, **DO NOT RIDE.**

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or be assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper rider positioning and hold on until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Six Flags Great America is not responsible for lost or stolen items. You are responsible for your personal property.
- Using cell phones or other electronic devices for any purpose, including picture taking, is prohibited on most rides.
- Keep all parts of your body inside the ride unit at all times.
- Appropriate clothing and shoes are required for most rides. Six Flags Great America reserves the right to determine the appropriateness of riding attire.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Six Flags Great America.

RIDE RATING SYSTEM

A Ride Rating System has been designed that provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides	1	Rides that are generally calm and gentle in nature.
Mild Thrill Rides	2	Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	3	Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	4	Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction, and/or elevation.
Aggressive Thrill Rides	5	Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Maximum speed of ride
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below

Accommodates wheelchair

This symbol is used to identify rides where Riders may remain in their wheelchair.

Transferable

This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

Ambulatory

This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Six Flags Great America uses the following terms:

Ability to hold on or brace: Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Hand-held Infant: Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Great America Scenic Railway and Sky Trek Tower. Hand-held infants and their Supervising Companion may also enjoy Columbia Carousel but may not participate on the elevated sections of the attractions.

Supervising Companion: Many of our rides have height requirements that allow a Guest under that requirement to ride with a Supervising Companion. A Supervising Companion is a Companion who is at least 54" in height and approximately 14 years of age, who meets all other criteria for riding, and who will assist their Companion in complying with safe participation instructions. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be “officially” measured at the Ride Information Center or any ride. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height measuring device may be used during the height measuring process. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, shoes that contribute excessively to a Guest's height are prohibited during measuring. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Six Flags Great America reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed

a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit the Ride Information Center upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services Team Member will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request reasonable accommodations are encouraged to obtain the IBCCES Accessibility Card (IAC) by registering at **accessibilitycard.org** or via the Accessibility Card mobile App. Once a Guest has filled out the online application and uploaded necessary documentation into a secure online portal, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to Six Flags Great America upon their arrival at the park to express their accommodation needs. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Relations Team Member will provide the details needed to participate in the program.

Note: Only IBCCES can issue the IBCCES Accessibility Card, and not Six Flags Great America.

CASTS AND BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides. We suggest you delay your visit until the cast is removed.

The following chart displays the cast and brace rules for all rides and attractions.

- C Must ride in a chariot
- F Cast/brace must fit safely in the ride unit
- O Not permitted to participate on elevated activity area
- Y May ride with the condition
- Z Participation or water depth may be restricted if necessary

PROSTHESIS

Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit designated park locations for assistance before riding to ensure a safe experience.

Guests with any type of prosthesis are advised to consult with the Six Flags Great America Supervisory Team for guidance during their visit.

Additional lists are available for:

- Rides where both arm and leg prosthesis are not permitted are: Goliath, Maxx Force, Sky Striker, THE FLASH™: Vertical Velocity, and THE JOKER™ Free-Fly Coaster.
- Rides where leg prosthesis are not permitted and arm prostheses are only permitted if the Guest is able to ensure that the device is properly secured and will remain in place during the ride are: BATMAN™: The Ride, Giant Drop, Raging Bull, SUPERMAN™: Ultimate Flight, Wrath of Rakshasa, and X Flight.

RIDE DEVICES

For safety reasons, certain attractions may require the removal of medical devices or prosthetics. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

Ride attendants and Guest Service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Additional lists are available for:

- Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: American Eagle, BATMAN™: The Ride,

Big Easy Balloons, Bouncer, Chubasco, Columbia Carousel (if the Rider wants to ride on an animal), Condor, DC Super-Villains Swing™, Demon, Fiddler's Fling, Giant Drop, Goliath, Hometown Fun Machine, JUSTICE LEAGUE™: Battle for Metropolis, Krazy Kars, Krazy Kups, Lady Bugs, Little Dipper, Maxx Force, Raging Bull, Red Baron, Ricochet, River Rocker, Sky Striker, Sprocket Rockets, SUPERMAN™: Ultimate Flight, THE DARK KNIGHT™ Coaster, THE FLASH™: Vertical Velocity, THE JOKER™ Free-Fly Coaster, The Lobster, Tot's Livery, Triple Play, Up, Up & Away, Viper, Whizzer, Wrath of Rakshasa, X Flight, and Zoomjets.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride Attendant or Guest Relations Team Member.

ADDITIONAL INFORMATION

Our goal is to make Six Flags Great America as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large Print Guest Accessibility Guides

Print versions of the Park Guide and Guest Accessibility Guide are available at the Ride Information Center. Braille and large print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Family Services

A space for nursing mothers is available at First Aid in Hometown Square and Kidzopolis in County Fair. Baby changing areas can be found in most restrooms. A companion restroom can be found in most restrooms, but a larger location is in Kidzopolis in County Fair. Please feel free to ask a Team Member for directions to these locations or review a park map.

First Aid

Our First Aid Building located in Hometown Square is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid.

Hearing Needs

If you require American Sign Language (ASL) interpreting services, we can provide them with at least 7 days advance notice for live show venues. Additionally, show scripts or score sheets can also be requested at each venue and may be provided. To arrange ASL services, please call 847-249-4636 Monday through Friday 9:00am to 5:00pm.

Parking

Accessible parking is available on a first-come, first-served basis within the main parking lots of the park. When

you arrive at the parking toll booths, ask a Team Member for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disability parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to tow vehicles that do not display proper identification. Community Service Officers are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask a Team Member for directions to additional parking areas.

Restrooms

Private restroom facilities for Guests needing the assistance of a companion are available at most restrooms, but a larger location is in Kidzopolis in County Fair. Wheelchair accessible stalls are located at all restrooms. For your convenience we also have a family restroom available in Kidzopolis.

Rider Swap

The Rider Swap program allows one adult to stay with non-riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit the Ride Information Center in New Orleans Place or Guest Relations by the entrance/exit of the park.

Service Animals

Service animals are welcome at Six Flags Great America. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include: guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be housebroken, controlled with a restraining device, and they must display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or Team Member will be directed to remove the animal from the park. There is a limit of two service animals per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on Columbia Carousel, Great America Scenic Railway, Krazy Kars, Sky Trek Tower, and Up, Up & Away. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. They may also attend the performances at the Grand Music Hall. They are permitted to walk through the park areas, including scare zones. Visit the Ride Information Center or Guest Services for more information. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information

A Service Animal "Relief Area" is located in the grassy area next to THE JOKER™ Free-Fly Coaster in Mardi Gras and near the restrooms at the Front Gate. Owners are responsible for disposing of their animal's waste.

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at Stroller & Wheelchair rental in Carousel Plaza. However, since wheelchairs, ECV's, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own. Rentals are also available at the park while supplies last.

Wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park Team Member will be happy to provide any assistance you may need at that time. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park.

Guests Using Wheelchairs & ECV's

We require a safe speed be maintained while traveling in the park by Guests who choose to use a wheelchair or ECV. Wheelchairs and ECV's cannot be accommodated on all rides and attractions. Please refer to the individual ride and attraction descriptions in the back of this guide for more specific information.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. Six Flags Great America personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so.

You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Guest Relations.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. If an evacuation from a ride/ attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF A LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on: American Eagle, BATMAN™: The Ride, Bouncer, Chubasco, Columbia Carousel, DC Super-Villains Swing™, Giant Drop, Goliath, Maxx Force, Raging Bull, River Rocker, Sky Striker, SUPERMAN™: Ultimate Flight, THE DARK KNIGHT™ Coaster, THE FLASH™: Vertical Velocity, THE JOKER™ Free-Fly Coaster, Viper, Wrath of Rakshasa, and X Flight.

Maximum weight limits can be found under the individual rides in this guide and on the Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned about whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance(s) of: BATMAN™: The Ride, Goliath, Raging Bull, SUPERMAN™: Ultimate Flight, THE JOKER™ Free-Fly Coaster, Wrath of Rakshasa, and X Flight.

The manufacturer requires a maximum Guest height on the following rides:

54" Maximum: Lady Bugs, Red Baron, Tot's Livery

77" Maximum: THE JOKER™ Free-Fly Coaster

78" Maximum: Wrath of Rakshasa, X Flight

80" Maximum: Sky Striker, THE FLASH™: Vertical Velocity

LOOSE ARTICLES

Most rides cannot accommodate loose articles including cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Six Flags Great America is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body.

Using cell phones or other electronic device for any purpose, including picture taking, is prohibited on most rides. Failure to comply may result in ejection from the park.

Glasses must be secured on all rides. On Goliath, Maxx Force, SUPERMAN™: Ultimate Flight, and THE JOKER™ Free-Fly Coaster, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see a Team Member for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Six Flags Great America are turned in to Lost & Found. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported at SixFlags.com/lost-and-found.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnets are used at the following attractions: Giant Drop, Goliath, JUSTICE LEAGUE™: Battle for Metropolis, Maxx Force, THE DARK KNIGHT™ Coaster, THE FLASH™: Vertical Velocity, THE JOKER™ Free-Fly Coaster, Wrath of Rakshasa, and X Flight. Guests with medical devices sensitive to magnetic fields

(pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, personal oxygen tanks are only permitted on the following rides: Columbia Carousel, Great America Scenic Railway, and Sky Trek Tower. The tank must fit safely in the ride unit and not interfere with the ride restraint system. For your convenience, the park's First Aid station(s) will be able to appropriately store your additional oxygen tanks during your visit.

Many rides can accommodate smaller portable oxygen equipment. Portable oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the ride restraint system to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects, including but not limited to: haze and other atmospheric effects, scents, areas of low lighting, loud music, sound effects, strobe lighting and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions. Attractions utilizing these effects include: JUSTICE LEAGUE™: Battle for Metropolis and THE DARK KNIGHT™ Coaster. During Fright Fest, the following attractions utilize effects: Chubasco and Rue Le Dodge.

PROPER ATTIRE

For the safety and enjoyment of our Guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride with shirts, shorts and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. On Maxx Force, THE FLASH™: Vertical Velocity, and THE JOKER™ Free-Fly Coaster loose clothing will be required to be removed in their entirety. Loose fitting shoes may only be removed before riding American Eagle, BATMAN™: The Ride, DC Super-Villains Swing™, Demon, Fiddler's Fling, Giant Drop, Goliath, Little Dipper, Raging Bull, Sky Striker, SUPERMAN™: Ultimate Flight, THE FLASH™: Vertical Velocity, THE JOKER™ Free-Fly Coaster, Viper, Wrath of Rakshasa, and X Flight.

Swimwear is not permitted on rides with the exception of if a one piece, stomach covering, bathing suit is worn, a shirt is not required to ride AQUAMAN™ Splashdown, Logger's Run, or Roaring Rapids. In this situation, bottoms are required to be worn over the bathing suit. Swimwear is required to be appropriate. Thongs or transparent clothing are not permitted.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Independent seated postural.

The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.

The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.

Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to hold on with two functioning arms.

Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the

dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to brace self with one functioning leg.

Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to brace self with two functioning legs.

Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Minimum of two functioning extremities.

Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.

Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.

Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access entrance or having someone aid in boarding. For the safety of our Team Members and Guests, Team Members are instructed not to perform any lifting of Guests.

Appropriate observed behavior:

Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest

requirements. Appropriate observed behavior may include, but not be limited to, maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

RIDES

The following descriptions are designed to give you information on the types of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

American Eagle 4

Guests must be 48" tall to ride.

A high speed wooden roller coaster with a combination of banked turns and airtime bumps.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness.

Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

AQUAMAN™ Splashdown 2

Guests must be 42" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

This is a water flume ride; Riders may get wet. Riders will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit which requires climbing a flight of stairs. Riders will have to take several steps down the stairs and along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down into a wet, unsteady boat while loading and unloading. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

WARNING: Boats may bump into the side of channel and other boats.

BATMAN™: The Ride 5

Guests must be at least 54" tall to ride.

A high-speed, inverted, looping roller coaster that turns Riders upside down. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat

is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand (excluding prosthesis) and two legs that each include a foot. Two functioning arms with hands (excluding prosthesis) are sufficient instead of three extremities if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted on the ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles, including hip packs, are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride contains strobe lighting.

Big Easy Balloons 2

Guests must be 48" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

Hot air balloon ride that spins and raises Riders in the air.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one

functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended ride unit. Please use caution, as the ride unit may shift when entering and exiting. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Bouncer (in Kidzopolis) 2

Guests must be 36" tall to ride alone **OR** accompanied by a Supervising Companion.

Maximum Weight - 660 lb. per ride. This ride only accommodates two Guests over 54" per ride.

This children's ride hoists Riders up in the air and provides a gentle yet bouncy trip down.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. A shared seatbelt secures two Riders across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. Guests over 54" must sit in an outside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, broken collar bone, or any leg cast (foot, lower, full) are not permitted on this ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm

residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Chubasco 3

Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion. Hand-held infants are not permitted.

This is a family ride with a quick circulating motion.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

WARNING: During Fright Fest this ride contains strobe lighting.

Columbia Carousel 1

Guests must be 42" tall to ride alone **OR** accompanied by a Supervising Companion.

A double decker carousel ride which features animals--both stationary and moving up and down--and chariot seating mounted on a circular platform that rotates.

Restraint System: An individual seatbelt secures each Rider across their waist. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. Only one Rider per animal.

Rider Criteria: Guests must have at least one functioning arm and two legs that each include a knee. Guests unable to meet these requirements must be seated in a chariot. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the chariot.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step into the ride unit. Service animals must be leashed and under the owner's control, fit on the floor of the ride, are permitted to ride on the ride platform or chariots.

Condor 3

Guests must be 54" tall to ride alone **OR** accompanied by a Supervising Companion.

Rotating cars are mounted on counter-rotating tower that climbs to 105 ft, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. A door further encloses the ride unit. The smaller Rider must sit ahead of the larger Rider within the seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

DC Super-Villains Swing™ 2

Guests must be 48" tall to ride.

A chair swing family ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Demon 5

Guests must be at least 48" tall to ride.

A high-speed, looping roller coaster which turns Riders upside down multiple times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Fiddler's Fling 3

Guests must be 42" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

A circular ride where ride units move in the opposite direction of the ride table, spinning Riders in two opposing directions. Riders will experience rapid movements from side-to-side.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit which requires climbing a flight of stairs. Wheelchair Access is available at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Giant Drop 4

Guests must be 54" tall to ride.

A free-fall ride that lifts Riders to the top of a structure and drops them. Riders will experience weightlessness and rapidly changing forces.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across

the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses are not permitted.

Rider Access: Alternate Access is available at the gate next to the Operator. Riders will have to take steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride utilizes magnetic systems during the ride.

Goliath 5

Guests must be 48" tall to ride.

A thrilling hybrid roller coaster that has a wood frame and steel track turning Riders upside down two times. Riders will experience high speeds, weightlessness, and rapid movement from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand and two legs that each include a foot. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

All prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles, including hip packs, are not permitted. Loose articles can be zipped in the pouch on the train or left in a bin or with a non-Rider.

WARNING: This ride utilizes magnetic systems during the ride.

Great America Scenic Railway 1

Guests must be 42" tall to ride alone **OR** be accompanied by a Supervising Companion. Guests less than 42" tall must sit on the inside. Hand-held infants must be accompanied by a Supervising Companion.

A family ride that moves around a track with gentle turns.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a Supervising Companion.

Rider Access: Alternate Access is available at the ride entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Service animals must be leashed and under the owner's control, fit on the floor of the ride, are permitted to ride on the ride.

Hometown Fun Machine 3

Guests must be 48" tall to ride alone **OR** 36" tall **AND** accompanied by a Supervising Companion.

Maximum Weight - 510 lb. per car

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared door with a grab bar and seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please use caution when entering and exiting as the ride unit may shift. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

JUSTICE LEAGUE™: Battle for Metropolis 2

Riders must be at least 48" to ride alone **OR** 42" tall **AND** accompanied by a Supervising Companion who is someone who physically and mentally meets all of the requirements to ride, is 14 years of age or older, and exhibits the maturity of someone 14 years of age or older.

An interactive dark ride with turns and spins.

Restraint System: A shared lap bar secures each Rider across the thighs and pelvis. The smaller Rider must be seated on the ride side or in the middle of the row.

Rider Criteria: Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a companion into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Small loose articles are permitted on the floor of the ride unit. Large or bulky loose articles can be left in a bin or with a non-Rider.

WARNING: This ride contains strobe lighting.

WARNING: Attraction is designed to scare or startle.

WARNING: This ride utilizes magnetic systems during the ride.

Krazy Kars (in Kidzopolis) 2

Guests must be 36" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight - 440 lb. per car. This ride only accommodates one Guest over 54" per car.

This ride is a miniature car ride that follows an electric track in a "train-like" fashion.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride

Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the ride unit. Do not use the steering wheels for support as they will shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Krazy Kups (in Kidzopolis) 2

Guests must be 36" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight - 440 lb. per unit. This ride only accommodates two Guests over 54" per unit.

This is a family ride that travels a circular path while individual seats rotate on an axis.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Please use caution when entering and exiting as the ride unit may shift. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Lady Bugs (in Hometown Park) 1

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

This is a slow moving themed children's circular ride with an undulating platform.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Do not use the steering wheels for support as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Little Dipper 2

Guests must be 44" tall to ride alone **OR** 36" tall **AND** accompanied by a Supervising Companion.

A junior wooden roller coaster with banked curves and airtime hills.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. A shared seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, or any leg cast (foot, lower, full) are not permitted on this ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Logger's Run 2

Guests must be 42" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

This is a water flume ride; Riders may get wet. Riders will be seated in a rocking boat and brace for a plunge down a chute and a splash of water.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit which requires climbing a flight of stairs. Riders will have to take several steps down the stairs and along a moving turntable, on their own or with the assistance of a companion, and be capable of stepping down into a wet, unsteady boat while loading and unloading. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

WARNING: Boats may bump into the side of channel and other boats.

Maxx Force 5

Guests must be 48" tall to ride.

Maximum weight - 300 lb. per Rider.

An intense roller coaster with quick acceleration, high-speed turns, steep drops, inversions, and sudden stops.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis, additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes at least three fingers and the ability to grip and two functioning legs each with a foot. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

All prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles, including hip packs, are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride utilizes magnetic systems during the ride.

Raging Bull

Guests must be 5'4" tall to ride.

A high-speed steel roller coaster with a combination of banked turns and airtime hills.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand (excluding prosthesis) and two legs that each include a foot. Two functioning arms including hands (excluding

prosthesis) are sufficient instead of two legs with feet as long as the amputation is below the ankle. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles, including hip packs, are not permitted. Loose articles can be left in a bin or with a non-Rider.

Red Baron (in Hometown Park) 1

Guests must be between 36" and 54" tall to ride.

A slow moving plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the ride unit.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Ricochet 3

Guests must be 54" tall to ride alone **OR** 42" tall **AND** accompanied by a Supervising Companion.

Riders ride in cars that rotate in a circle while alternately lifting and then dropping the cars relative to the center of the ride. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. A lap bar belt further encloses the lap bar.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

River Rocker 3

Guests must be 48" tall to ride alone **OR** 36" tall **AND** accompanied by a Supervising Companion.

Maximum Weight - 694 lb. per row.

A moderate ride with a rocking back and forth motion.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Roaring Rapids 4

Guests must be 42" tall to ride alone **OR** 36" tall **AND** accompanied by a Supervising Companion.

A family water ride where Riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

Restraint System: A shared seatbelt secures two Riders in the pair of seats across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one

functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit which requires climbing a flight of stairs. Riders will have to take several steps down the stairs and along a moving turntable, on their own or with the assistance of a companion and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

WARNING: Rafts may bump into the side of channel and other rafts.

Rue Le Dodge

Guests must be 54" tall to drive **OR** 42" tall to ride **AND** with a Supervising Companion.

A bumper car ride where Riders drive cars around. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: Two shoulder straps are positioned under the arms. With two Riders, the shoulder straps are under each outside arm of each Rider. With one Rider, the should straps are under each arm of the Rider.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the Fast Lane entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down to the ride floor and up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

WARNING: Avoid head-on collisions.

Sky Striker 5

Guests must be between 52" **AND** 80" tall to ride.

Maximum weight - 300 lb. per Rider.

A thrill ride that swings to the height of 172 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a full forearm and two functioning legs with knees. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

All prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. A ramp is available upon request which will allow a Rider to get their wheelchair closer to the suspended seat.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

NOTE: Please notify a ride operator if needing to use the ramp.

Sky Trek Tower 2

Guest must be 42" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion.

An air-conditioned, enclosed cabin which rotates while traveling up a tower.

Rider Criteria: Guest who do not have seated postural control or do not demonstrate appropriate observed behavior must be accompanied by Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion. Service animals must be leashed and under the owner's control, fit on the floor of the ride, are permitted to ride on the ride.

Sprokets Rockets

Guests must be 42" tall to ride alone **OR** 36" tall **AND** accompanied by a Supervising Companion.

A junior steel roller coaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm that includes a hand (excluding prosthesis) and one functioning leg that includes a foot (excluding prosthesis). Two functioning arms including wrists (excluding prosthesis) are sufficient instead of one functioning arm that includes a hand. Two functioning legs including knees (excluding prosthesis) are sufficient instead of one functioning leg that includes a foot. Guests with a cervical collar, neck brace, broken collar bone, full leg cast, or rigid leg brace are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecurable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

SUPERMAN™: Ultimate Flight

Guests must be at least 54" tall to ride.

A high-speed, flying, looping roller coaster which turns Riders upside down multiple times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder vest with a between-the-legs lap bar secures each Rider across the chest, thighs, and pelvis. Additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding. Due to the nature of the restraint, this ride may not accommodate Guests

of a larger size. A test seat is located at the ride entrance which can be used to ensure proper function and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm with a hand (excluding prosthesis) and two functioning legs with feet. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles, including hip packs, are not permitted. Loose articles can be left in a bin or with a non-Rider.

THE DARK KNIGHT™ Coaster

Guests must be at least 48" tall to ride **OR** 42" tall **AND** accompanied by a Supervising Companion to ride.

A steel roller coaster with airtime hills and hairpin turns. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should

check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the Alternate Access Entrance. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over a small step on the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be zipped in the pouch on the train or left in a bin or with a non-Rider.

NOTE: Cars may bump into each other.

WARNING: This ride utilizes magnetic systems during the ride.

WARNING: This ride contains strobe lighting.

WARNING: This attraction or surrounding area may contain loud sound effects and/or depicts violent acts that could cause distress to some individuals. Exercise caution.

WARNING: Attraction is designed to scare or startle.

THE FLASH™: Vertical Velocity

Guests must be between 52" **AND** 80" tall to ride.

An impulse roller coaster using linear induction motors to launch Riders both forward and backward. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

All prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride utilizes magnetic systems during the ride.

THE JOKER™ Free-Fly Coaster

Guests must be between 48" **AND** 77" tall to ride.

A 4D free spin roller coaster which flips Riders upside down multiple times. Riders will experience weightlessness and rapid movements creating a unique experience.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes at least three fingers and the ability to grip and two functioning legs that each include a knee. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or leg casts are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

All prosthesis are not permitted.

Rider Access: Alternate access is available at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride utilizes magnetic systems during the ride.

The Lobster 2

Guests must be 42" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

This is a circular ride with five sweeps of gondolas moving clockwise versus the up and down counter-clockwise rotation of the arms. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Tot's Livery (in Hometown Park) 1

Guests must be under 54" tall to ride. Hand-held infants are not permitted.

A gentle slow moving circular ride.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step onto the platform. Do not use the grab bar for support as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Triple Play 3

Guests must be 54" tall to ride alone **OR** 42" tall **AND** accompanied by a Supervising Companion.

Maximum Weight - 330 lb. per car.

This is a circular ride with three sweeps of gondolas moving counter-clockwise against the ride's main clockwise rotation. Riders will experience changes in speed, direction & elevation, and rapid movements from side-to-side.

Restraint System: A shared lap bar secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness.

Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Up, Up & Away (in Kidzopolis) 2

Guests must be 42" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight - 550 lb. per Balloon to ride unit. This ride only accommodates two Guests over 54" per Balloon to ride unit.

A tower with free hanging cabins suspended from an elevated, rotating pylon that rotates clock-wise as it climbs the tower for a great aerial view of the area.

Restraint System: A door encloses the ride unit.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion to access the ride unit. This includes an elevated step into the ride unit. Please use caution when entering and exiting as the ride unit may shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

NOTE: Bulky or unsecureable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

Viper 4

Guests must be 48" tall to ride.

A high speed wooden roller coaster with a combination of banked turns and airtime bumps.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Whizzer 3

Guest must be 42" tall to ride alone **OR** 36" tall **AND** accompanied by a Supervising Companion

A high speed roller coaster with sudden turns and drops.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit ahead of the larger Rider within the seat.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two

functioning legs. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit which requires climbing a flight of stairs. Riders will have to take several steps down the stairs, on their own or with the assistance of a companion and be capable of stepping down into the ride unit.

NOTE: Loose articles are not permitted. Loose articles can be left in a bin or with a non-Rider.

Wrath of Rakshasa ⚡

Guests must be between 48" **AND** 78" tall to ride.

A high-speed, floorless looping dive roller coaster which turns Riders upside down multiple times. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand (excluding prosthesis) and two legs that each include a foot. Two functioning arms with hands (excluding prosthesis) are sufficient instead of three extremities if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted on the ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs

to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles, including hip packs, are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride utilizes magnetic systems during the ride.

X Flight ⚡

Guests must be between 52" **AND** 78" tall to ride.

Maximum weight - 290 lb. per Rider.

An exciting roller coaster with high speeds, steep drops, fast turns, inverted loops, and sudden stops.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm that includes a hand (excluding prosthesis) and two legs that each include a foot. Two functioning arms with hands (excluding prosthesis) are sufficient instead of three extremities if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Amputation(s) must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted on the ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to

be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles, including hip packs, are not permitted. Loose articles can be left in a bin or with a non-Rider.

WARNING: This ride utilizes magnetic systems during the ride.

Zoomjets (in Kidzopolis) 2

Guests must be 48" tall to ride alone **OR** accompanied by a Supervising Companion. Hand-held infants are not permitted.

This ride only accommodates one Guest over 54" per row.

A slow moving circular ride with mild up and down motion.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning legs are sufficient instead of one functioning leg if the Guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputation(s) must be at the knee or below. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Prostheses: Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with the Ride Information Center or Rides Leadership to determine if they are eligible to ride using the full body harness. Any prostheses are not permitted if the harness is in use and must be removed prior to riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with

the assistance of a companion, and be capable of elevating themselves up into the ride unit. Do not use the steering wheels for support as they will shift.

NOTE: Bulky or unsecurable loose articles are not permitted. Those loose articles can be left in a bin or with a non-Rider.

ENTERTAINMENT VENUES

Due to the popularity of our shows, we suggest you arrive early as seating may be limited. Show schedules are available at Guest Services, on the Six Flags mobile app and at any theatre entrance. All Entertainment venues are accessible to Guests who may have a mobility impairment. Ask any Team Member at the venue for assistance.

GRAND MUSIC HALL

Grand Music Hall, located in Hometown Square, is an indoor, air-conditioned theatre featuring main stage show productions. There are viewing areas that accommodate wheelchairs and companions in the theatre. A ramp is located to both sides of the theater entrance. Stroller parking is located outside of the theater. Please ask an usher for assistance.

SNOWSHOE SALOON

Snowshoe Saloon, located in Yukon Territory, next to Yukon BBQ Pit. It is an indoor, air-conditioned theatre featuring stage show productions. Stroller parking is located outside of the theater. Please ask an usher for assistance.

HOMETOWN STATION STAGE

Hometown Station Stage, located in Hometown Square is an outdoor show venue featuring singing and dancing shows. The viewing area consists of bench seating and standing areas.

PARADE ROUTE

In Hometown Square and moving towards the front of the park and running through New Orleans Place and Mardi Gras is our parade route. Parades with floats and/or trolleys will start in either Hometown Square and move towards Mardi Gras, or they will start in Mardi Gras and move towards Hometown Square. Any parade without a float and/or trolley may start in between Condor and Rue Le Dodge in New Orleans Place and move towards Hometown Square or Mardi Gras. The view area for the entire parade route consists of bench seating and standing areas.

MARDI GRAS STAGE

Mardi Gras Stage is an outdoor show venue featuring singing and dancing shows. The viewing area consists of bench seating and standing areas and is located near Big Easy Balloons.

SOUTHWEST TERRITORY AREA

It is an outdoor show venue featuring singing and dancing shows typically. The viewing area consists of bench seating and standing areas and is in Southwest Territory, it is located between Chubasco and Windy City.

YUKON BBQ PIT OUTDOOR PATIO

This stage is used for live bands, particularly during Oktoberfest. The venue does not have seating.

FRIGHT FEST

Fright Fest at Six Flags Great America has extreme attractions that are designed to scare and startle. During this event, the park and certain attractions will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, a history of seizures or epilepsy, sensitivities to latex, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Characters in our Fright Fest attractions will not touch you; please do not touch them in any manner. Guests who do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access may be available. Please visit Guest Services for more information. Service animals are welcome to attend Fright Fest event and are permitted to walk through the park and enter haunted attractions. Please adhere to all posted and verbal warnings and directions.

TRICKS AND TREATS

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions or services offered visit Guest Services.

NOTES

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept these risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations, Great Adventure does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, **do not ride!**

All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened properly to allow Guests to ride.

Information in this guide is subject to changes.
